Issue 3 - March 2024

The projects preconstruction activities are coming to an end with a site start expected May/June 2024.

The development will go before April planning committee for determination.

Development Visualisation

Activities on Site

Kier will be on site to undertake some enabling works in preparation of the main construction programme commencing May/June 2024. The works will include utility surveys and trees/shrub clearance.

These works will commence on 22 March 2024 and will last approximately 2 weeks.

Programme – Key dates

Tree felling/site clearing:	March 24
Planning Determination:	April 24
Site start:	May-June 24
Completion	Q3 2025

Surveys

All associated pre-construction surveys have now been completed including but not limited to ecology, tree surveys and site investigations. This has allowed designs to progress with a detailed understanding of the sites specific characteristics.

In addition to site surveys, traffic and transport information has been gathered to help inform the detailed development proposals.
