

North Lanarkshire Results from the 2022 Census

North Lanarkshire - Results from the 2022 Census

Introduction

The Census is undertaken by the National Records of Scotland every 10 years and provides a picture of all the people and households in Scotland.

The Census asks questions about a person, their household, and their home.

All data obtained through the Census information is anonymised, and the actual Census records are kept secure for 100 years.

The data obtained from the Census helps to build a detailed snapshot of society.

It helps the government and local authorities to plan and fund local services.

For example, Census data showing how many people work in different jobs and industries are used to develop new policies in relation to employment. Information on how people travel to work and how many cars they have contributes to roads and transport planning.

This report is based on data for Census Output Areas. Output Areas (OAs) are the key geography for dissemination of small area statistics from the Census. OAs are large enough for Census statistics to be released without infringing confidentiality. They are designed to have relatively small numbers of households (in the range of 25 to 89) and population (≥ 60), while nesting within council areas.

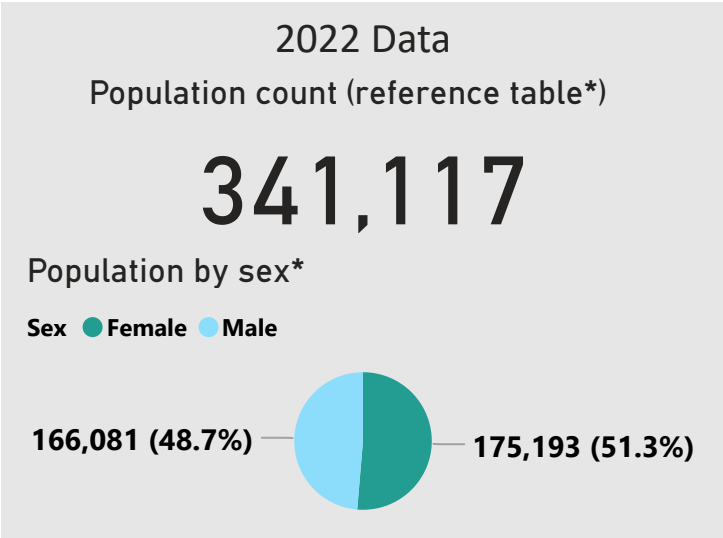

2022 Census in Scotland

The Census carried out in Scotland in 2022 was co-ordinated by the Scottish Government. Further information can be found on their website: <https://www.scotlandscensus.gov.uk/about/2022-census/>

North Lanarkshire's Census results

The dashboards presented here summarise the findings from the 2022 Census in respect of the people and households of North Lanarkshire. Where the data is available and meaningful, comparisons have been made to the previous Census results in 2011.

North Lanarkshire Census 2022 - Data perturbation overview

For 2022 the Output Area data that the council use in all Census reports has had 'key perturbation' by National Records of Scotland (NRS). This is a measure that NRS have implemented to ensure that people could not be personally identified via certain figures. For example if there was a postcode with only one resident living there, you could identify personal information about that specific person using the data.

NRS can confirm that these differences are an intended result of their Statistical Disclosure Control strategy. When a Census table is created, small adjustments will be made automatically to cells in the table. This means that cells might not sum to sub totals and totals due to these Statistical Disclosure Controls (SDC). **More information about SDC from Scotland's Census is available here [Statistical disclosure control | Scotland's Census](#)**

In the example on the left, you will note that 166,081 males added to 175,193 females does not total 341,117. Key perturbation has made a slight variance in the figures which is to be expected.

Specific graphs will have these totals on the right side of screen to highlight perturbation also. When you see percentage figures for any of the graphs, they reflect the percentage of the output figure. For example you'll see in the 'ethnic group' report that 1.57% of people are White Polish. That means 1.57% of the ethnic group output figure of 341,091.

Some of these figures will also have variances because some outputs will only contain total amount of people in a certain situation or over/under a certain age.

Population count 2022
from reference table*

341,117

Population count from
ethnic group output

341,091

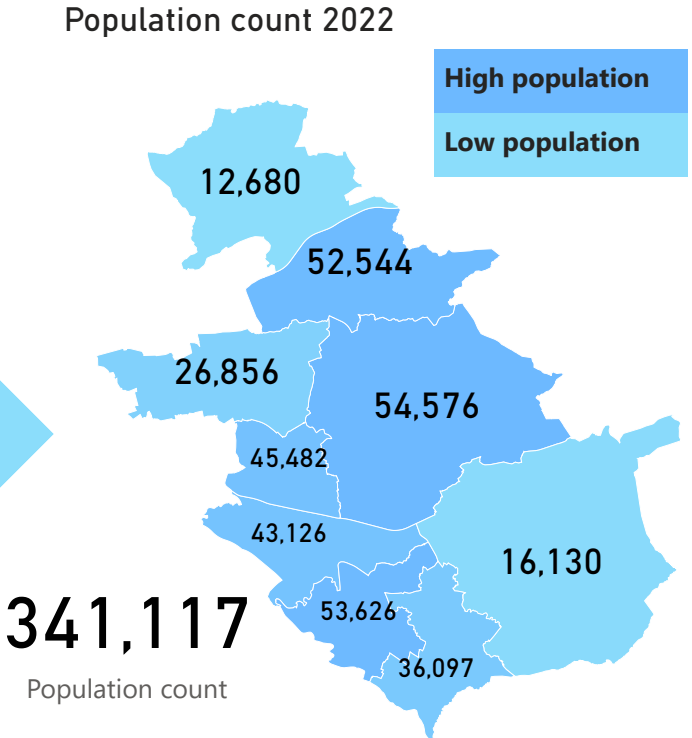

You can access more of Scotland's Census through their website: [Home | Scotland's Census](#)

Please note, as a result of perturbation, it is expected there will be a slight variance on figures published or downloaded from the Scotland Census website.

North Lanarkshire Census 2022 - Map visuals

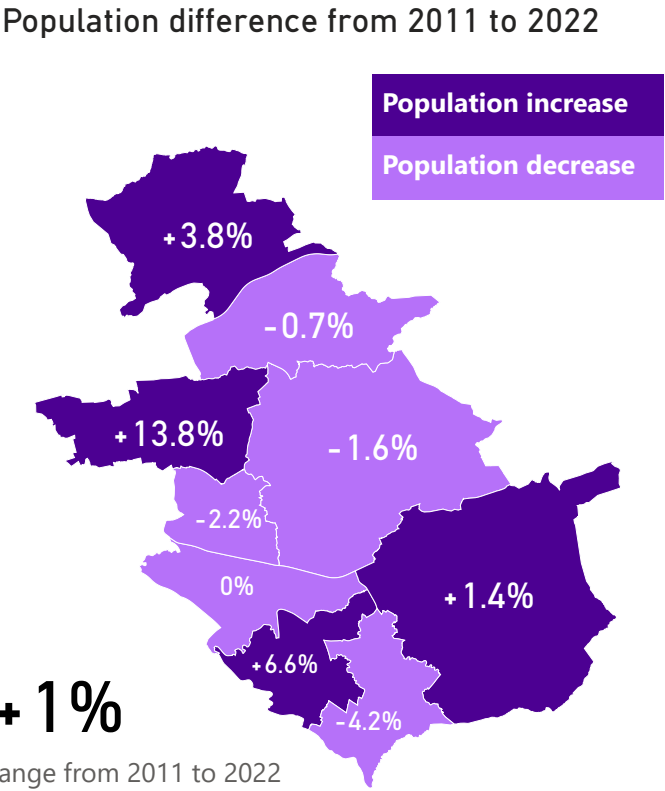

The council also provide map visuals for some of the data to help geographically analyse key differences.

The map on the left shows the population count for each of the Community Board boundaries. The areas on the map will be a darker blue where the count is higher, or a lighter blue where the count is lower. A total for North Lanarkshire as a whole is also displayed under the map at the bottom left.

Each map page also has a purple map to illustrate the change from the 2011 Census results to the 2022 Census results by percentage.

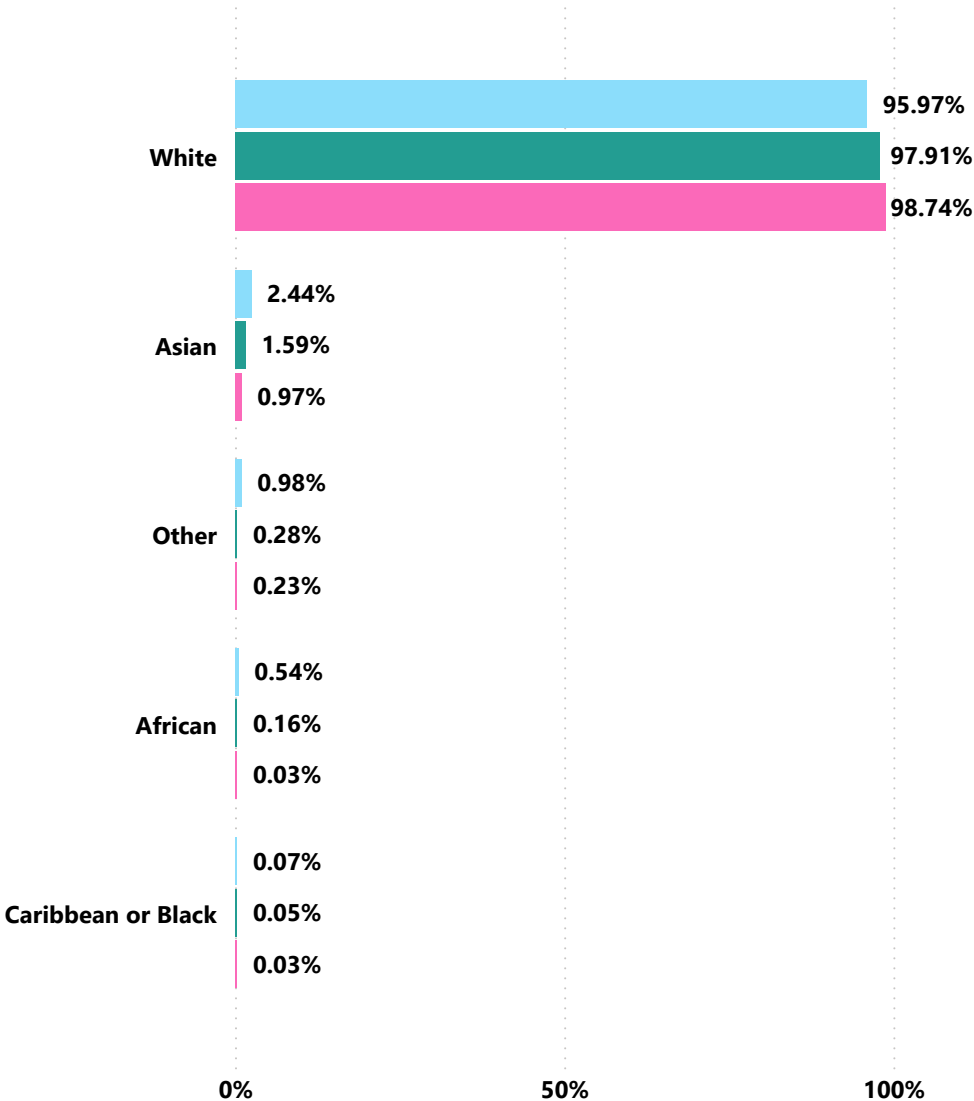

Light purple areas on the map indicate a decrease with dark purple areas indicating an increase. The change overall for North Lanarkshire is indicated at the bottom left of the map.

North Lanarkshire Census 2022 - Graphs and tables overview

Percent of population by broader ethnic group

2022 2011 2001

Where possible, graphs can show you the percentage (from the specific output table) compared to 2011 and 2001. 2022 information will be in light blue, 2011 information in teal and 2001 information in pink.

North Lanarkshire's Census results

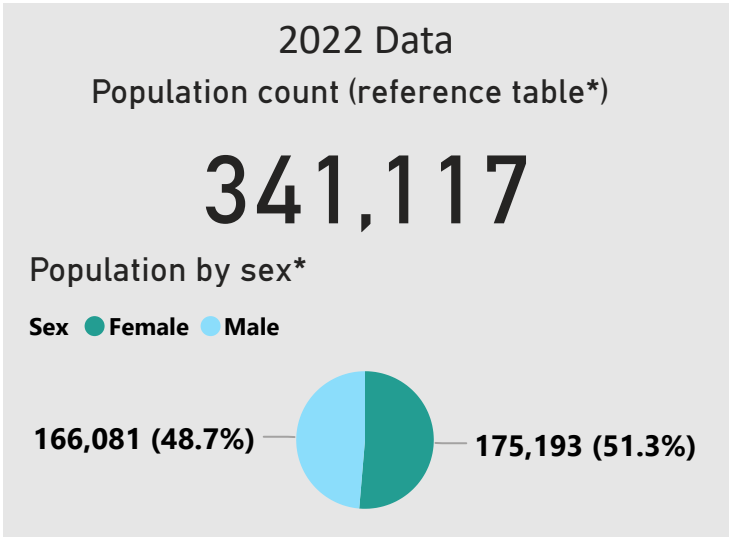

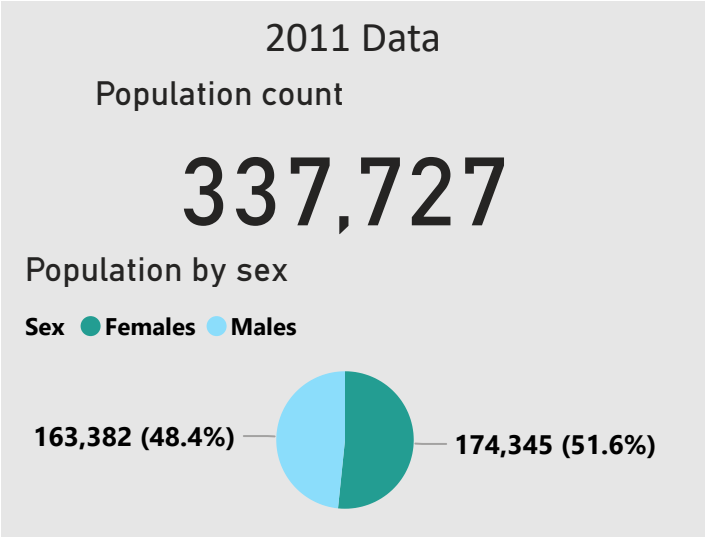

The dashboards presented here summarise the findings from the 2022 Census in respect of the people and households of North Lanarkshire. Where the data is available and meaningful comparisons have been made to the previous Census results in 2011.

The general population characteristics data themes include:

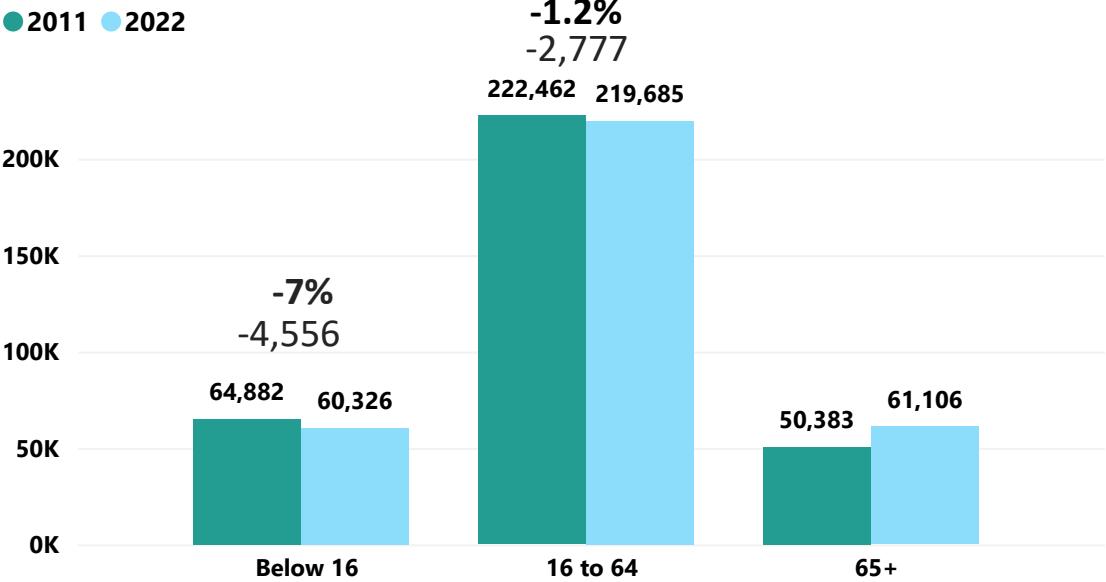

- Population counts - general overview: total populations in 2011 and 2022 compared
- Population counts - maps: illustration of population by Community Board
- Percentage of population by ethnic group
- Percentage of population by religion
- Percentage of population by main language (age 3 or older), 2011 and 2022 compared
- Percentage of population by language skills (2011 and 2022 only for English. 2001, 2011 and 2022 for Gaelic, and 2022 only for British Sign Language users)
- Percentage of population by national identity. 2011 and 2022 compared
- Percentage of population by passports held, 2022 only
- Percentage of population by UK armed forces veterans, 2022 only
- Percentage of population by sexual orientation and trans history, 2022 only
- Percentage of population by marital and civil partnership status (Civil partnership data only available from 2011 and 2022)
- Percentage of population by adult lifestage, 2011 and 2022 only

The metadata information on page 27 has further details on how the data has been calculated as well as the parameters and release schedule.

A National Statistics Publication for Scotland

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007. This provides assurance that these statistics are of the highest quality, meet user needs, and comply with the [Code of Practice for Statistics](#).

Data Perturbation

The data has been perturbed - this means the data has been displayed in such a way as to protect against the disclosure of personal information. This has been carried out in line with Statistical Disclosure Control standards. As a result some data might not sum to either sub totals or the overall total.

For further information on variables, see <https://www.scotlandscensus.gov.uk/about/metadata-a-to-z/>

To find out more on this visit <https://www.scotlandscensus.gov.uk/about/2022-census/statistical-methodology/statistical-disclosure-control/>

Population Count 2022 from Reference Table* - This references population count from table UV103 - Age by Single Year.

North Lanarkshire - 2022 Census results

Households

Households

Introduction

The Census is undertaken by the National Records of Scotland every 10 years and provides a picture of all the people and households in Scotland.

The Census asks questions about a person, their household, and their home.

All data obtained through the Census information is anonymised, and the actual Census records are kept secure for 100 years.

The data obtained from the Census helps to build a detailed snapshot of society.

It helps the government and local authorities to plan and fund local services.

For example, Census data showing how many people work in different jobs and industries are used to develop new policies in relation to employment. Information on how people travel to work and how many cars they have contributes to roads and transport planning.

2022 Census in Scotland

The Census carried out in Scotland in 2022 was co-ordinated by the Scottish Government. Further information can be found on their website: <https://www.scotlandscensus.gov.uk/about/2022-census/>

North Lanarkshire's Census results

The dashboards presented here summarise the findings from the 2022 Census in respect of the households of North Lanarkshire. Where the data is available and meaningful comparisons have been made to the previous Census results in 2011. The data is presented at a North Lanarkshire level.

The household data themes include:

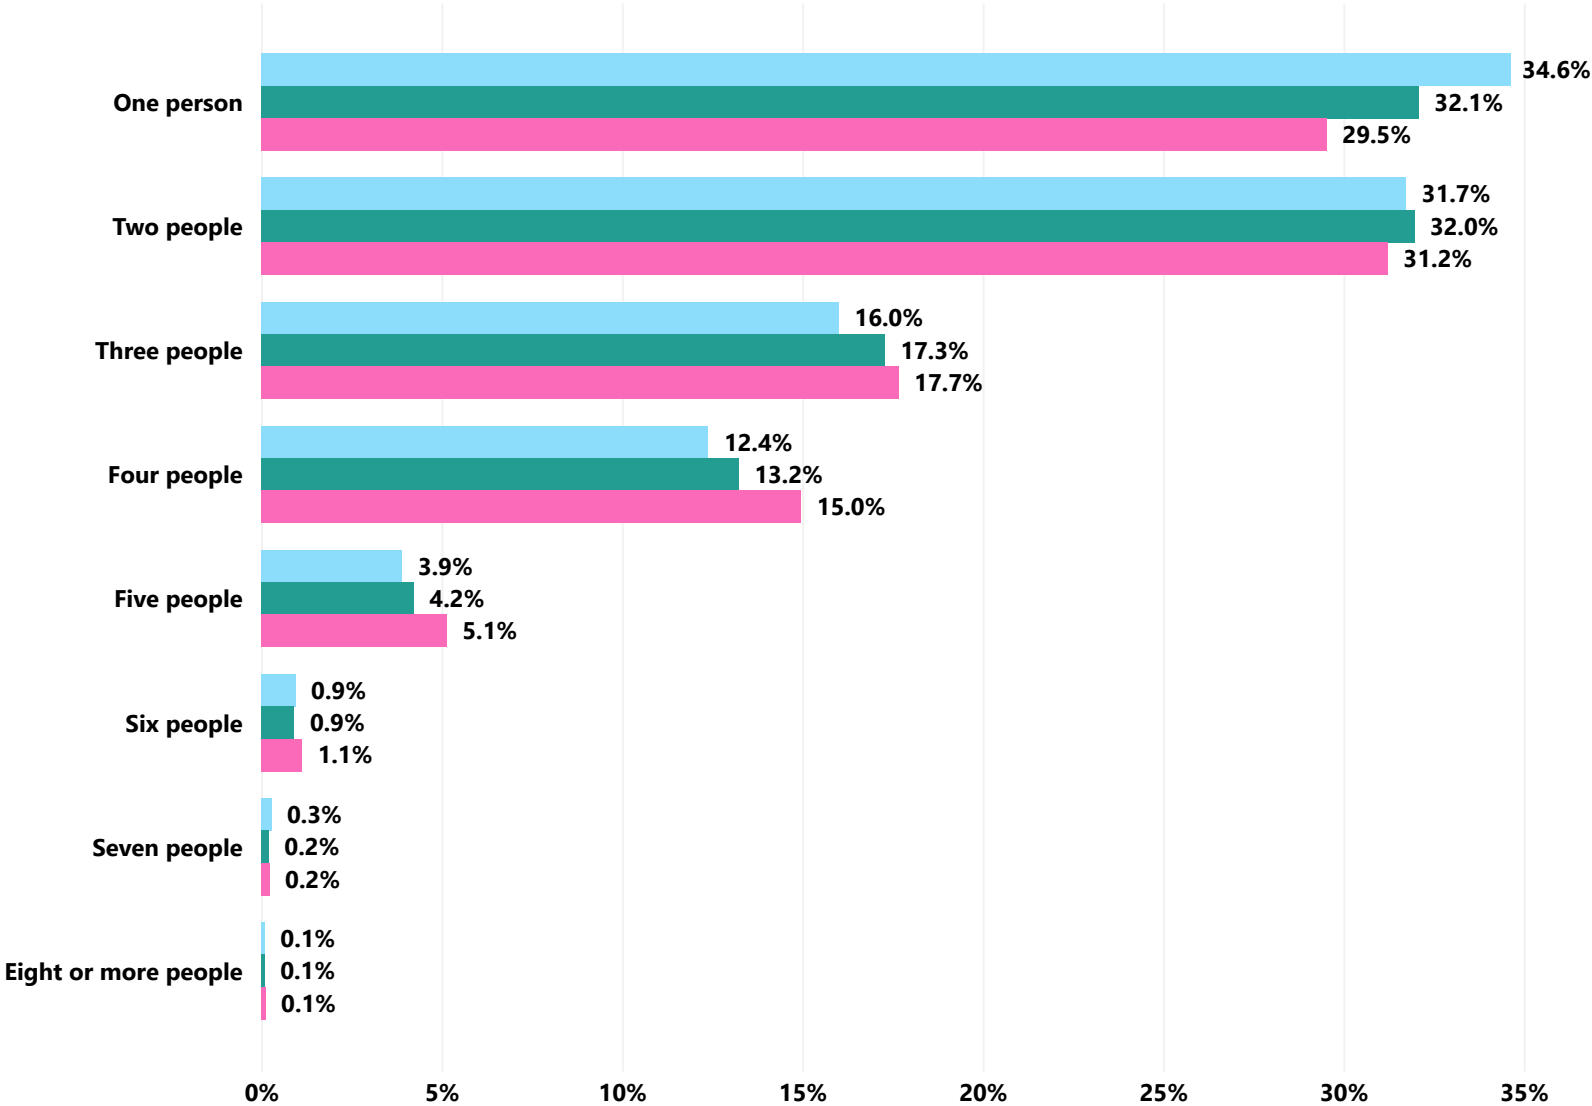

- Household count - general overview
- Household count - community board and ward maps - map illustrations of where household counts differ across North Lanarkshire
- Household lifestage - 2011 and 2022 only
- Household composition 2022 detail - details on every 2022 classification of household composition
- Household composition comparison - high level category comparison for all census years
- Household composition (alternative definitions) comparison - high level category comparison for all census years
- Household type - 2011 and 2022 only
- Accommodation type
- Household tenure
- Car and van availability by household
- Central heating by household
- Number of bedrooms (2022 only)
- Occupancy rating for bedrooms (2022), rooms (2011)

The metadata information on page 56 has further details on how the data has been calculated as well as the parameters and release schedule.

Release 5: 22/08/2024 - [Housing](#)

Schedule: [Census outputs schedule](#)

Some detailed direct comparisons between 2001, 2011 and 2022 couldn't be made due to significant differences in the classifications.

- 'Senior' in each year meant the following;
 - 'of pension age' in 2001
 - aged 65 or over in 2011
 - aged 66 or over in 2022.
- Same-sex civil partnership households in 2011 did not detail whether the household had children or not, and were classed separately from Married couples. In 2022 these classifications were combined
- 'Three or more adults with child(ren)' in 2001 includes the category 'two adults and 3 or more children' as they were grouped together at the time
- Number of bedrooms in 2011 and 2001 cannot be compared as those Censuses asked for rooms, not just bedrooms
- Occupancy rating in 2022 is based on bedrooms, occupancy rating in 2011 is based on rooms

A National Statistics Publication for Scotland

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007. North Lanarkshire - 2022 Census results

Migration

Migration

Introduction

The Census is undertaken by the National Records of Scotland every 10 years and provides a picture of all the people and households in Scotland.

The Census asks questions about a person, their household, and their home.

All data obtained through the Census information is anonymised, and the actual Census records are kept secure for 100 years.

The data obtained from the Census helps to build a detailed snapshot of society.

It helps the government and local authorities to plan and fund local services.

For example, Census data showing how many people work in different jobs and industries are used to develop new policies in relation to employment. Information on how people travel to work and how many cars they have contributes to roads and transport planning.

2022 Census in Scotland

The Census carried out in Scotland in 2022 was co-ordinated by the Scottish Government. Further information can be found on their website: <https://www.scotlandscensus.gov.uk/about/2022-census/>

North Lanarkshire's Census results

The dashboards presented here summarise the findings from the 2022 Census in respect of migration to the UK in North Lanarkshire. Where the data is available and meaningful comparisons have been made to the previous Census results in 2011. The data is presented at a North Lanarkshire level.

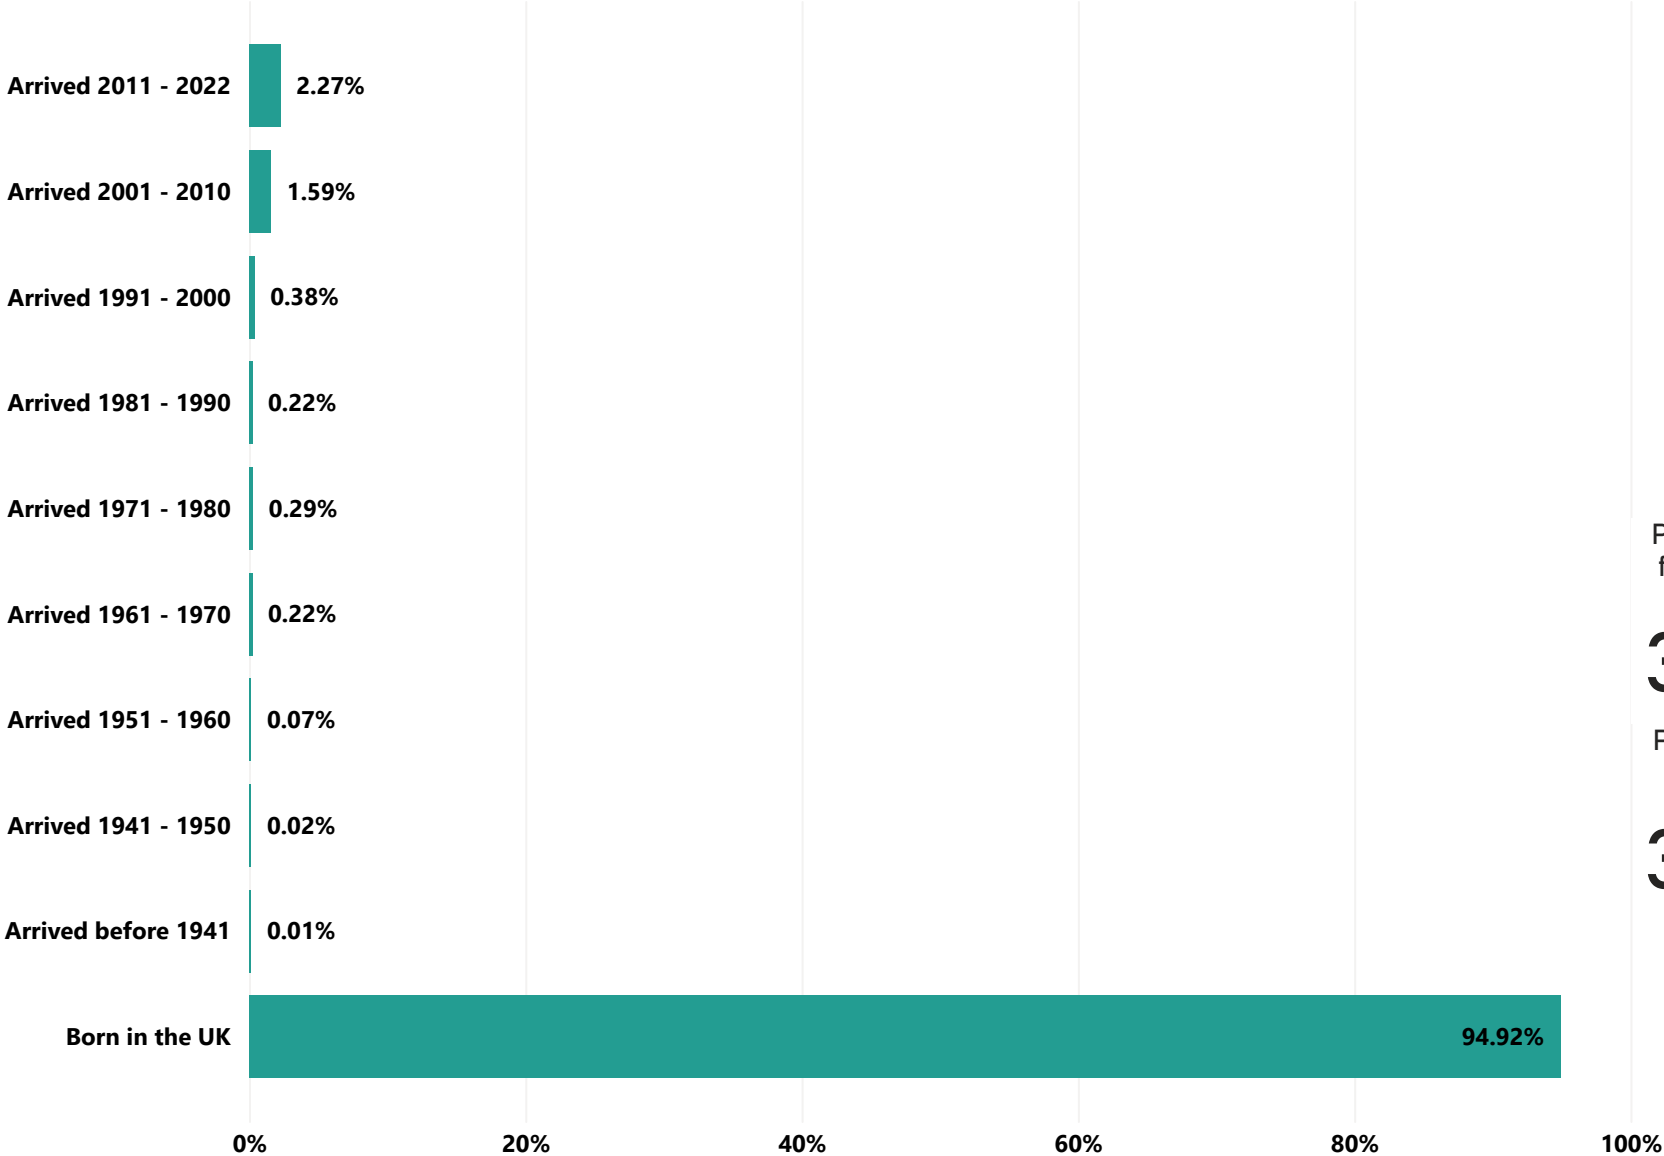

The migration data themes include:

- Year of arrival to the UK - general overview
- Age of arrival to the UK
- Length of residence in the UK

The metadata information on page 64 has further details on how the data has been calculated as well as the parameters and release schedule.

Other	797	725	1,169
Bicycle	531	454	560
Motorcycle, scooter or moped	547	240	207
Underground, subway or tram	175	75	63
Total	200,372	151,944	161,669

Population count from method of travel to work output

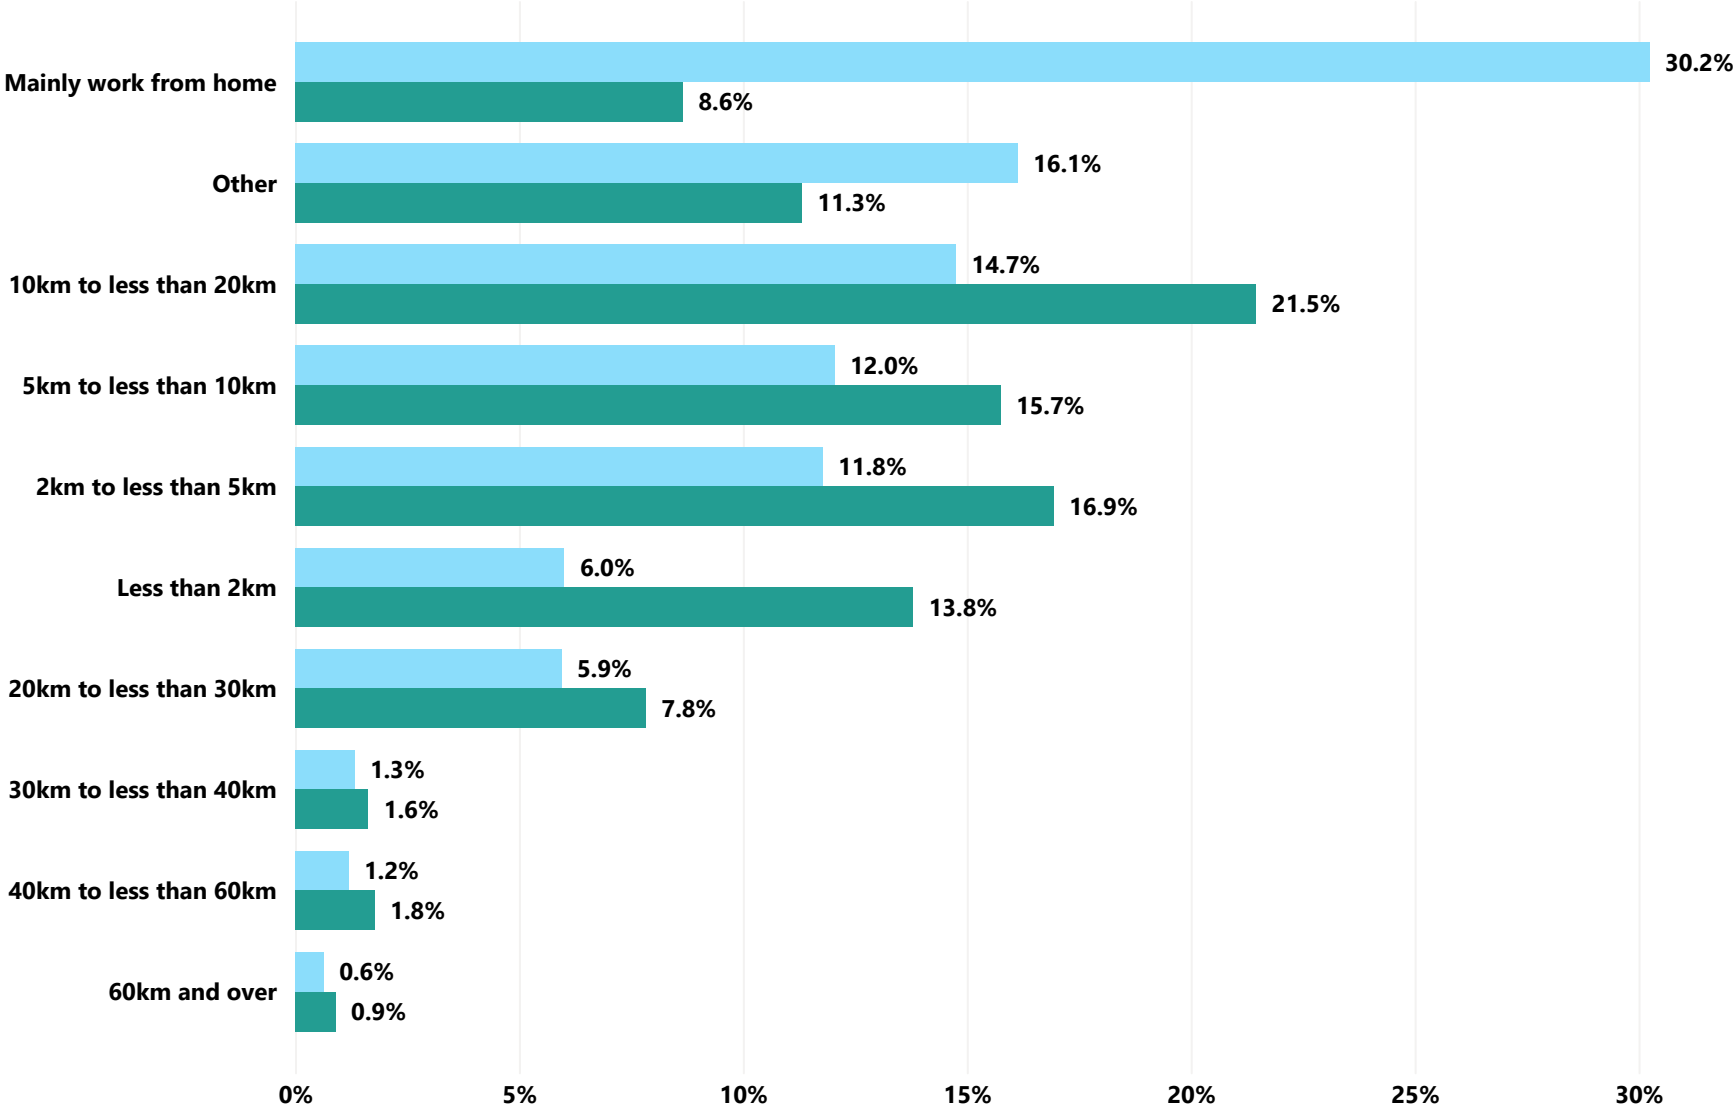

161,669

(F1) - 2001 data includes those that travel to study

North Lanarkshire Census 2022 - Distance travelled to work

Percentage of population by distance travelled to work

2022 2011

Distance travelled to work	2011	2022
Mainly work from home	13,143	47,397
Other	17,180	25,273
10km to less than 20km	32,602	23,121
5km to less than 10km	23,919	18,867
2km to less than 5km	25,722	18,450
Less than 2km	20,955	9,415
20km to less than 30km	11,893	9,315
30km to less than 40km	2,474	2,066
40km to less than 60km	2,690	1,860
60km and over	1,366	991
Total	151,944	156,755

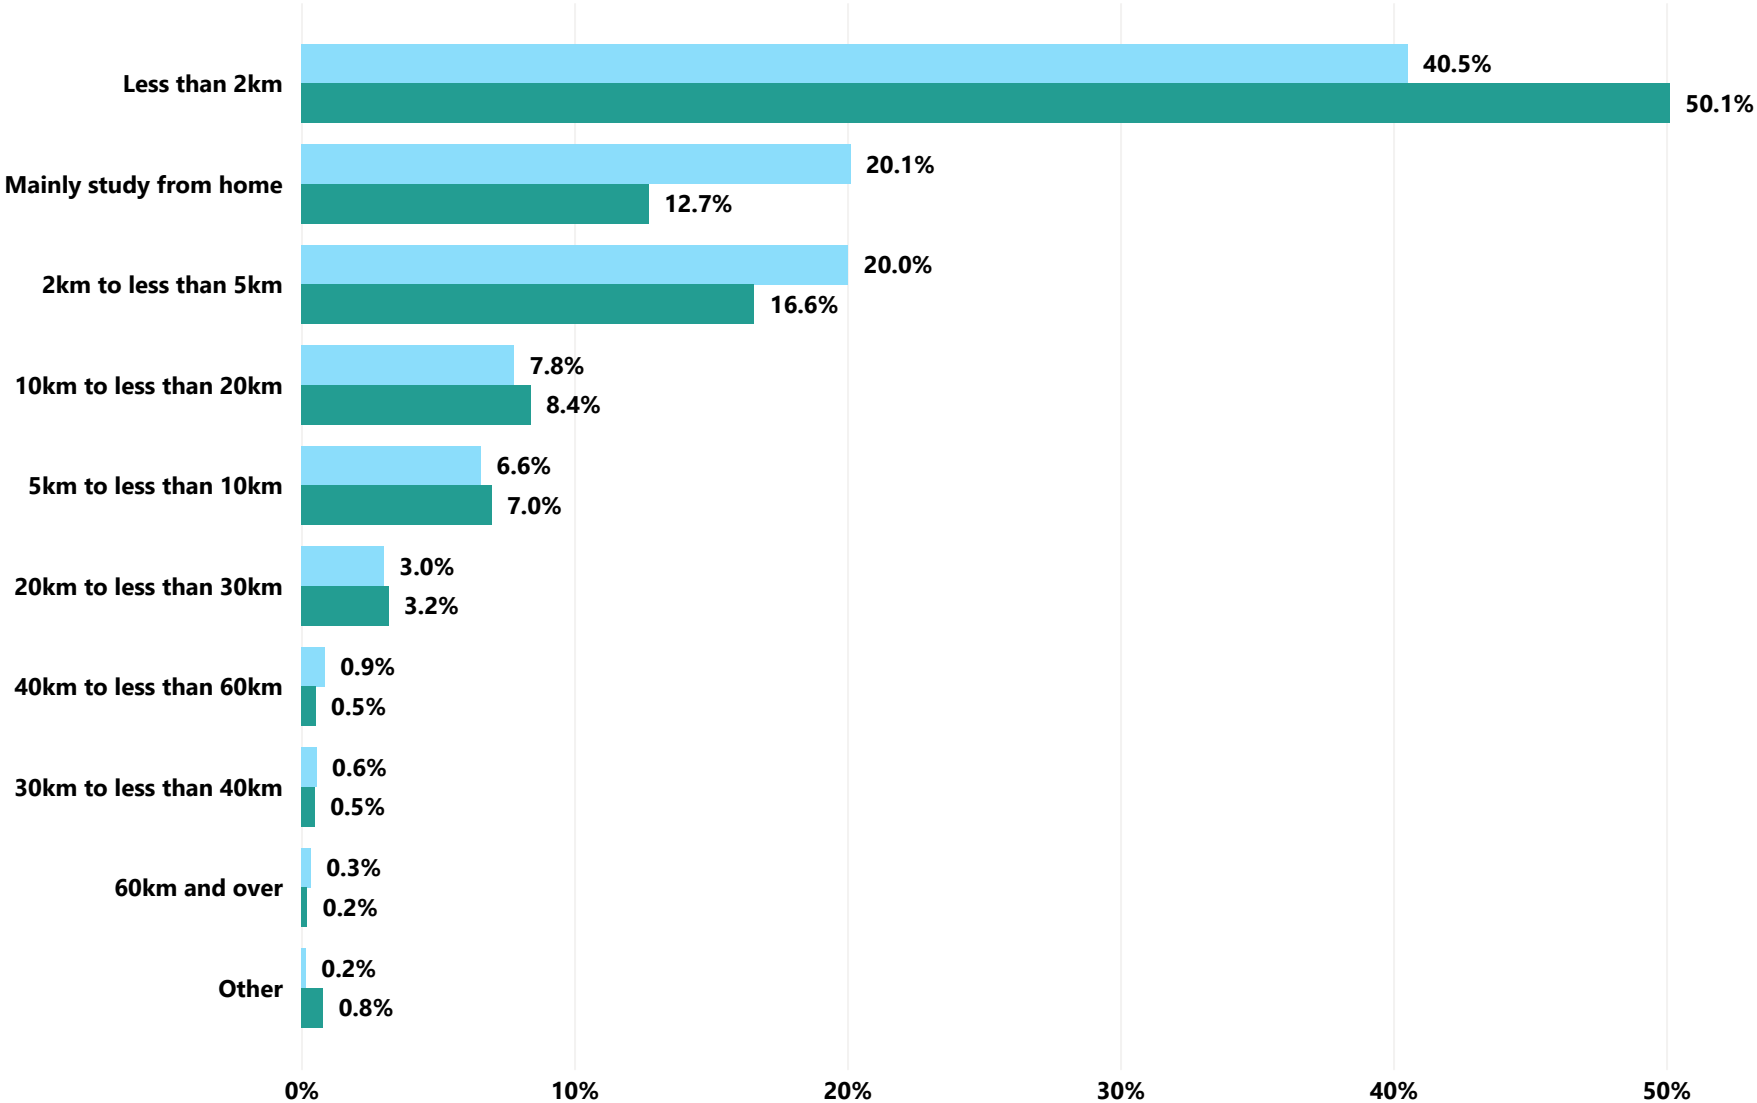

Population count from distance travelled to work output

156,755

North Lanarkshire Census 2022 - Distance travelled to place of study

Percentage of population by distance travelled to place of study

2022 2011

Distance travelled to place of study	2011	2022
Less than 2km	30,976	25,495
Mainly study from home	7,854	12,655
2km to less than 5km	10,250	12,605
10km to less than 20km	5,185	4,906
5km to less than 10km	4,304	4,138
20km to less than 30km	1,970	1,904
40km to less than 60km	323	540
30km to less than 40km	302	350
60km and over	135	218
Other	491	105
Total	61,790	62,916

Population count from distance travelled to place of study output

62,916

North Lanarkshire - 2022 Census results

Health and disability

Health and disability

Introduction

The Census is undertaken by the National Records of Scotland every 10 years and provides a picture of all the people and households in Scotland.

The Census asks questions about a person, their household, and their home.

All data obtained through the Census information is anonymised, and the actual Census records are kept secure for 100 years.

The data obtained from the Census helps to build a detailed snapshot of society.

It helps the government and local authorities to plan and fund local services.

For example, Census data showing how many people work in different jobs and industries are used to develop new policies in relation to employment. Information on how people travel to work and how many cars they have contributes to roads and transport planning.

2022 Census in Scotland

The Census carried out in Scotland in 2022 was co-ordinated by the Scottish Government. Further information can be found on their website: <https://www.scotlandscensus.gov.uk/about/2022-census/>

North Lanarkshire's Census results

The dashboards presented here summarise the findings from the 2022 Census in respect of the health and disability conditions of people in North Lanarkshire. Where the data is available and meaningful comparisons have been made to the previous Census results in 2011. The data is presented at a North Lanarkshire level.
