

Cumbernauld Community Profile

Cumbernauld - general information

The information presented refer to community boards' geographical areas.

The community board areas are made up of the council ward(s).

The data used in this dashboard was aggregated up from sources of different level of detail (granularity), so some statistics might be derived from smaller areas (smaller geometries) like intermediate zones, data zones or postcodes. Please note the Intermediate zones and data zones are attributed to the council wards and community board areas on a best fit basis.

The Cumbernauld Community Board area covers the wards of Cumbernauld North, Cumbernauld East and Cumbernauld South in North Lanarkshire. The area lies on the eastern edge of Scotland's Central Belt and features a mix of residential neighbourhoods, green spaces and woodland. Originally developed as a New Town, Cumbernauld has a distinctive layout and a strong sense of local identity.

The community is socially diverse, with a blend of long-standing residents and newer families contributing to a rich cultural mix. Schools in the area reflect this diversity and play a key role in supporting children and families, especially where additional needs or economic pressures are present.

Housing across the board area includes a range of property types from detached homes to terraced houses and flats. While this offers choice, some residents face challenges around affordability, availability and the condition of housing stock, particularly in areas with older developments.

Economically, the area is generally stable, but some neighbourhoods experience greater hardship. Issues such as unemployment, low income and limited access to services affect parts of the community and many households rely on support to manage everyday costs.

Looking ahead, Cumbernauld is undergoing change, with new housing developments and infrastructure improvements planned. These bring opportunities for growth but also highlight the need to ensure local services - like schools, healthcare and transport, can meet the needs of a growing population.

Cumbernauld - geography

This dashboard provides an overview of Cumbernauld's geographic characteristics about its area, population density, wards, intermediate zones and data zones, along with a map showing ward boundaries.

Geographic characteristics

74

The Cumbernauld Community Board consists of 3 wards which are Cumbernauld North, Cumbernauld South and Cumbernauld East.

There are 15 intermediate zones (2022) and 74 data zones (2022).

Cumbernauld - geography context

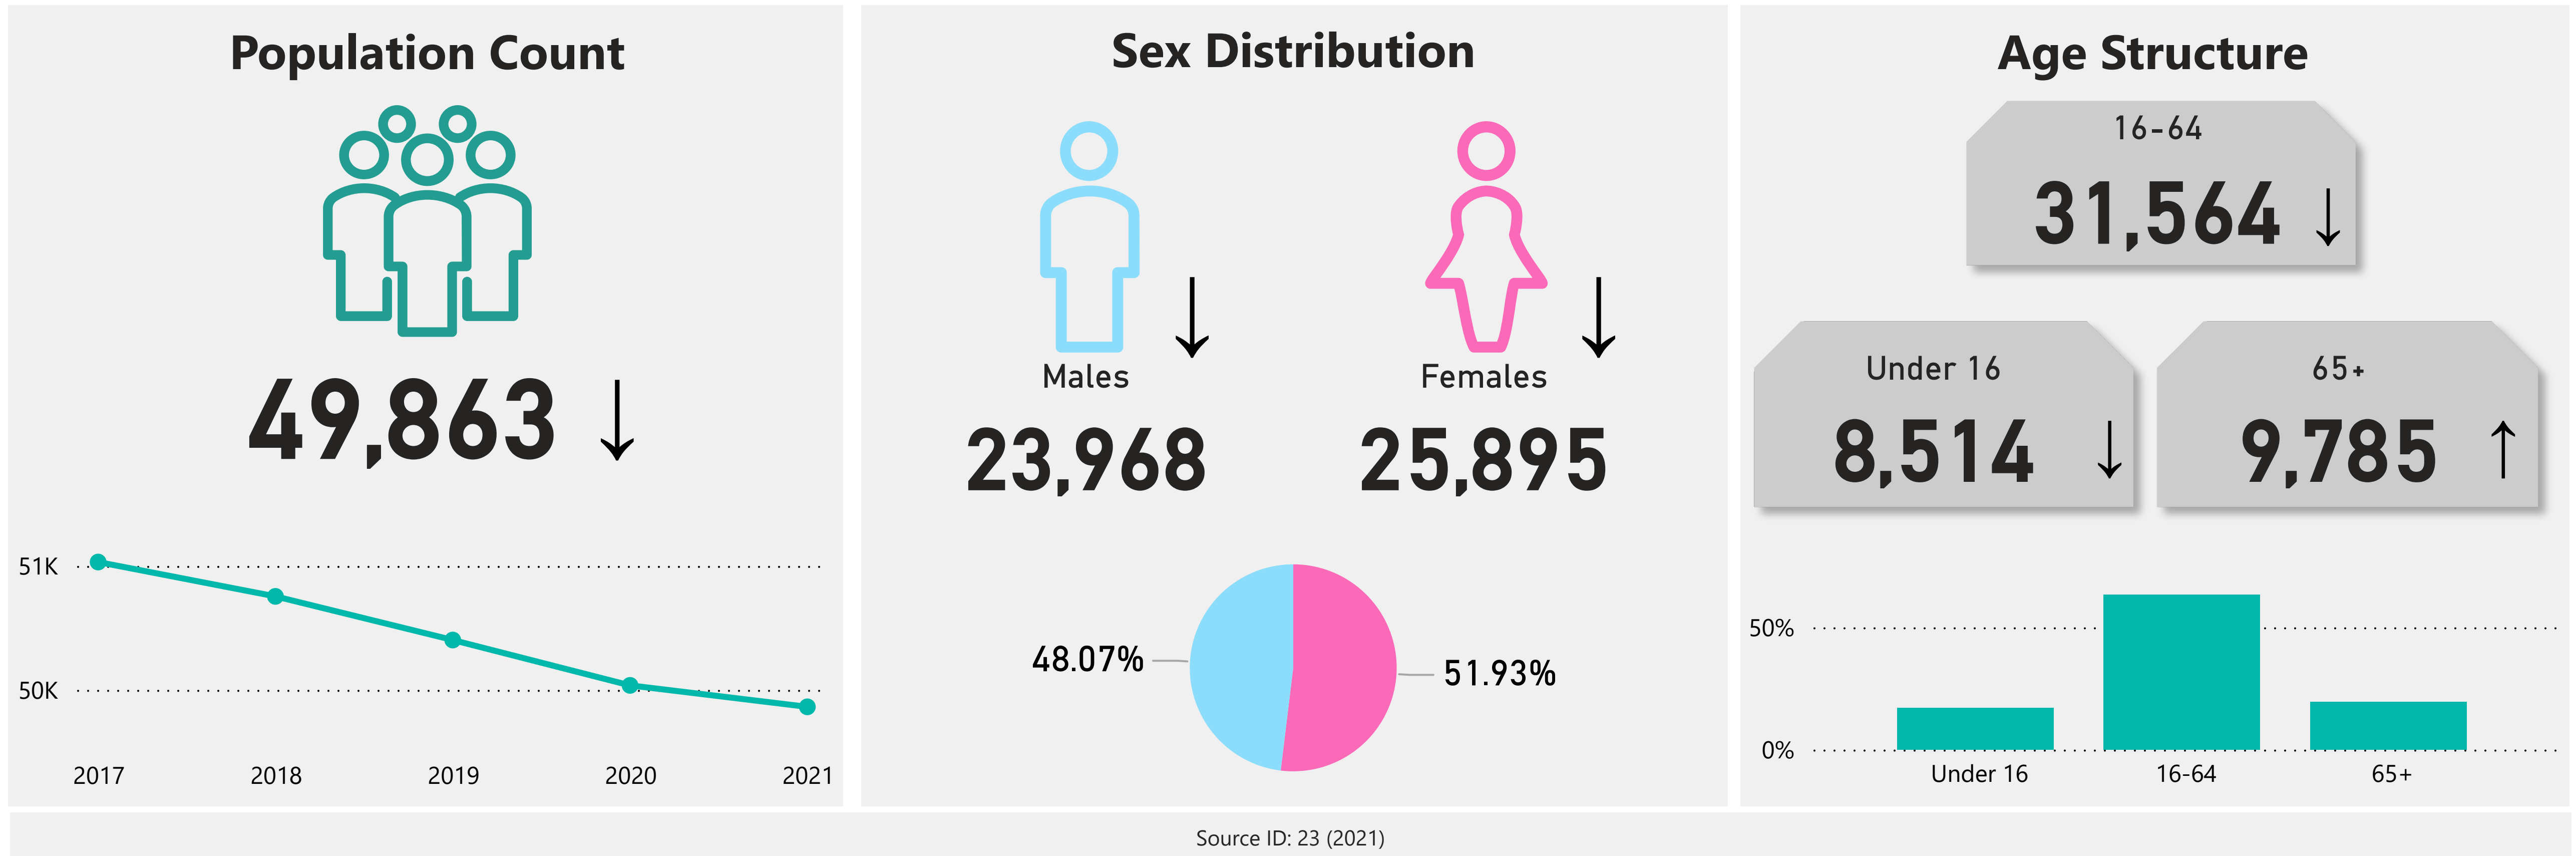

Cumbernauld is situated around 13 miles northeast of Glasgow - a quick 19 minute drive via the M80 motorway that links directly to the M8 and M73, creating swift routes to Glasgow, Edinburgh, Stirling and the north of England. Positioned on the Scottish watershed, the town sits between the Forth and Clyde rivers at approximately 130m above sea level and integrates rail and motorway corridors that span Scotland's Central Belt. Internally, connectors like the A73 and A8011 link the town's neighbourhoods, such as Greenfaulds, Kildrum and Abronhill, to the broader transport network, while ongoing town centre redevelopment aims to improve local access.

Cumbernauld railway station, on the Cumbernauld Line and Motherwell branch, is managed by ScotRail and is located roughly 14 miles from Glasgow Queen Street and just under 12 miles from Motherwell, offering frequent services to Glasgow, Falkirk Grahamston and Edinburgh. The station features step-free access, cycle racks, a car park, ticket machines, sheltered waiting areas and bus interchange facilities outside. On road, around 19 bus routes serve nearly 32 stops in the town, including circular local lines (like the 34 and 343) and regional express routes (X3, X24/X24A/X25, X36, X37) connecting Cumbernauld with Glasgow's Buchanan Bus Station, Stirling, Falkirk and more.

Many residents commute to Glasgow, Edinburgh, Stirling and Falkirk for work or education, while local employment thrives in retail, logistics, public services and manufacturing. The ongoing town centre transformation and infrastructure improvements are enhancing connectivity, amenities and long-term quality of life for people across North, South and East Cumbernauld.

Cumbernauld - general population characteristics

The infographics below detail the population of Cumbernauld using the latest ward level mid-year population estimates (2021) from National Records of Scotland.

The latest mid-year population estimates have the population of Cumbernauld Community Board as 49,863. This is a decrease of 173 from 50,036 in 2020.

The working age population (16-64) in Cumbernauld is 31,564 (63.3%). The percentage of working age population in North Lanarkshire overall is 65.3%.

19.6% of Cumbernauld's population (9,785) are 65 or over, compared to the North Lanarkshire percentage of 15.5%.

Source ID: 23 (2021)

The latest release for mid-year population estimates at ward level is 2021.

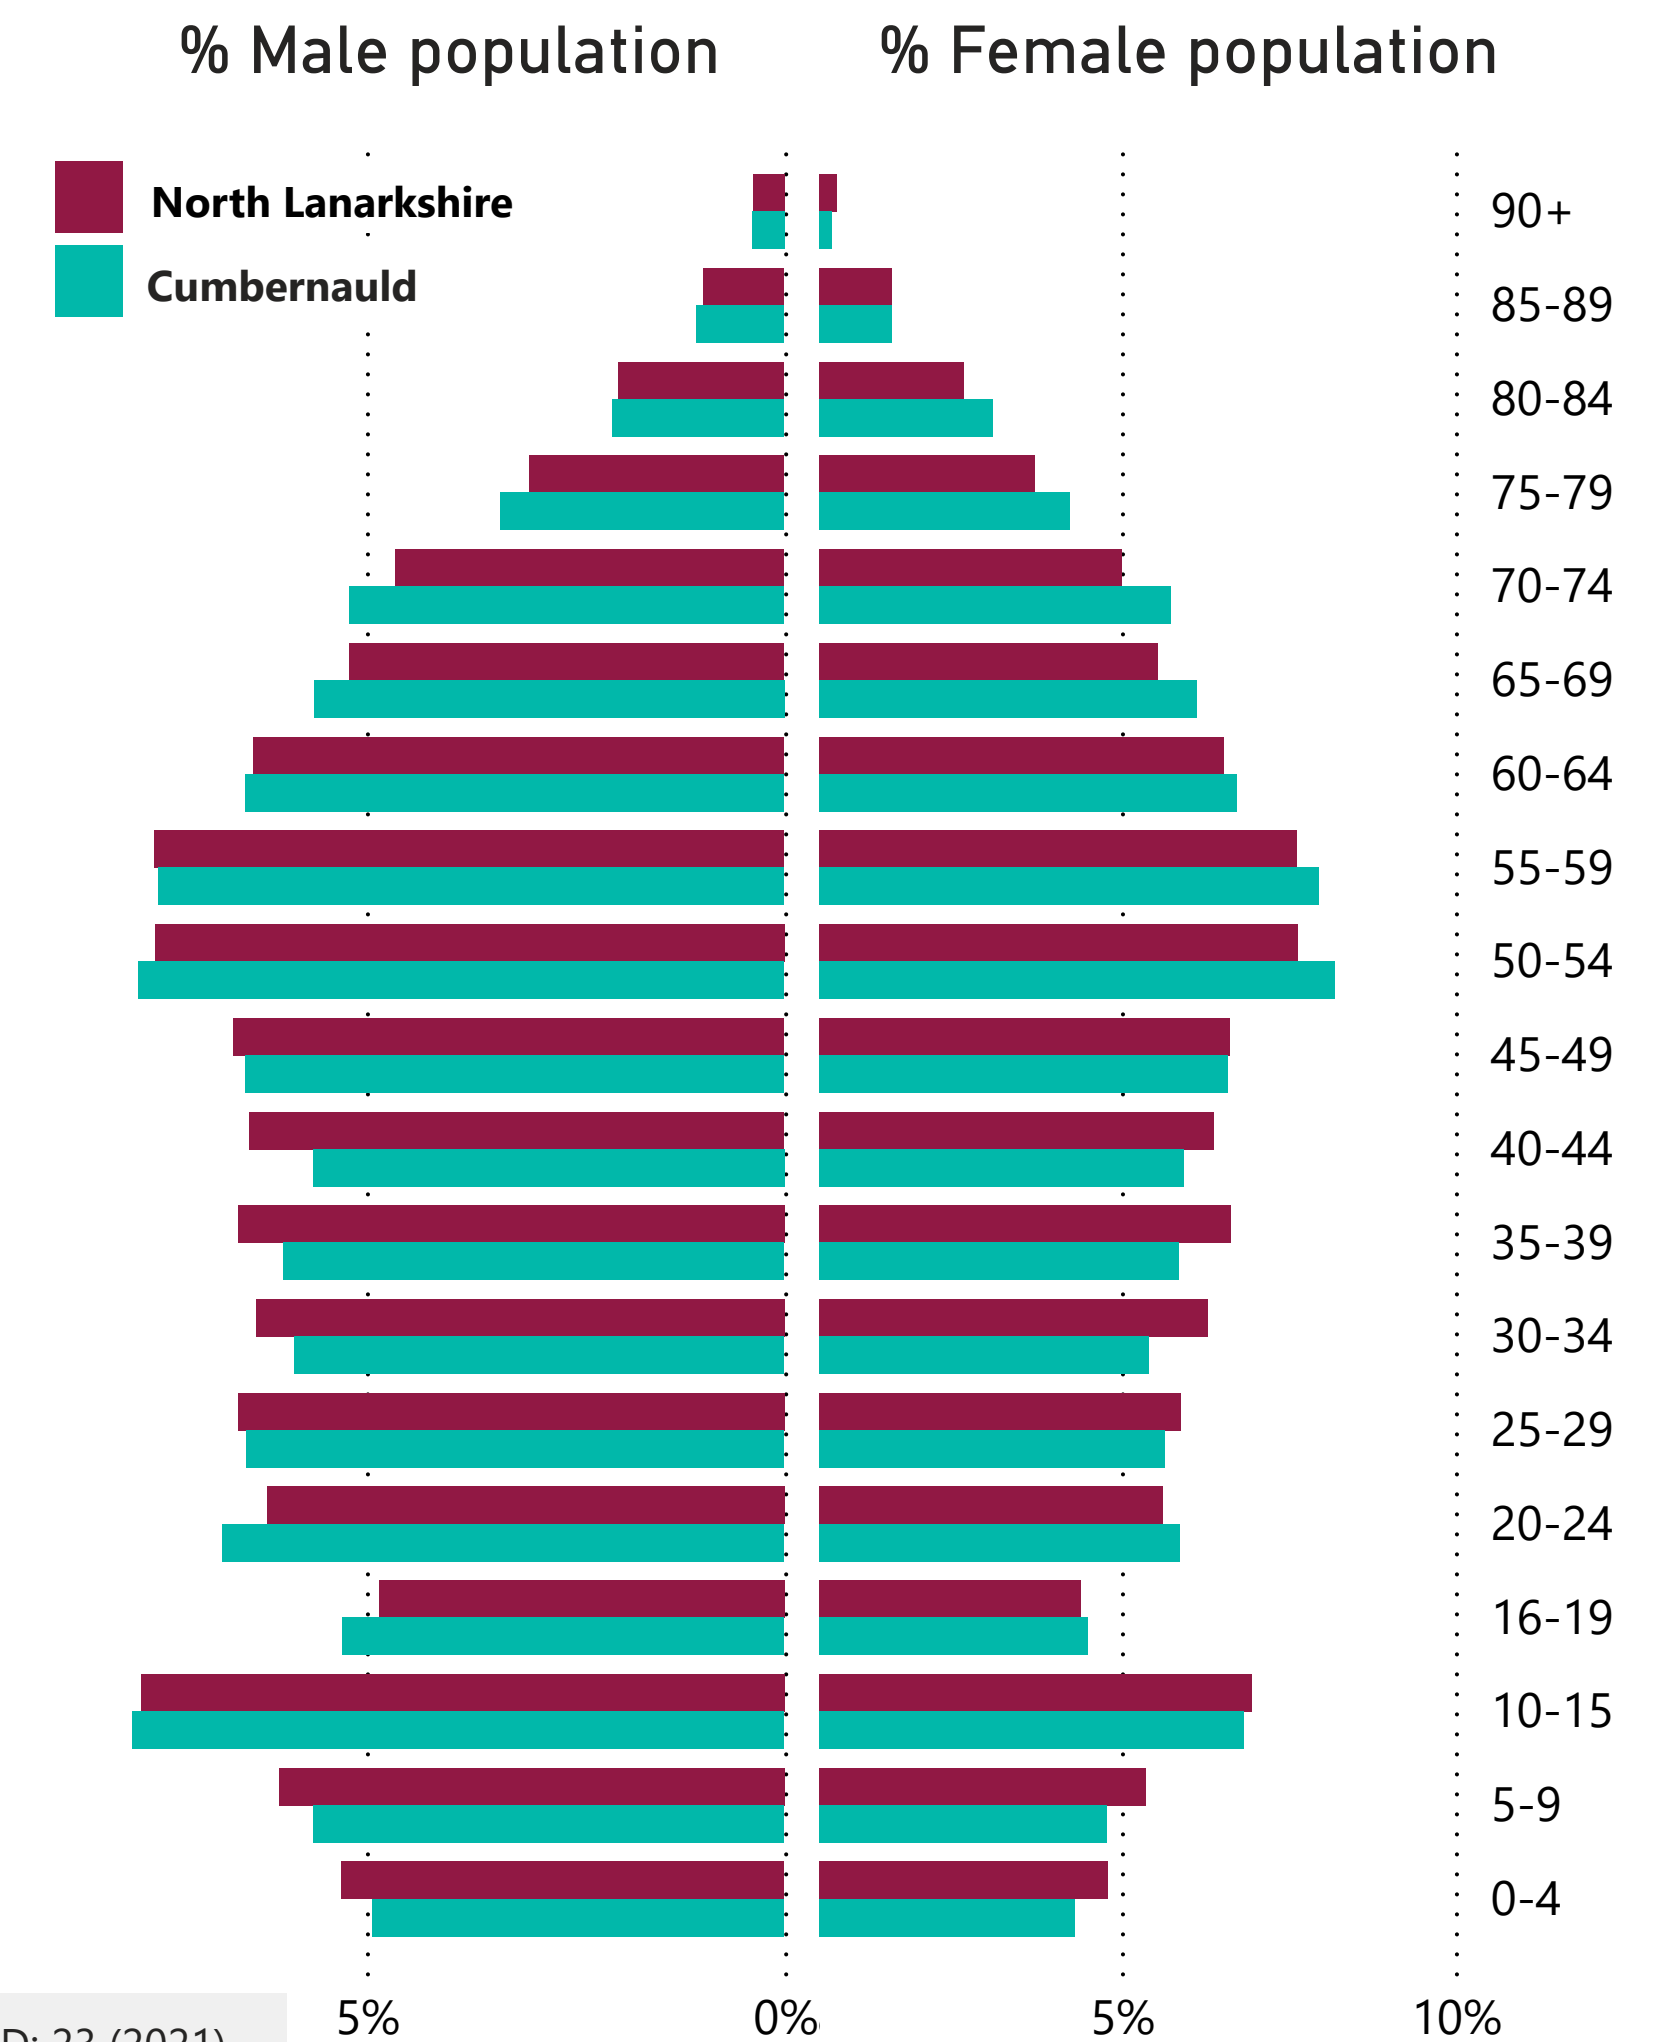

The mid-year population estimates from National Records of Scotland for the year 2021 have the population of Cumbernauld as 49,863.

The majority of females are aged 50-54 (2,122) and the majority of males are aged 10-15 (1,867), with the majority of the population overall being aged 50-54 (3,973).

For North Lanarkshire overall, the majority of females are aged 50-54 (13,464) and the majority of males are aged 10-15 (12,715) with the majority of the population overall being aged 50-54 (25,899).

The working age population (16-64) in Cumbernauld is 31,564 (63.3%). The percentage of working age population in North Lanarkshire overall is 65.3%.

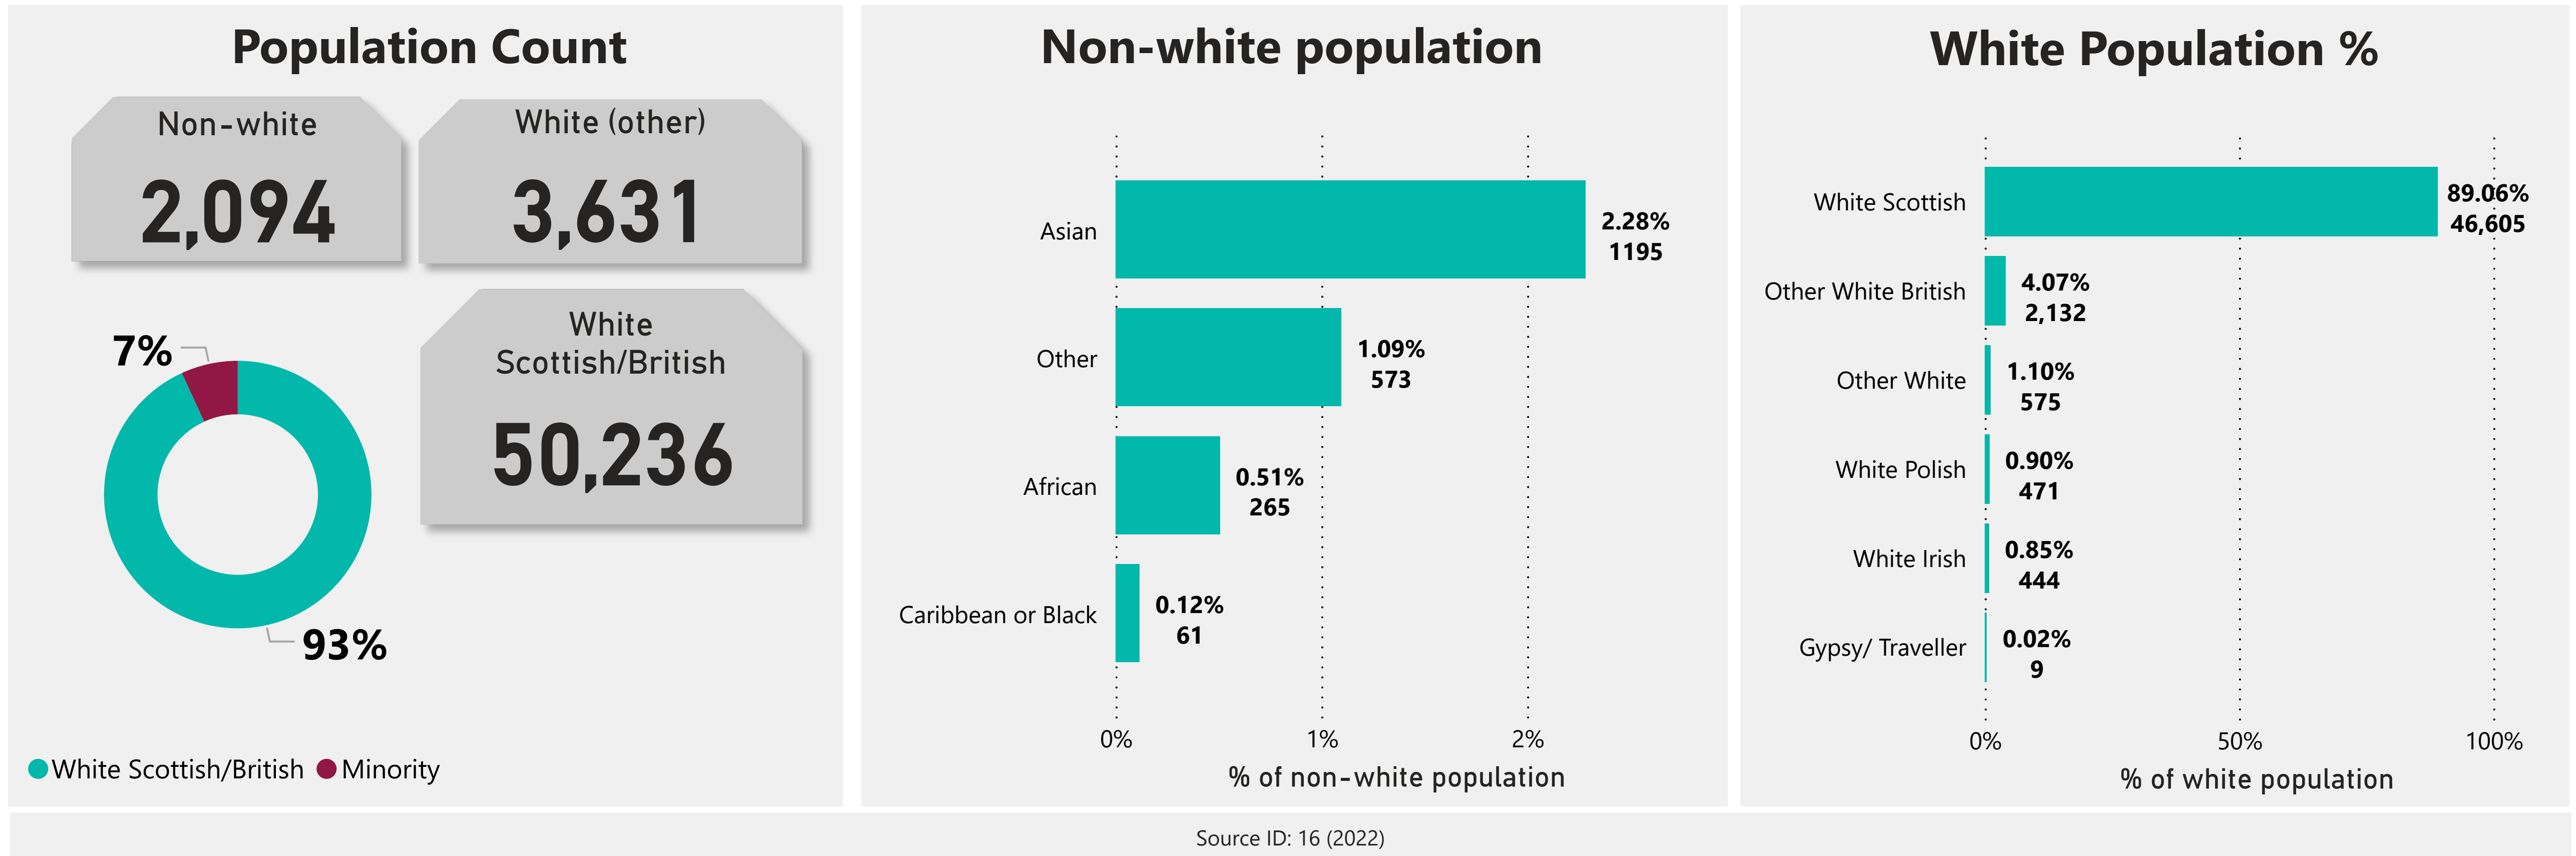

19.6% of Cumbernauld's population (9,785) are 65 or over, compared to the North Lanarkshire percentage of 15.5%.

Source ID: 23 (2021)

Cumbernauld - ethnicity

The infographics below detail the split of the population of Cumbernauld by ethnicity based on the 2022 Scotland Census results.

Based on the latest Census figures from 2022, the population of non-white minority groups is 4% in Cumbernauld (or around 2,094 people). 7% of the white population in Cumbernauld are either white Polish, white Irish, white Gypsy/Traveller or other white nationality (or around 3,631 people).

2.28% of the population (1195) are Asian, 0.51% (265) are African, 0.12% (61) are Caribbean or Black and 1.09% (573) fall into other non-white ethnicities such as Arab, Mixed Race or other ethnicity.

CACI - categories

In September 2024, The Convention of Scottish Local Authorities (COSLA) entered a five-year agreement with data and software company CACI for councils to access its **Paycheck** and **ACORN** data.

Paycheck provides gross household income estimates at postcode level for the UK, while Acorn is a geodemographic and segmentation tool for understanding consumer characteristics.

Category is the broadest level with only 7 segments. As an easy-to-understand view of affluence ranging from the most to least affluent, with rising and comfortable segments in the middle, it is typically used as a snapshot on overall wealth distribution.

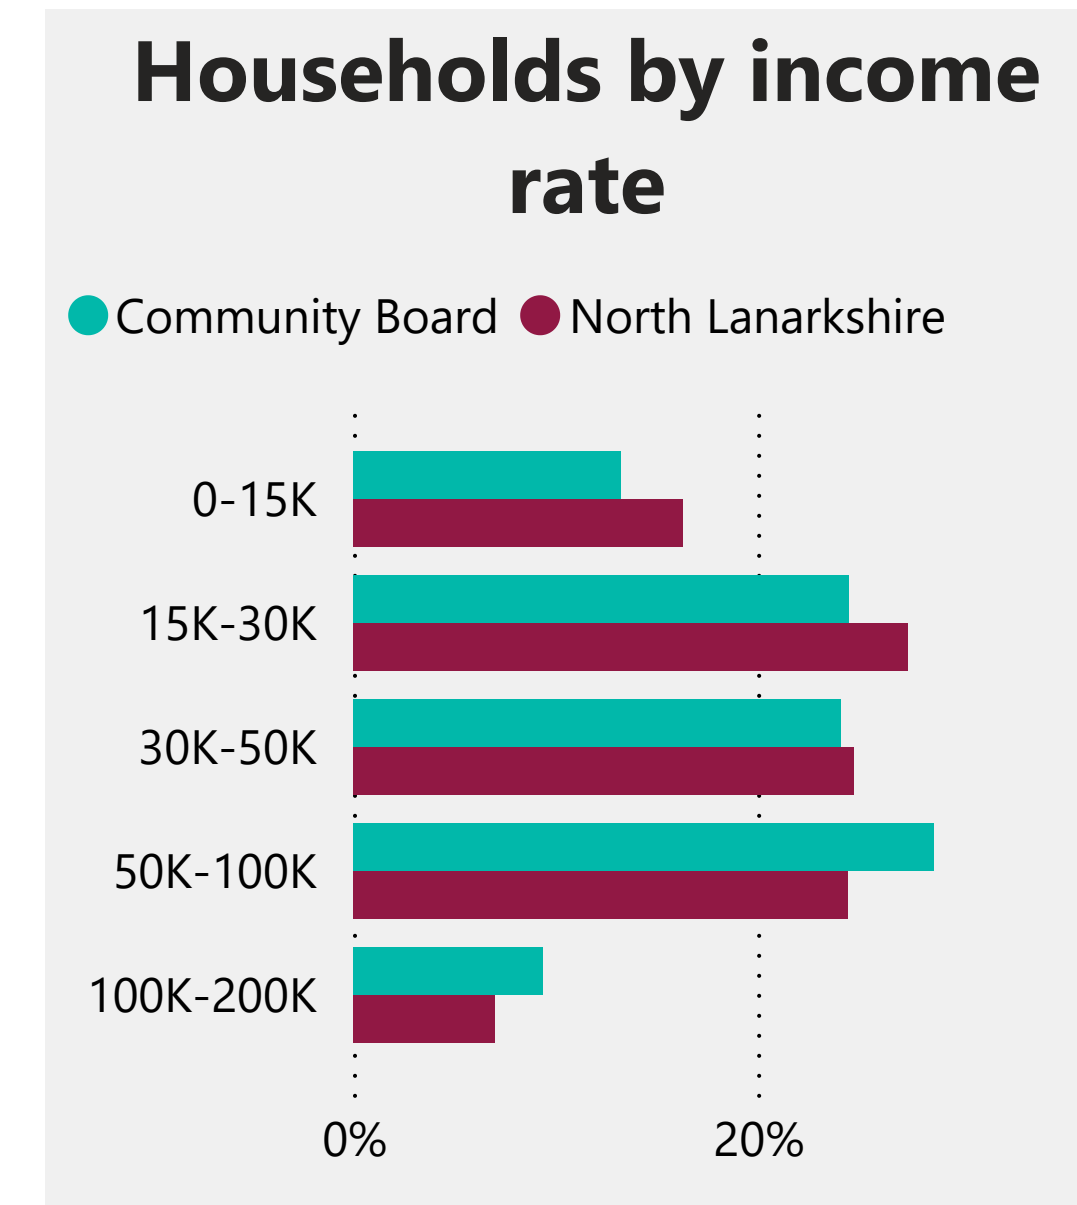

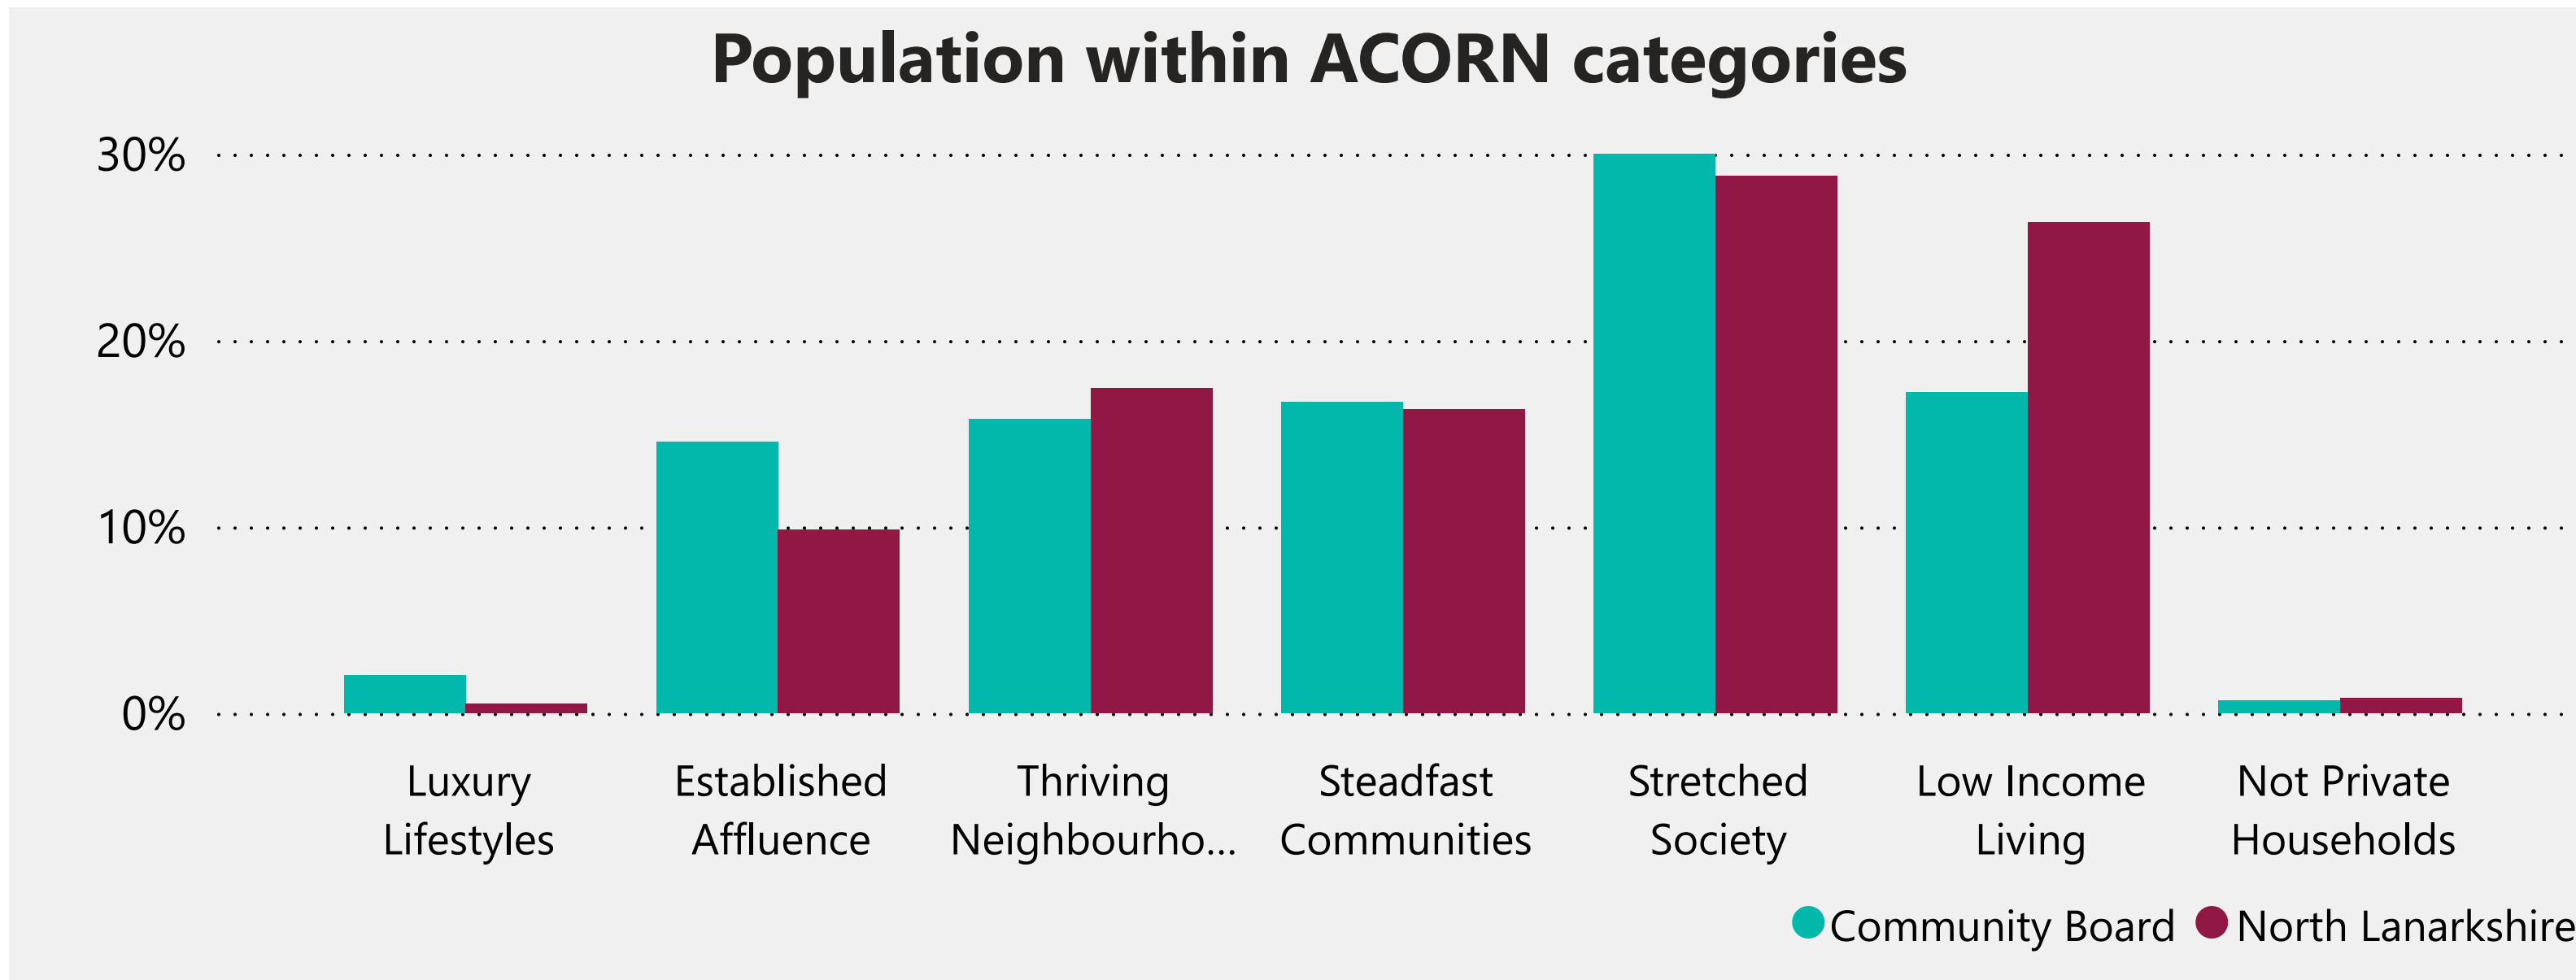

The next level down is **Group**, consisting of 22 different segments. Group level is the most widely used, as it shows enough differentiation in characteristics and behaviours of the Acorn segments while being a manageable number to work with. Group level tends to be the lens through which organisations engage with customers or service users, therefore, it is often used for personalisation strategies, product and proposition development and catchment analysis and mapping.

The lowest level is **Type**, which contains 65 segments and is seen as the most granular Acorn view.

Category	Group	Type
Luxury Lifestyles	A	Exclusive Addresses
	B	Flourishing Capital

Cumbernauld - CACI profiling data

This dashboard provides an overview of Cumbernauld's demographic and economic profile, including household income distribution, average income and population segmentation by ACORN lifestyle categories.

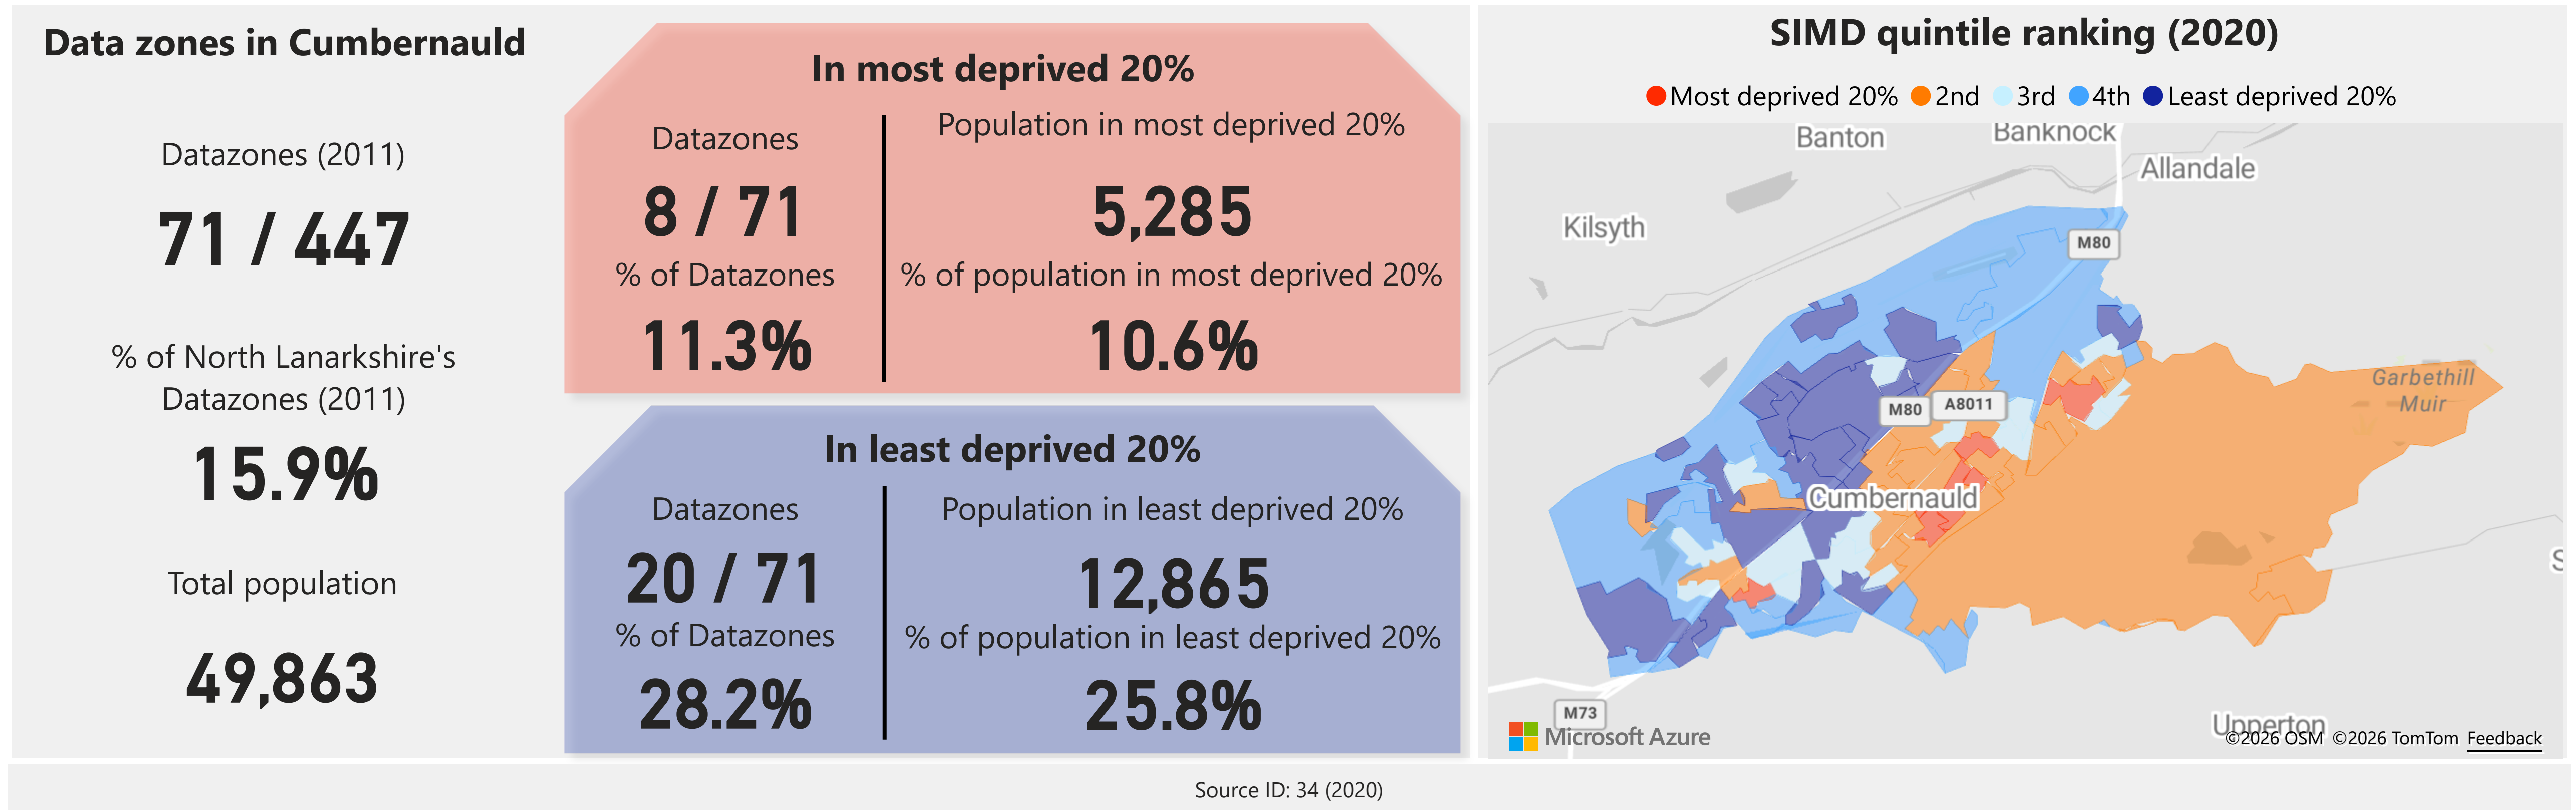

Average income per household

£44.9K

ID	Name	Description	Dominant Housing Type	Saving and Investments
1	Luxury Lifestyles	The most affluent people in Britain, confident consumers with high levels of savings and investments, living in the most expensive properties.	Detached or apartments	Very high
2	Established Affluence	Wealthy and successful people living in large houses which they own in affluent, high status areas of the country.	Detached	High
3	Thriving Neighbourhoods	Comfortable, stable families and empty nesters who have a good standard of living, on an income above the UK average.	Semi or detached	Average
4	Steadfast Communities	This category contains much of middle of the road Britain with working families on incomes just below the UK average.	Semi detached	Below average
5	Stretched Society	Traditional working class areas of Britain containing younger families, flat sharers and students privately renting their homes.	Terraced	Low
6	Low Income Living	This category contains the most deprived areas of towns and cities across the UK, with the lowest incomes. It contains a higher proportion of single people across the age groups, socially renting their flats.	Flats	Very low
7	Not Private Households	These are postcodes where the bulk of the residents are not living in private households.		

Cumbernauld - Scottish Index of Multiple Deprivation (SIMD)

The infographics below show the distribution of data zones and their population and level of deprivation within Cumbernauld.

The **Scottish Index of Multiple Deprivation (SIMD)** is a tool used to measure relative deprivation across Scotland. The SIMD is formed from more than 30 indicators of deprivation which have been grouped together into seven domains. The seven domains are combined to form a rank for each of the 6,976 data zones across Scotland, where rank 1 is the most deprived community and 6,976 is the least deprived.

On the basis of the latest Scottish census outcomes, the data zones were updated in 2025. There are 15 Intermediate Zones (2022) and 74 data zones (2022) within Cumbernauld, however new SIMD data is not yet published.

This [interactive tool](#) allows you to look at each data zone across Scotland and North Lanarkshire to see the overall ranking and ranking in each of the seven domains.

Cumbernauld - household and housing estimates

This dashboard outlines key housing statistics for Cumbernauld, including dwelling counts, occupancy rates and single-adult household figures. It also shows how these households are distributed across wards and Council Tax bands.

Cumbernauld North	7,737	2,173	28.1%

Council tax bands (NRS)

Source ID: 12 (2024)

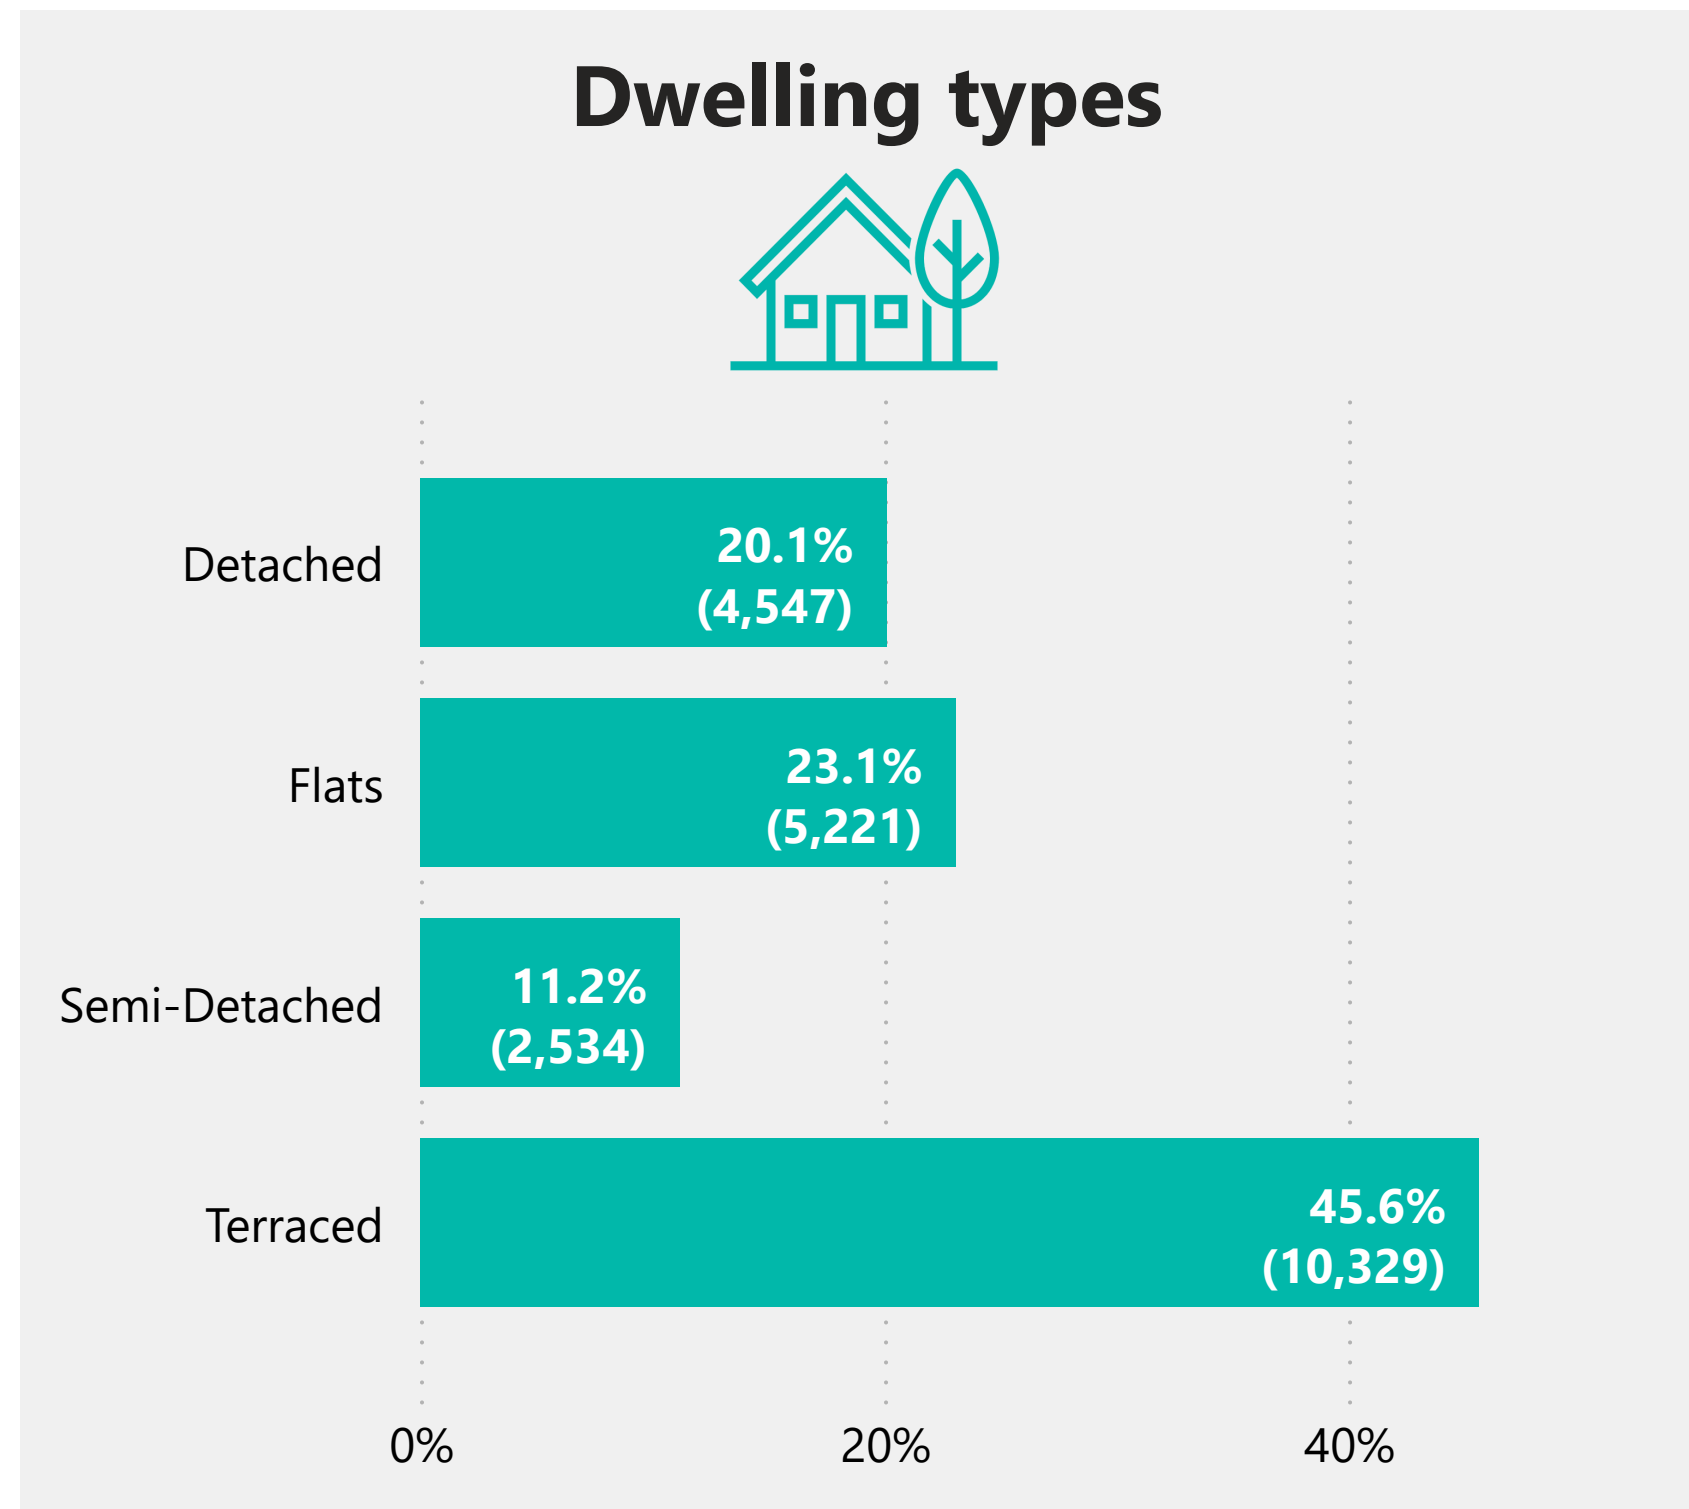

Cumbernauld holds a total of 24,140 dwellings, representing 15.0% of all dwellings in North Lanarkshire.

38.5% of Cumbernauld's dwellings are single-adults households (dwellings where a single-adult council tax discount applies). Most single-adult households are located in the Cumbernauld East ward (47.8%).

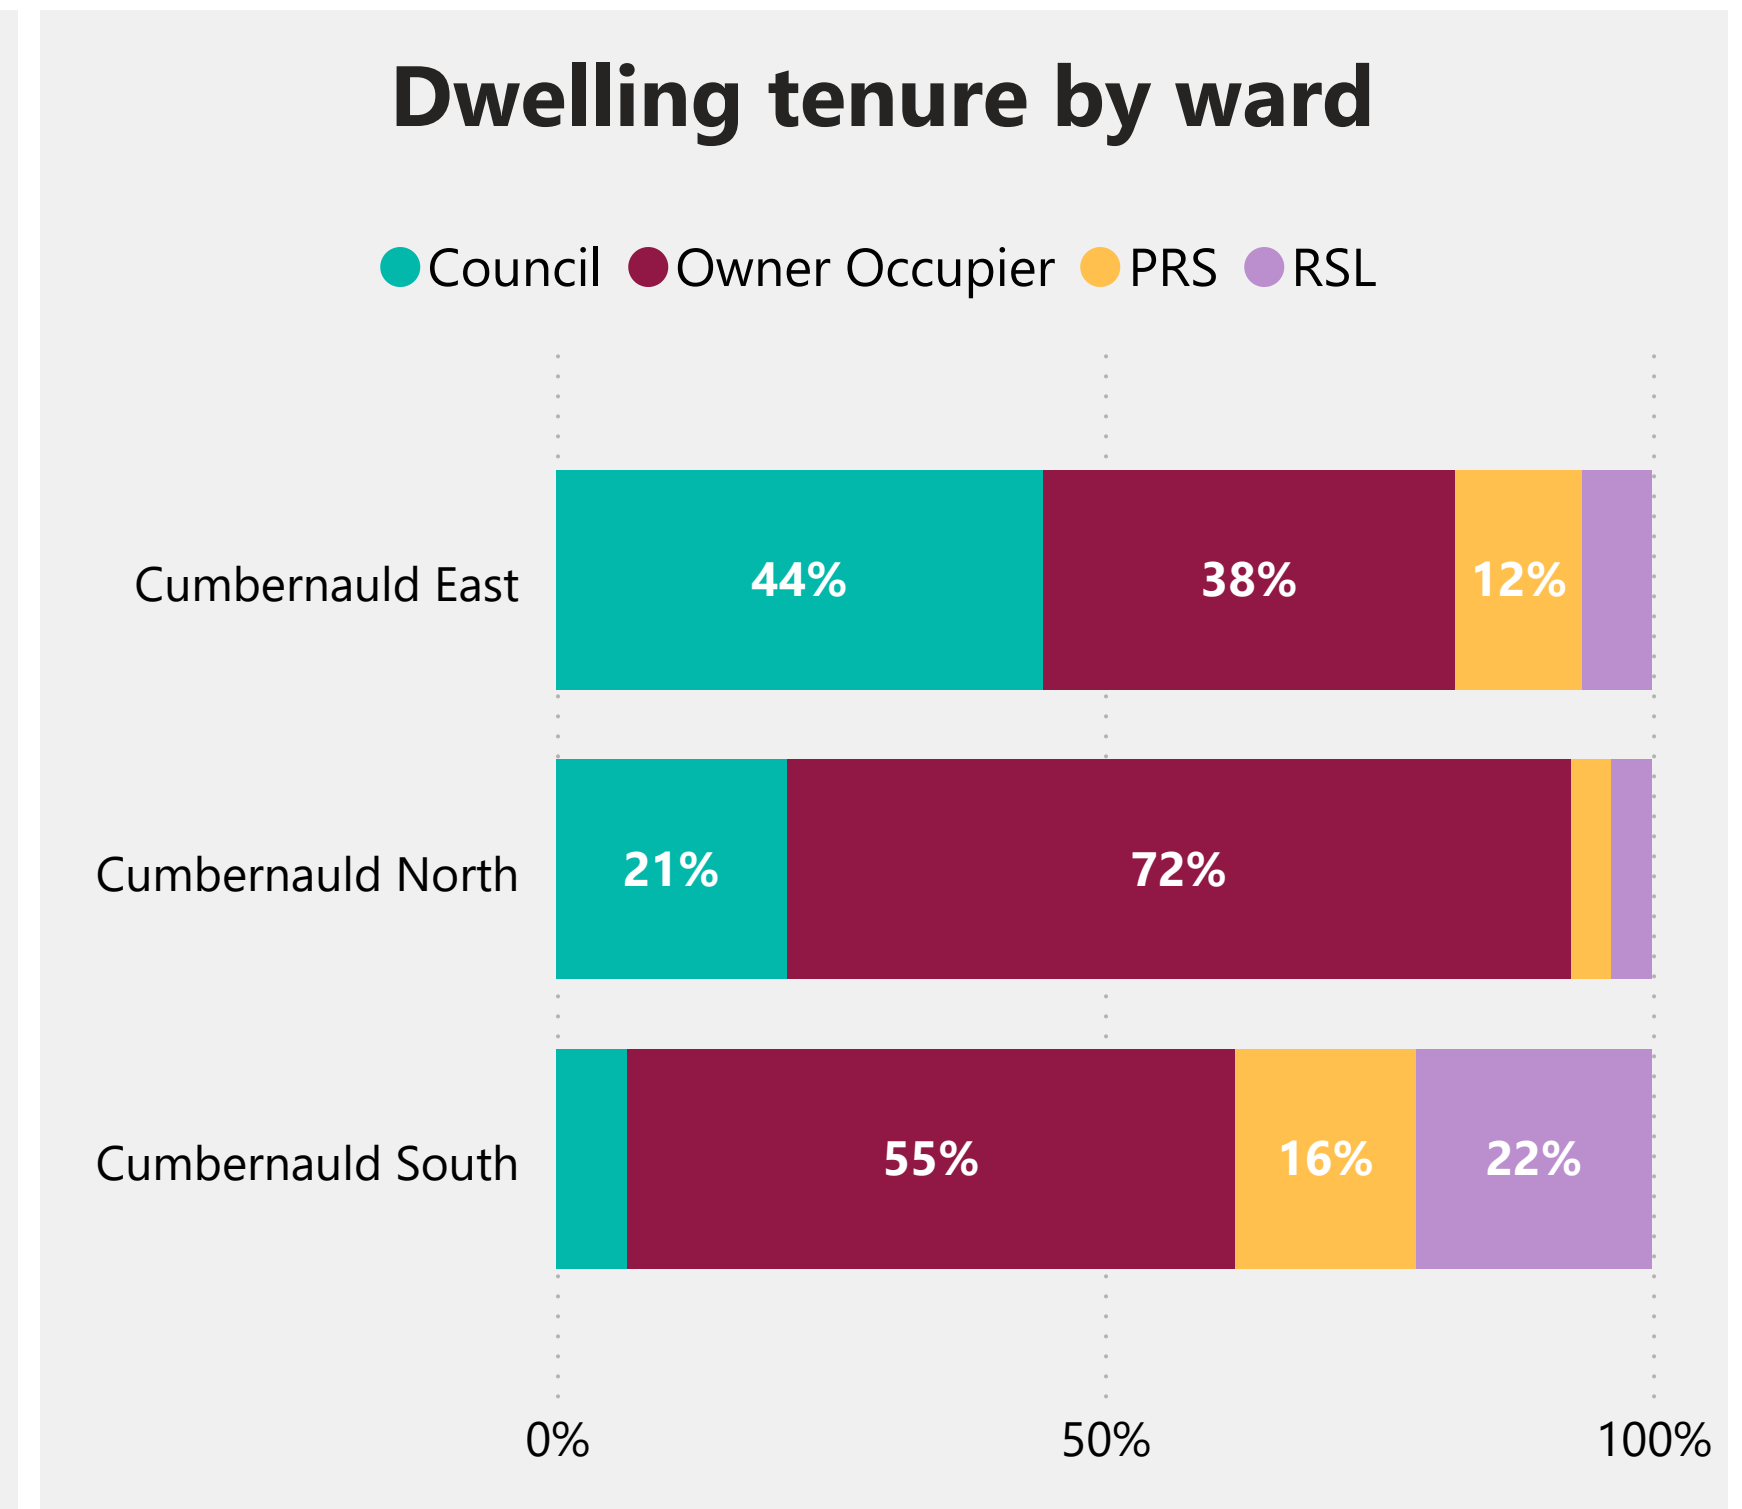

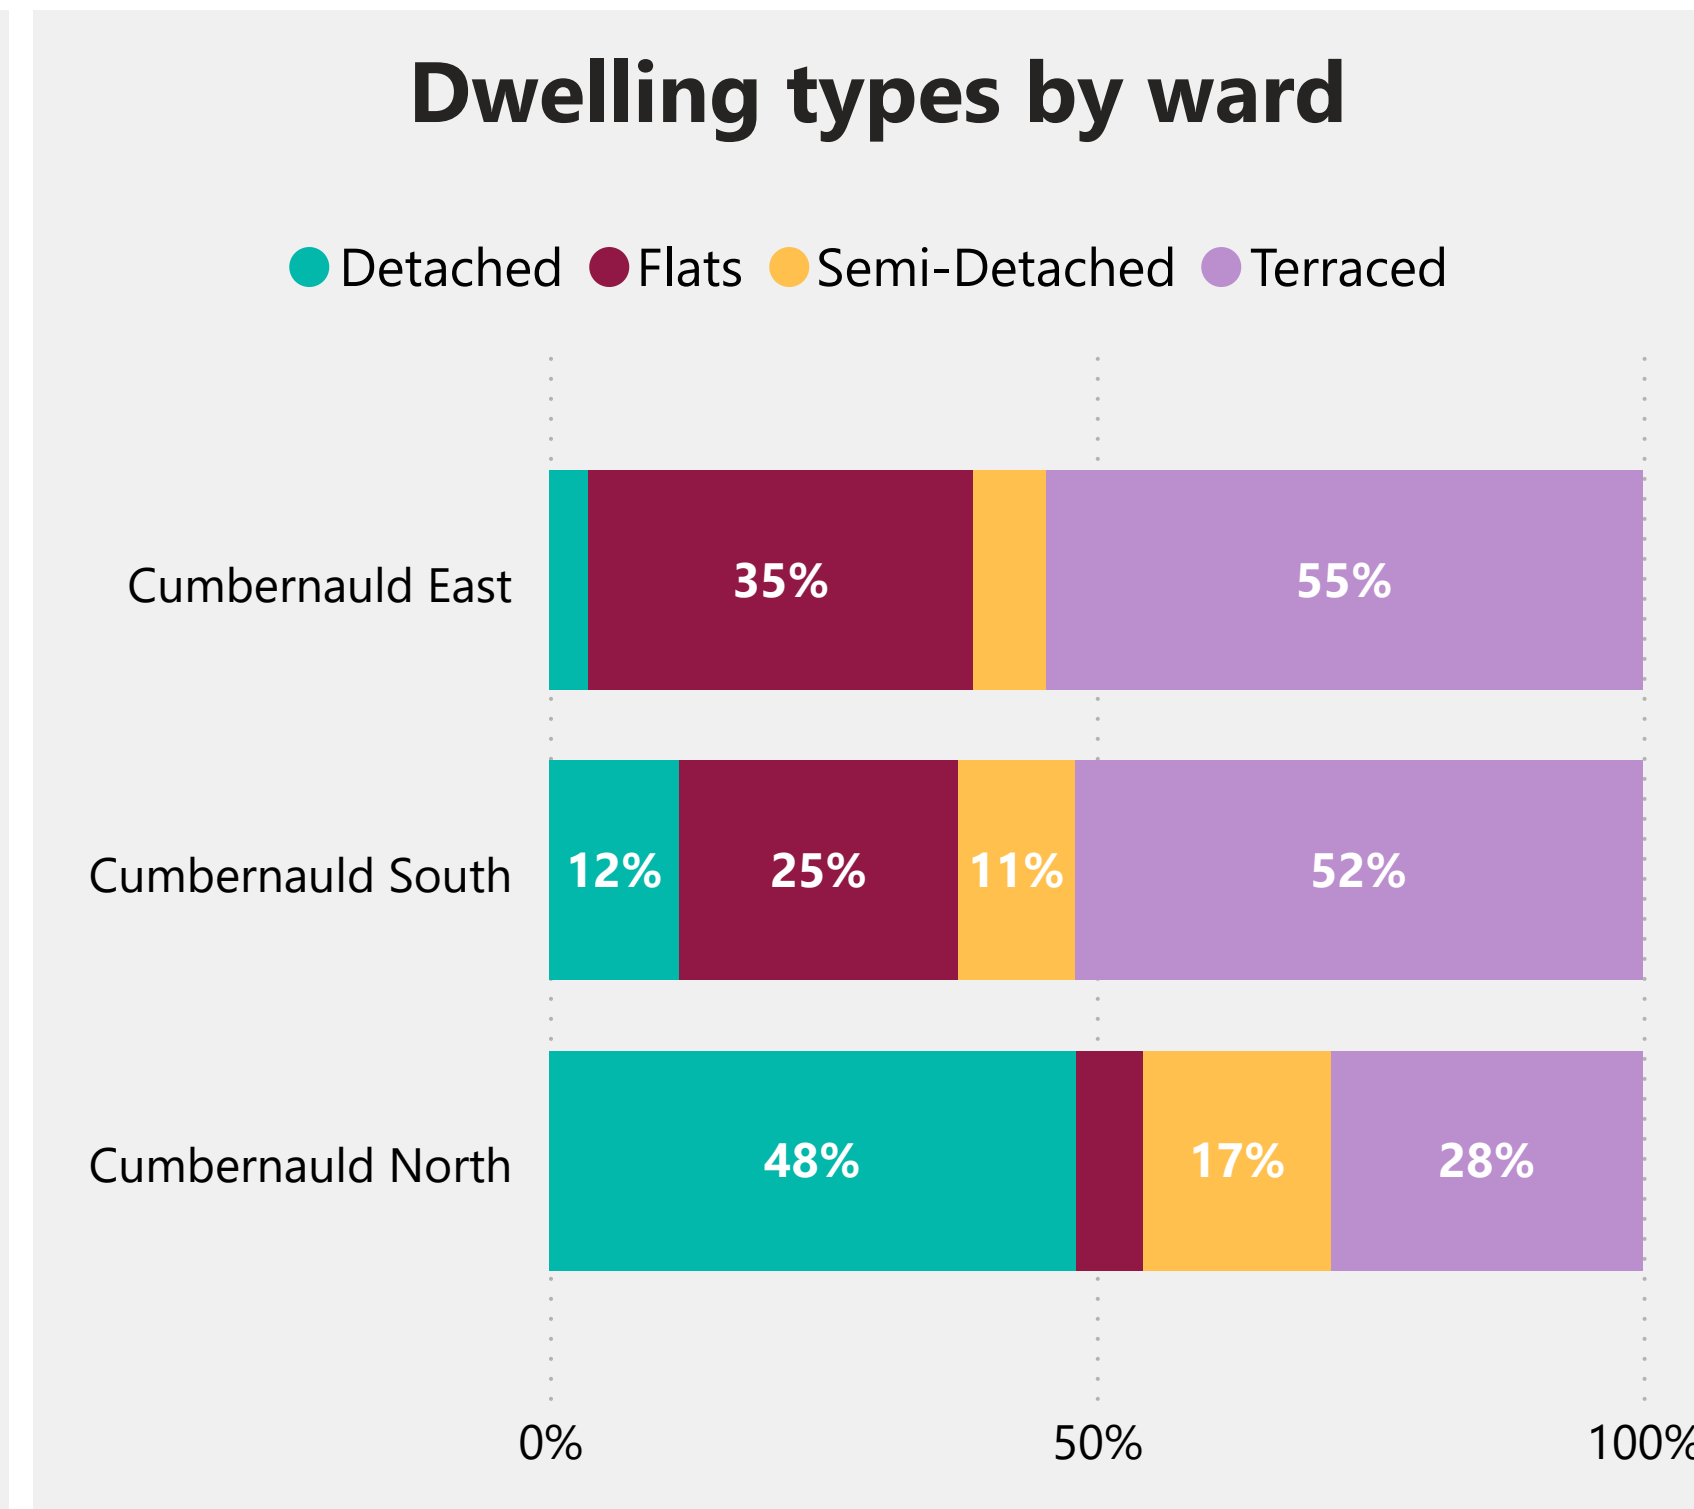

The dominant council tax band in the Cumbernauld Community Board area is Band: B (42.4%).

Cumbernauld - dwelling characteristics

This dashboard provides an overview of dwelling characteristics in Cumbernauld, breaking down dwelling types and tenure by ward.

Source ID: 20 (2022)

Source ID: 35 (2024/25)

In the Cumbernauld community board area, terraced homes are the most common dwelling type, making up 45.7% of all dwellings. Semi-detached homes are the least common, accounting for just 11.2%. Other dwelling types include detached (20.1%) and flats (23.0%), showing a varied housing mix across the community.

Across the Cumbernauld Community Board area, Owner Occupier is the dominant tenure type. Owner occupation ranges from 37.6% in Cumbernauld East to 71.5% in Cumbernauld North.

PRS - Private Rented Sector, **RSL** - Registered Social Landlord

Cumbernauld - economy and employment

Employment and Support Allowance claimants as a proportion of adults (age 16+)

Source ID: 7 (2025)

Source ID: 15 (2025)

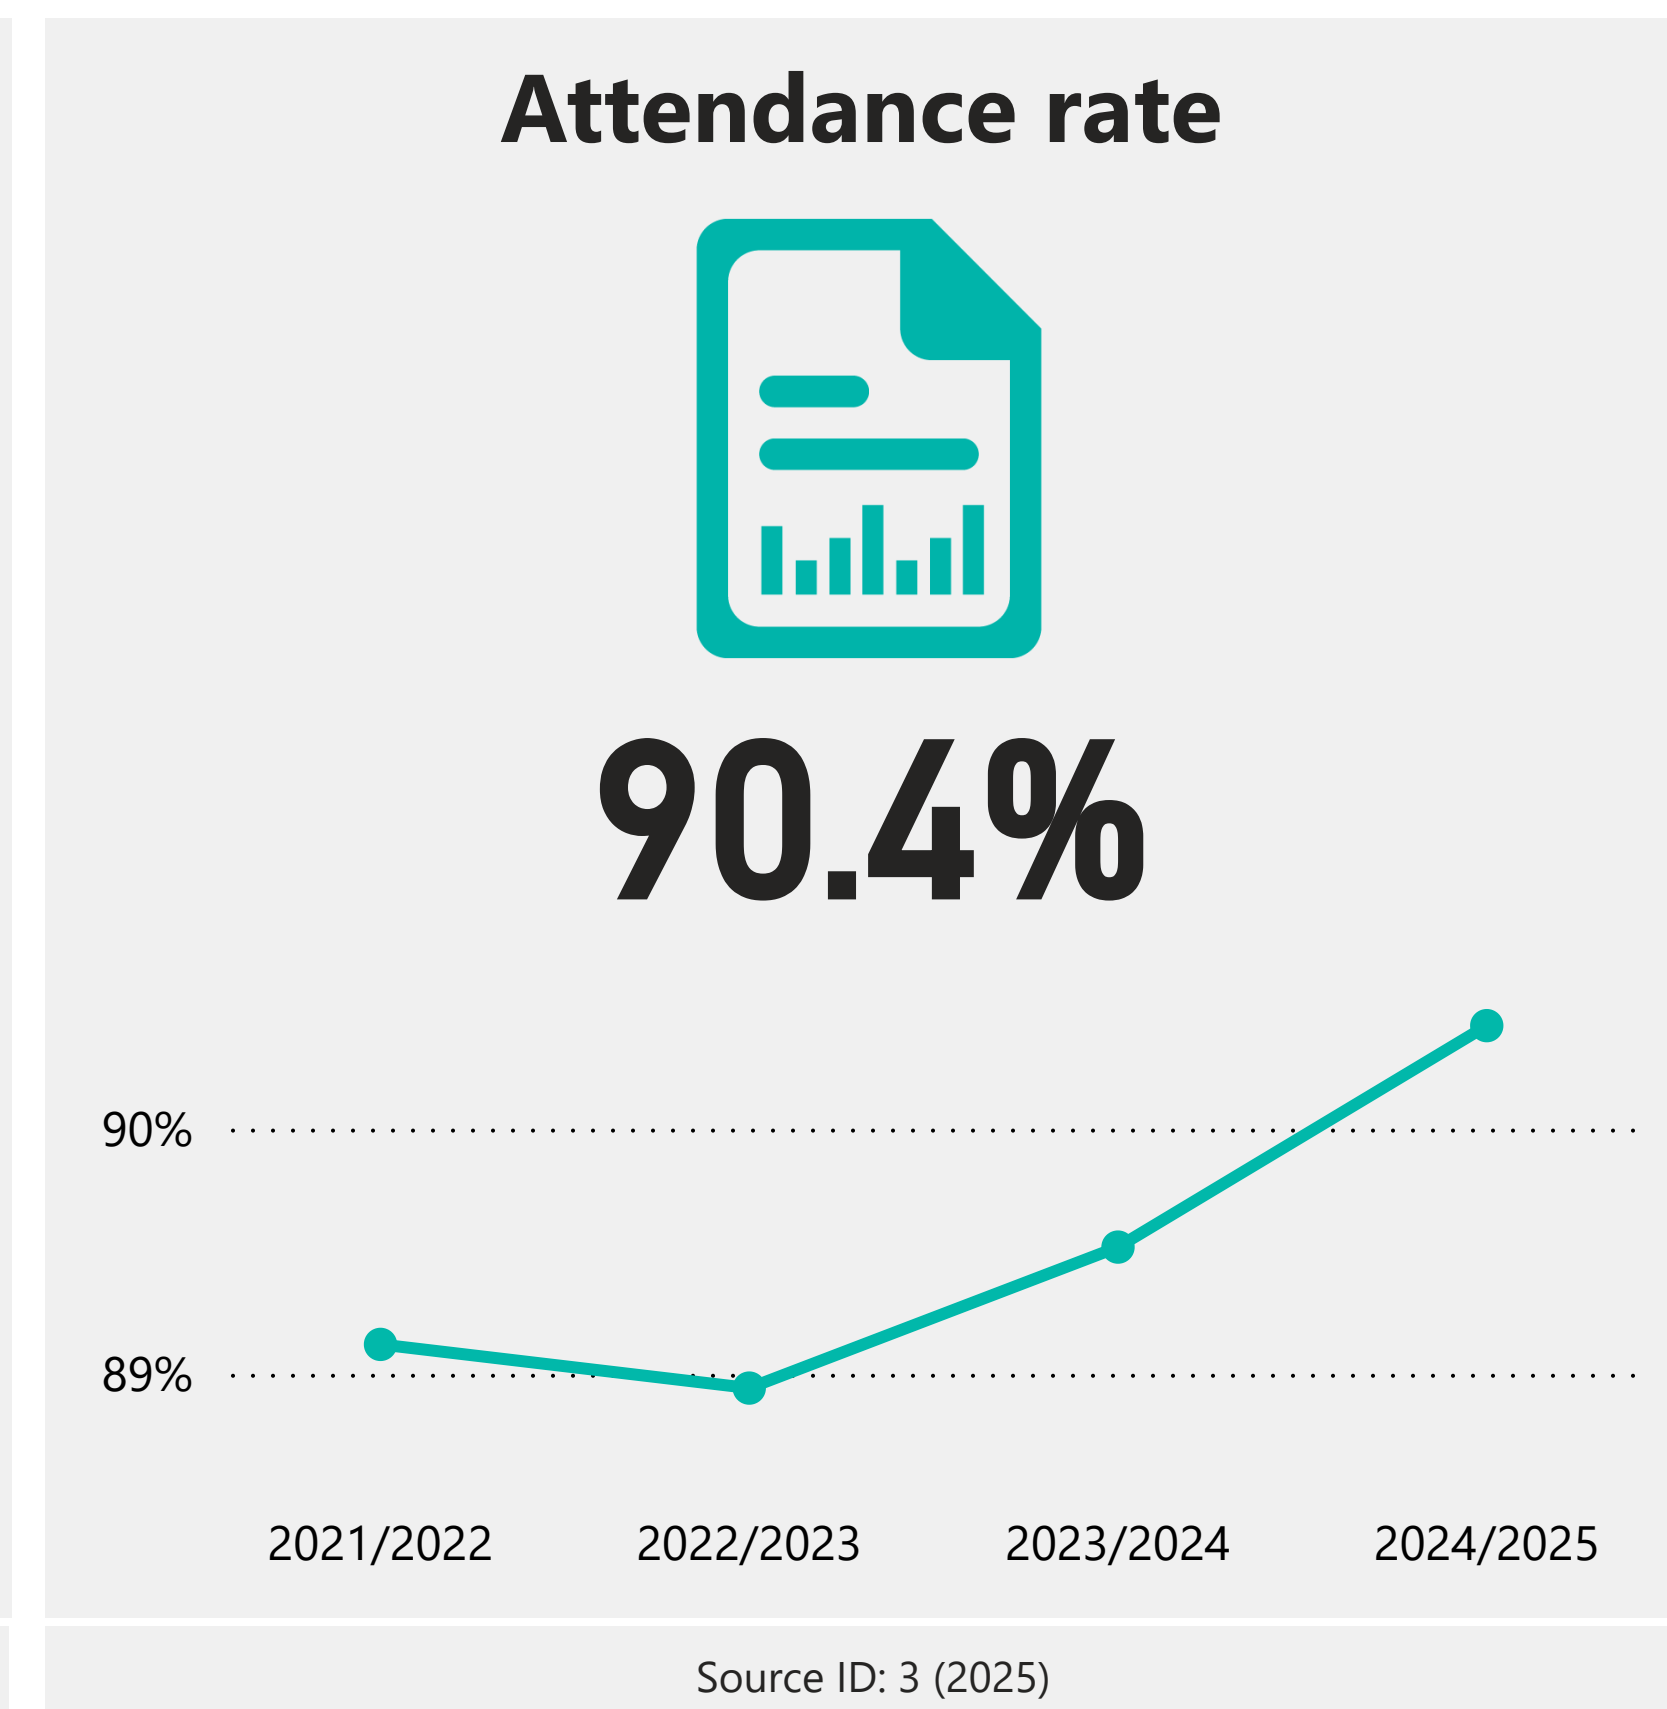

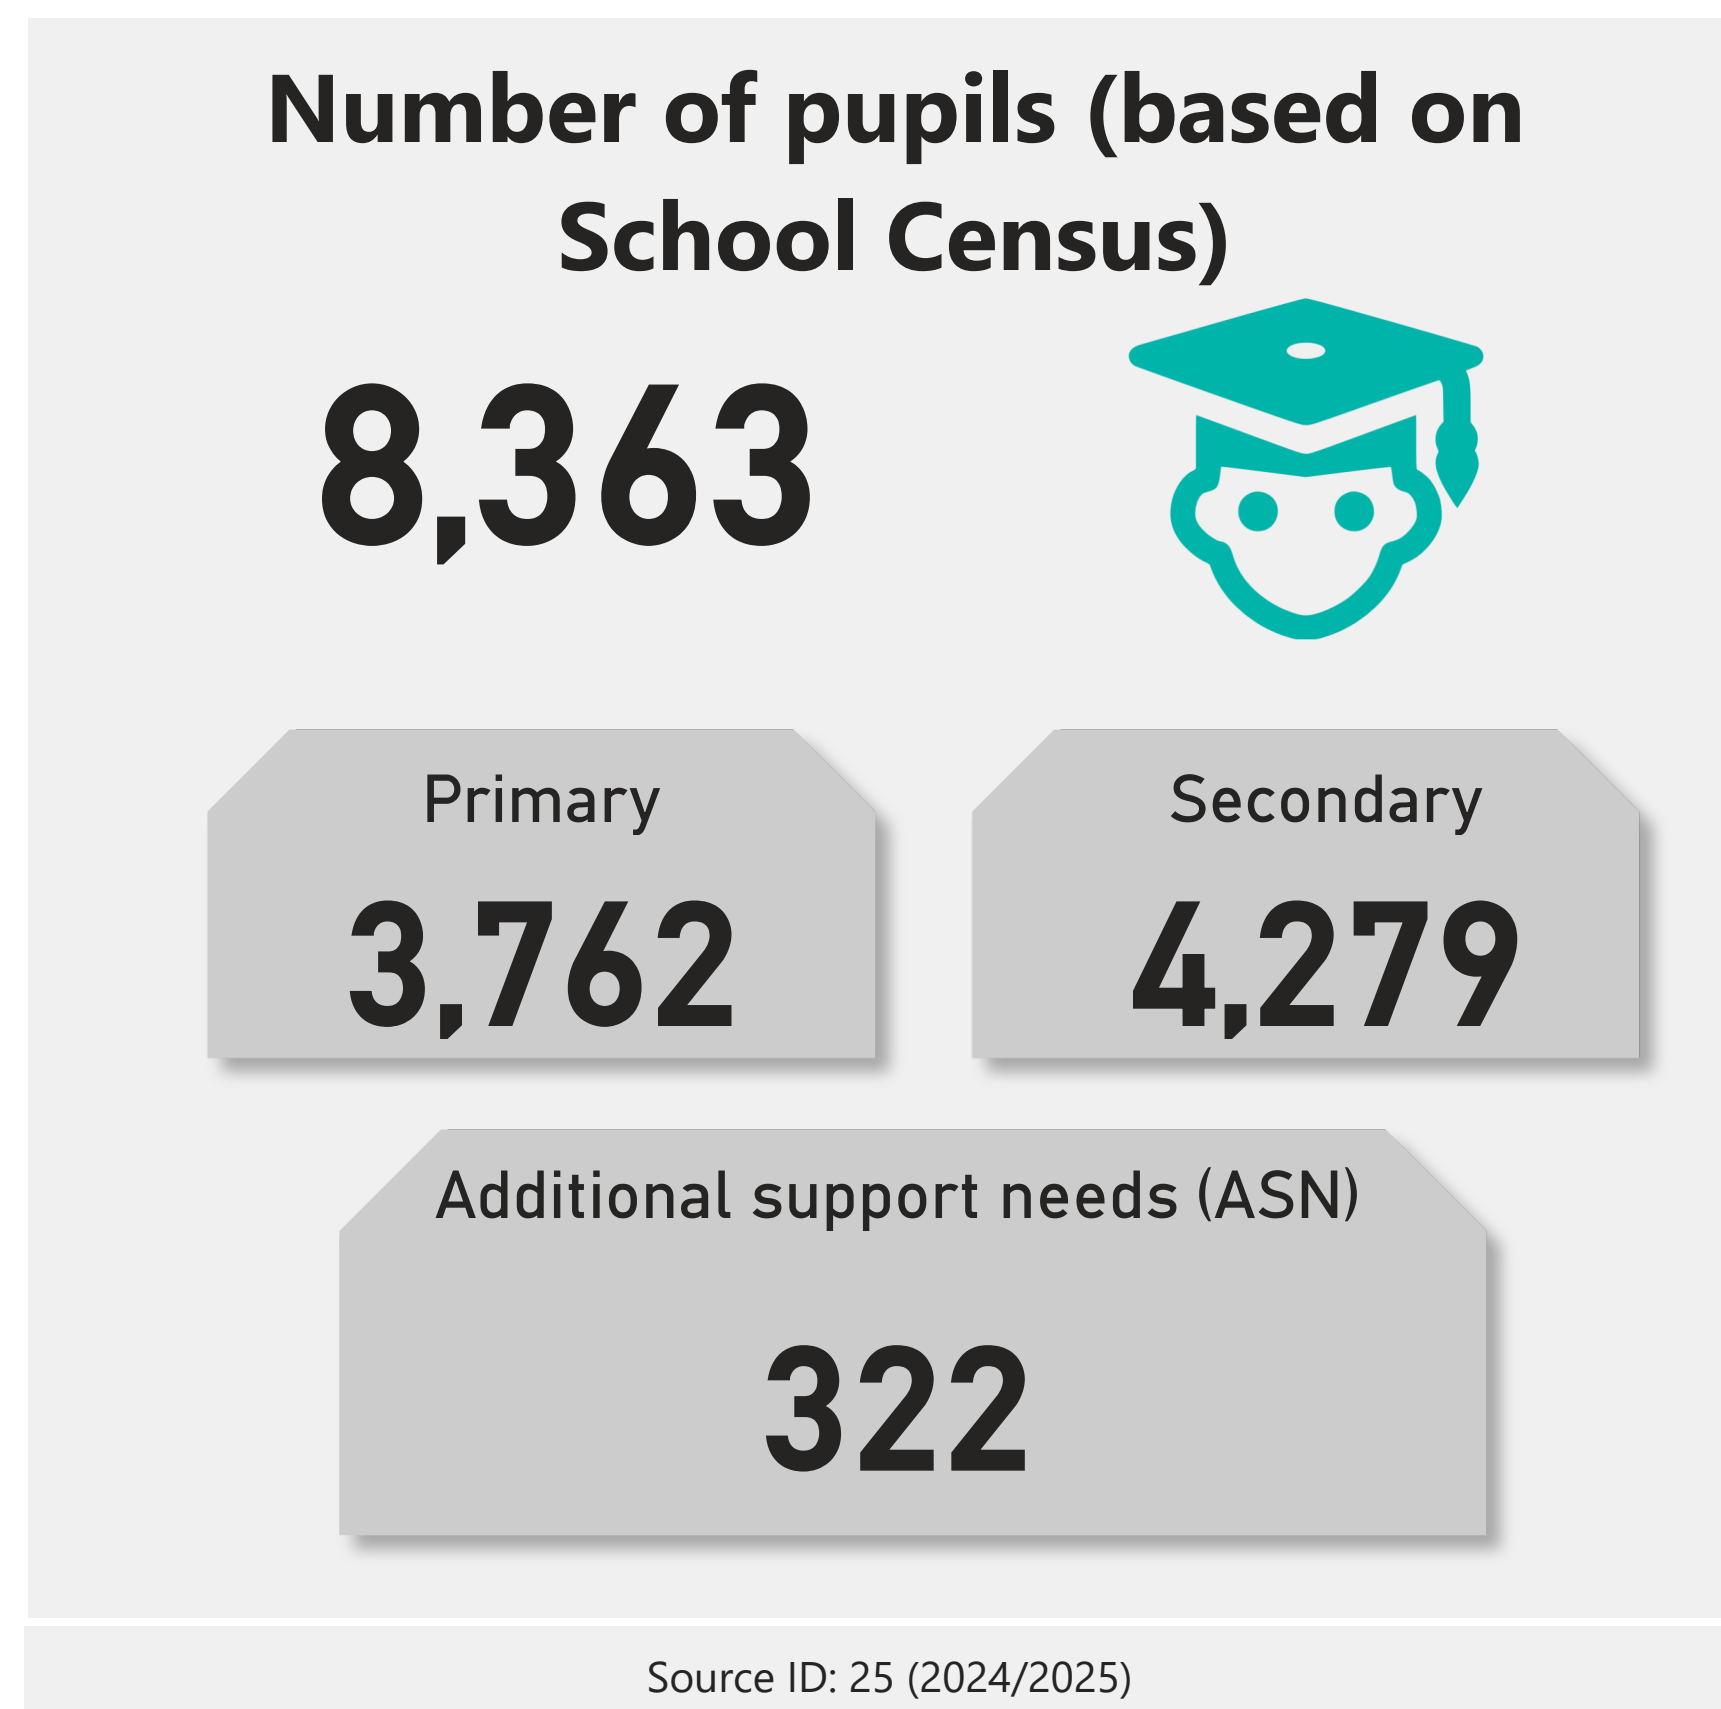

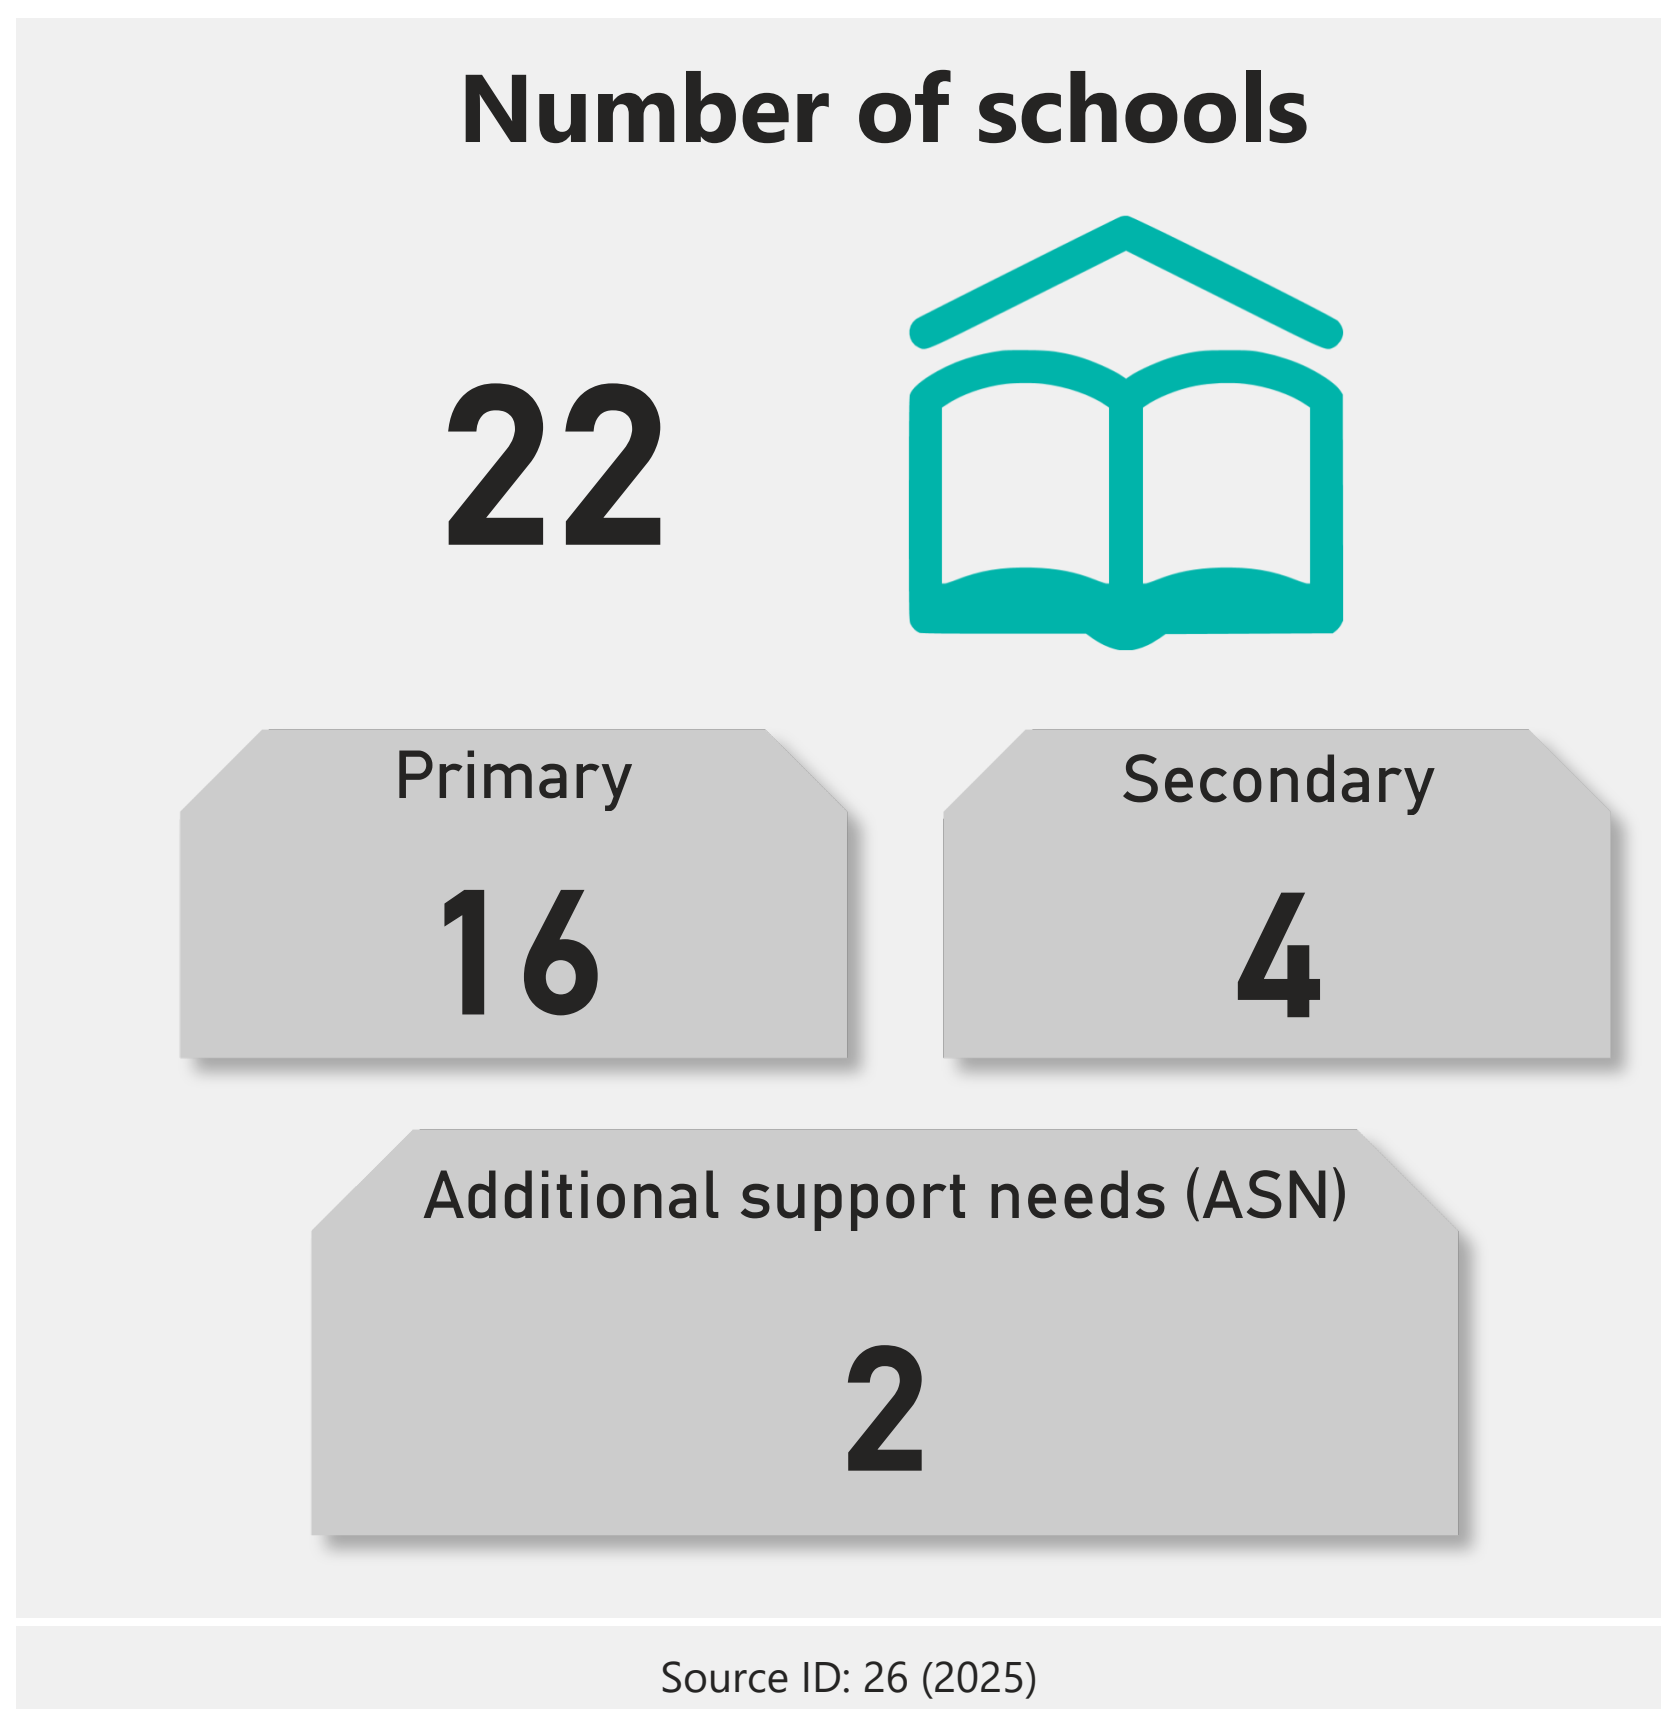

In Cumbernauld, the number of people claiming Job Seeker Allowance and Universal Credit combined in 2025 is 840. This equates to 2.7% of adults aged 16 and over in the area. Employment and Support Allowance claimants sit at 1,099 as of August 2025. This is 2.7% of adults aged 16 and over.

In May 2024, the Department for Work and Pensions increased the administrative earnings threshold for job seeking requirements. This change affected around 180,000 claimants UK wide, increasing the Claimant Count at the time of the change. This policy change, along with two previous increases to the administrative earnings threshold in September 2022 and January 2023, represent discontinuities in the Claimant Count series.

Rates for local authorities from 2023 onwards are calculated using the UK mid-2023 resident population aged 16-64 (except Northern Ireland).

Cumbernauld - education

The infographics below detail the number of schools, the number of pupils (based on annual School Census) and the attendance rate for Cumbernauld.

Cumbernauld has 22 schools in total in the area, of which 16 are primary schools, 4 are secondary schools and 2 are Additional Support Needs schools. As of 2025/2026, there are 8,363 pupils registered in Cumbernauld schools, of which 3,762 attend primary schools, 4,279 attend secondary schools, 322 attend Additional Support Needs schools based in the area. For Cumbernauld overall, this is an increase of 38 pupils registered in all schools compared to 2024/2025.

The attendance rate for Cumbernauld schools overall is 90.4% as of 2024/2025. This is an improvement of 0.9% compared to 2023/2024.

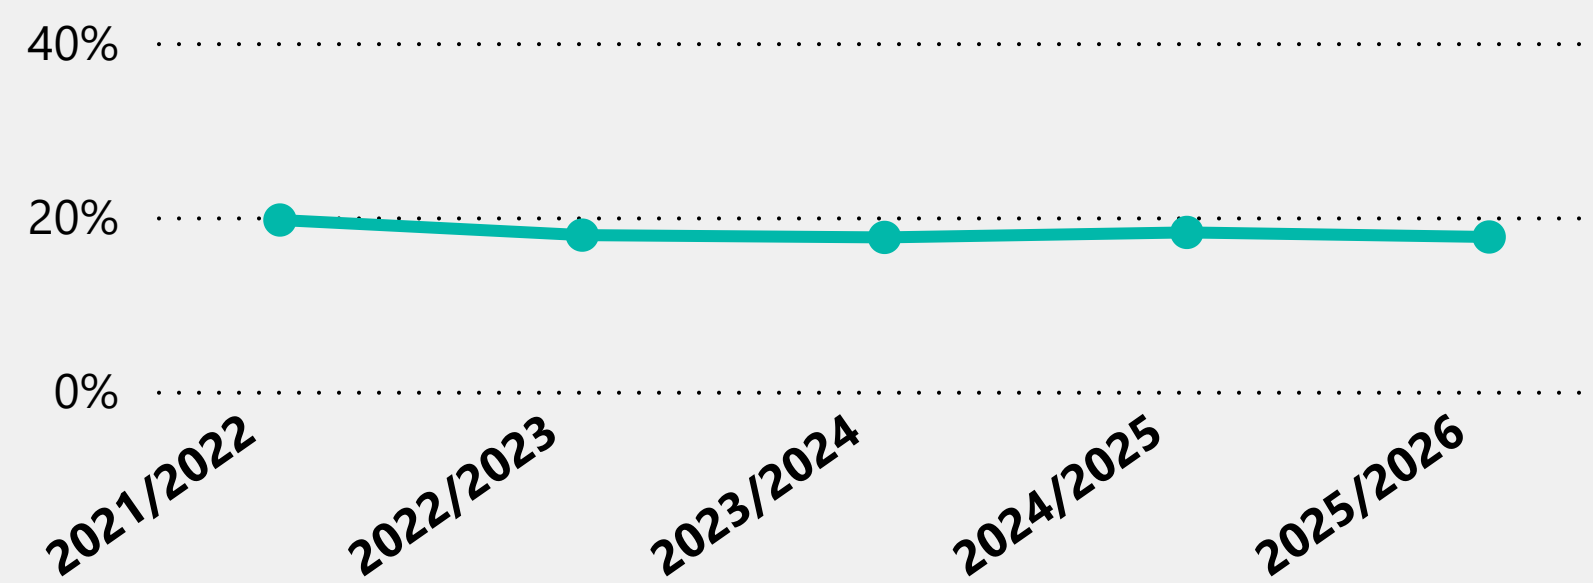

Cumbernauld - free school meals

The infographics below show the number of pupils who have applied, and are eligible for, means-tested free school meals in Cumbernauld. The figures also include pupils who have applied for clothing grants but have also been assessed as eligible for free school meals by the council's benefits team.

Source ID: 17 (2025)

There are currently 1,489 pupils eligible via the means-tested criteria for free school meals in the Cumbernauld, which is 17.6% of pupils. This does not include pupils automatically eligible through P1-P5 and ASN universal provision. Specifically, of the 1,489 pupils, 750 attend primary schools and 651 attend secondary schools, with 88 pupils attending additional support needs schools.

*figures based on SEEMIS school roll, which is subject to change as and when new pupils enroll

Cumbernauld - child poverty

The infographics below detail measures relating to children and young people living in poverty in Cumbernauld, using statistics of children living in relative low income families and the number of young people living in the most income deprived areas.

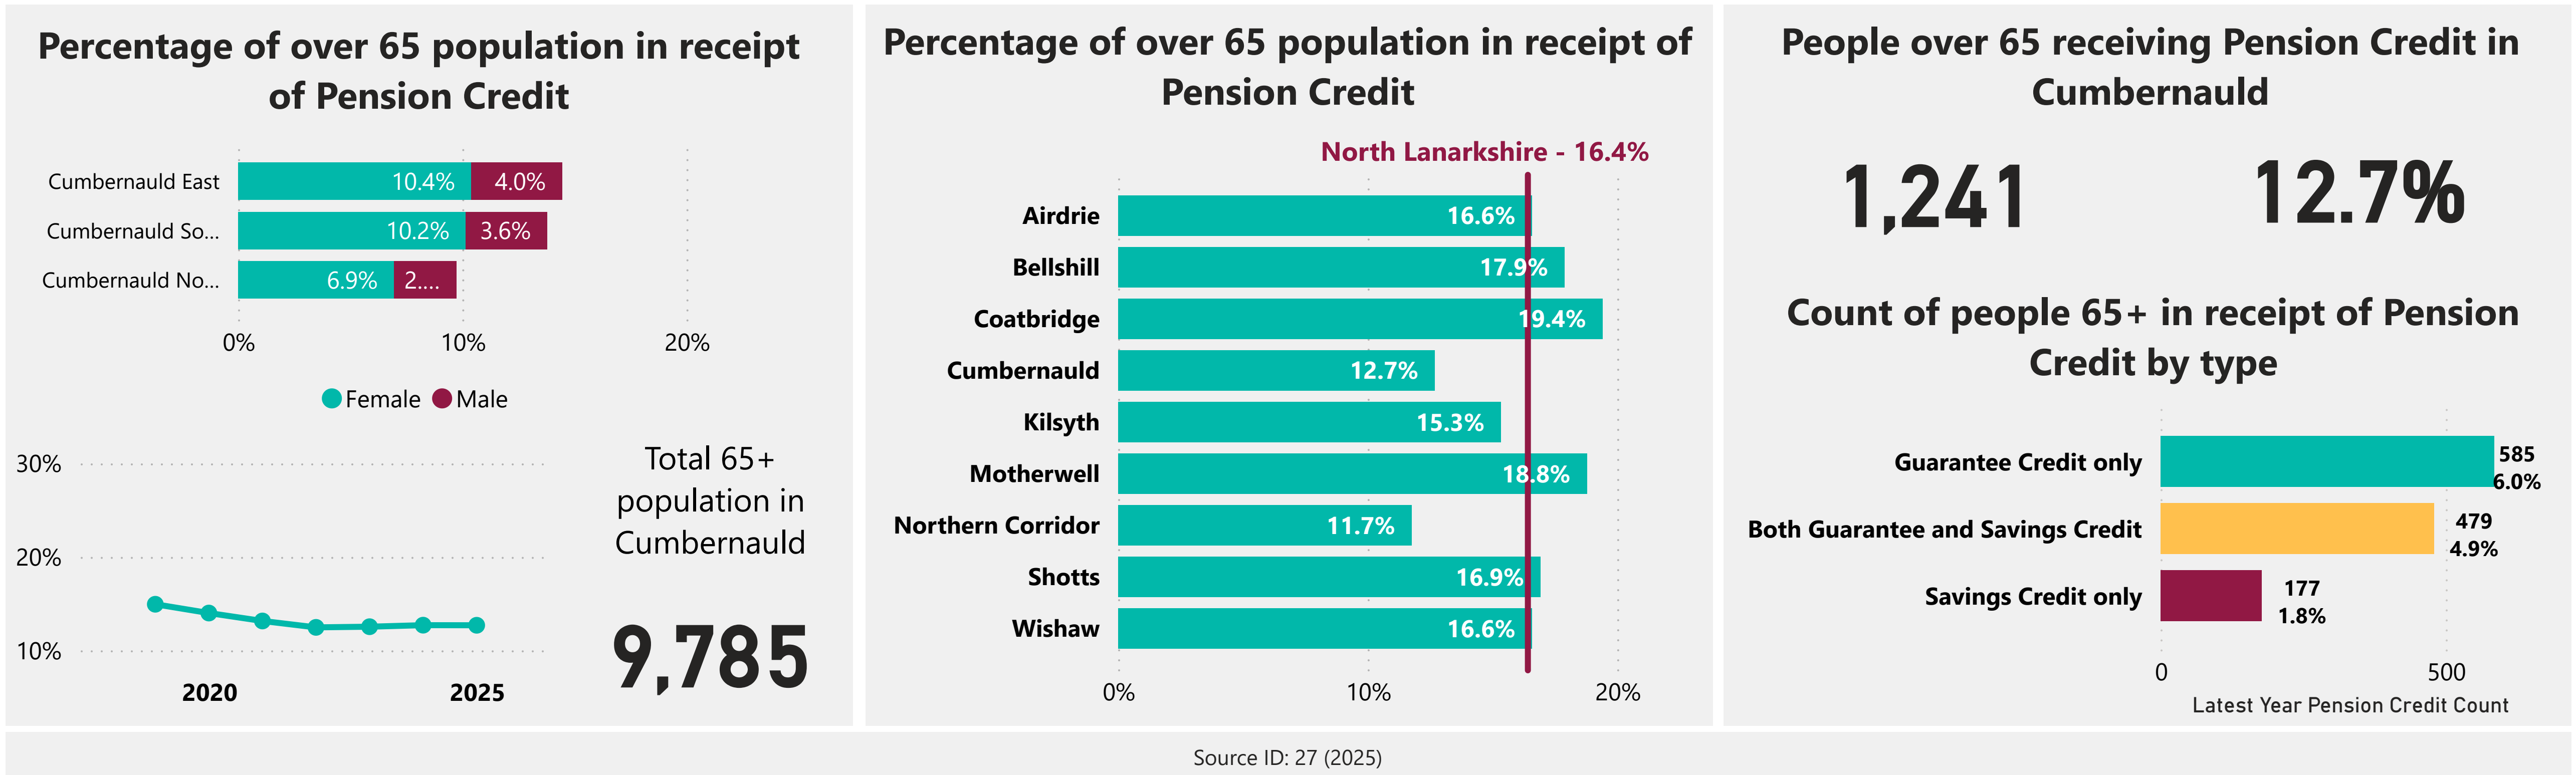

As of 2023, about 22% of children in Cumbernauld are living in families with relatively low income. This remains unchanged compared to 2022.

Around 9% of young people (those aged 0 to 25) live in areas considered among the most income deprived according to the Scottish Index of Multiple Deprivation (SIMD) in 2023, which remains unchanged compared to 2022.

Cumbernauld - Pension Credit

This dashboard provides an overview of people of state pension age who are in receipt of Pension Credit in Cumbernauld. It highlights sex difference across the area, breaks down recipients by credit type and provides a comparison with other Community Boards and the North Lanarkshire average.

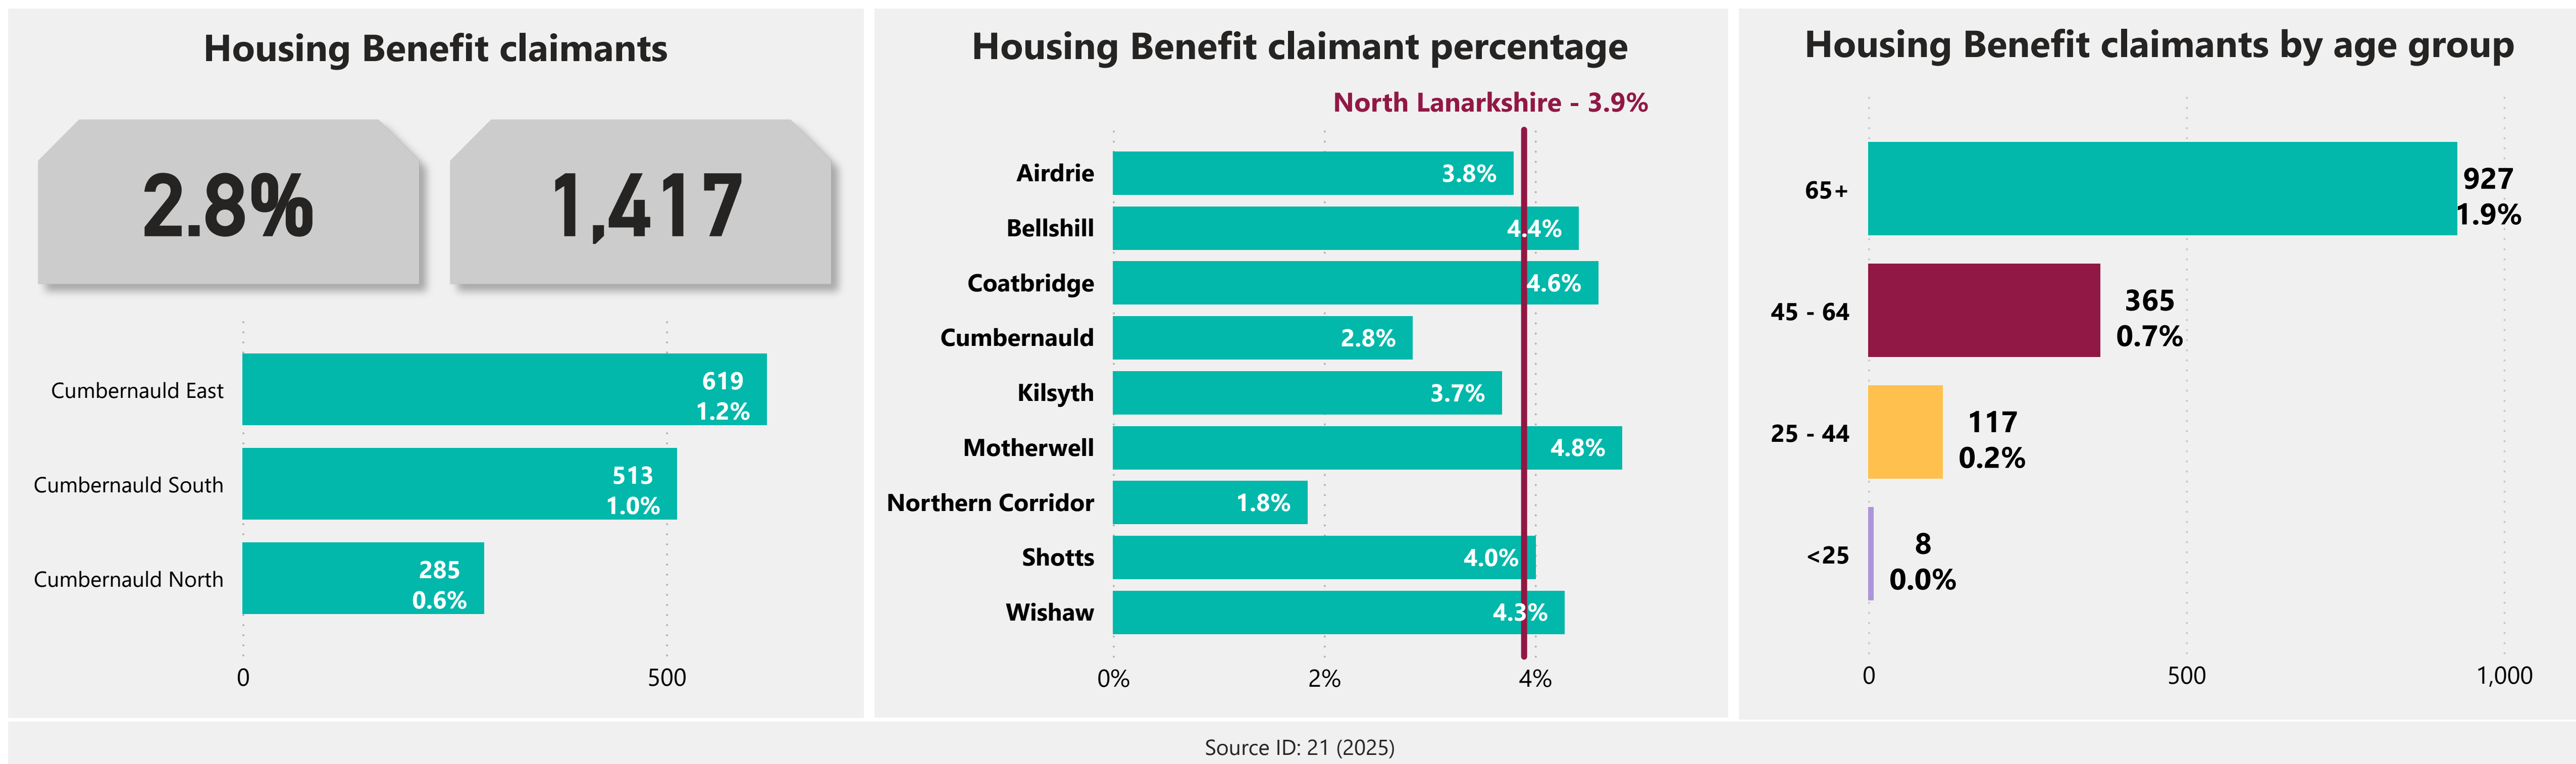

Across North Lanarkshire 9,954 people, 16.42% of the over 65 population, are in receipt of Pension Credit.

Pension Credit is a means-tested benefit designed to support people of state pension age who are on a low income. It is, therefore, a good indicator to gauge low income levels in the older population. People can qualify for either Guarantee Credit or Savings Credit, or both, depending on circumstances. Guarantee Credit is awarded to people whose income is below the threshold and Savings Credit is an extra payment for people who have saved some money for retirement. If both circumstances apply, both benefits may be awarded.

*The infographics above are produced using DWP data published in February 2025 and the latest ward-level mid-year population estimates from 2021.

Cumbernauld - Housing Benefit

This dashboard provides an overview of Housing Benefit claimants in Cumbernauld. It highlights the difference across the wards, breaks down recipients by age-group and provides a comparison with other communities and the North Lanarkshire average.

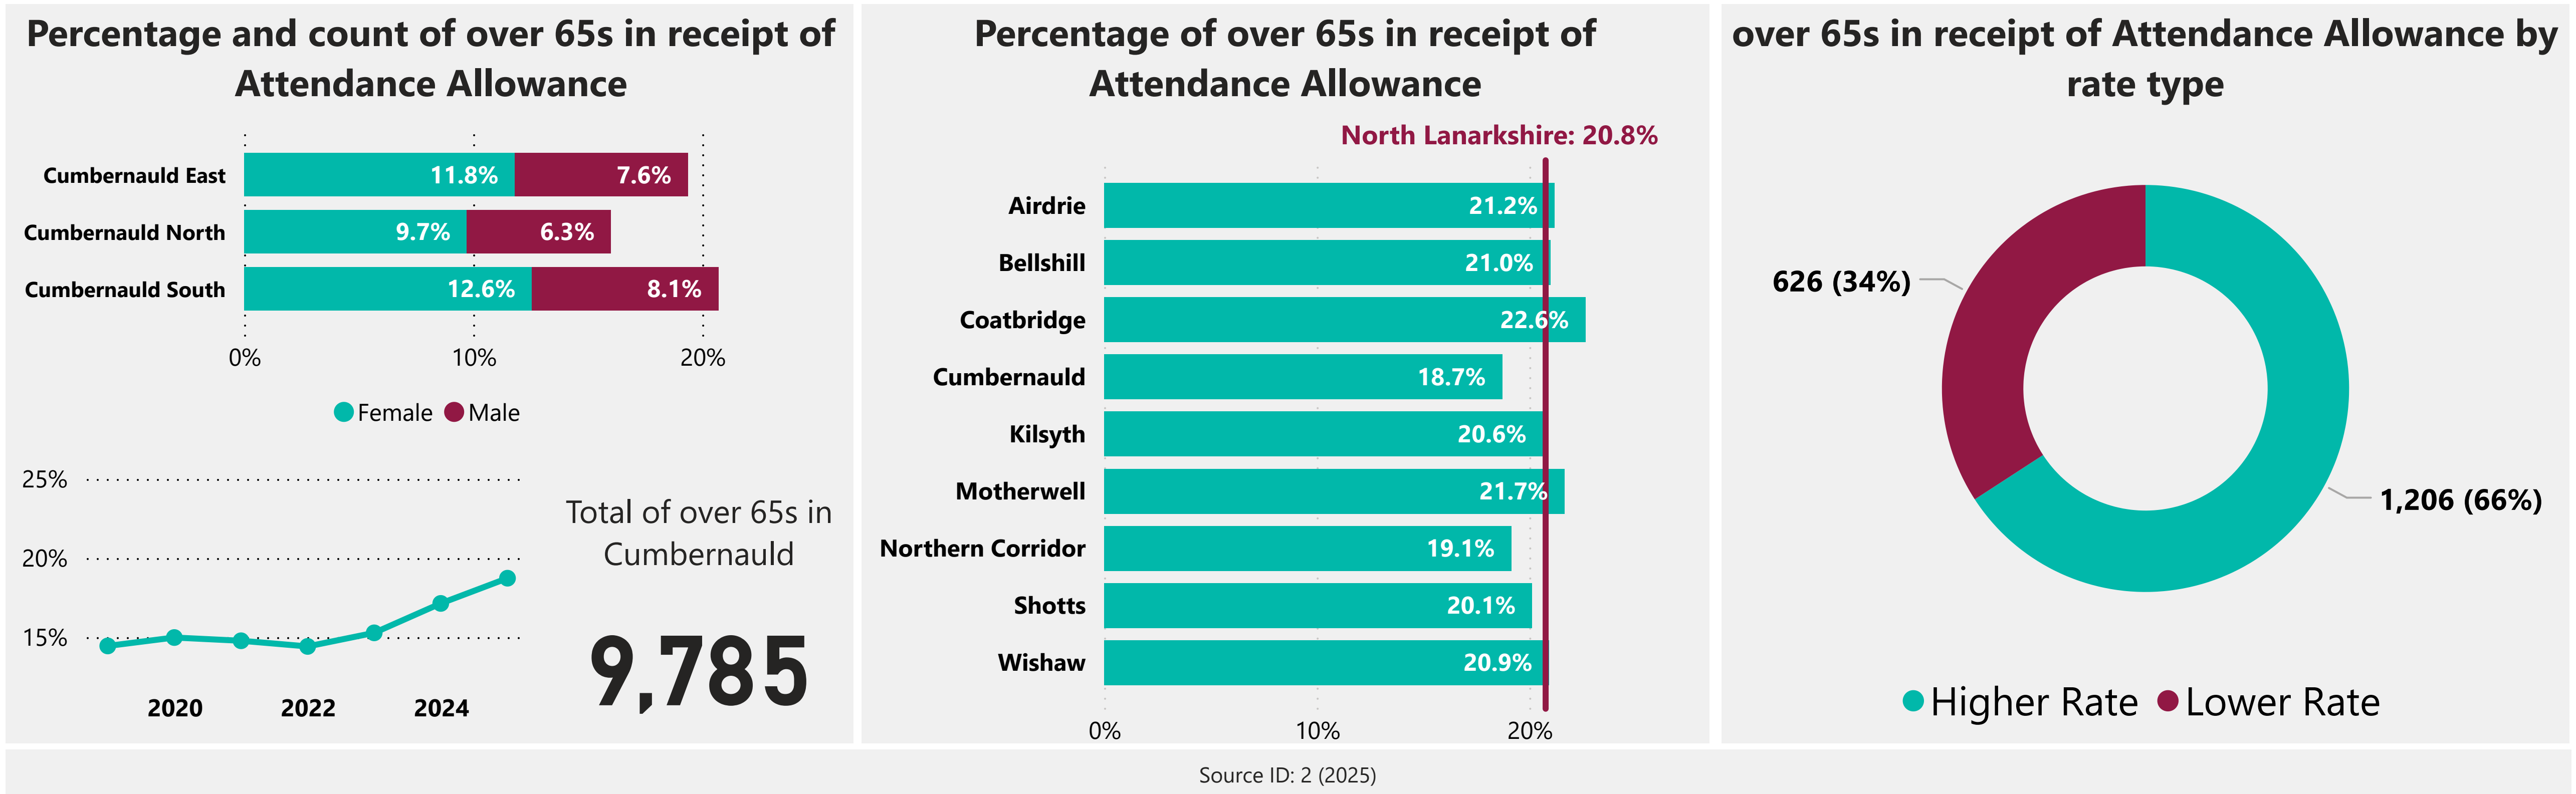

Across North Lanarkshire 13,312 people, 3.9% of the population, receive of Housing Benefit.

Most working-age people in Scotland now receive housing support through Universal Credit, not Housing Benefit. This shift began in 2013 and accelerated with the rollout of Universal Credit across the UK. As a result, Housing Benefit is now largely reserved for people over state pension age, or those living in supported or temporary accommodation. Because pensioners are not required to switch to Universal Credit, they make up the majority of current Housing Benefit recipients in Scotland.

*The infographics above are produced using DWP data published in February 2025 and the mid-year population estimates from 2021.

Cumbernauld - Attendance Allowance

This dashboard provides an overview of people of state pension who are receiving Attendance Allowance in Cumbernauld. It highlights sex distribution across the area, breaks down recipients by rate type and provides a comparison with other Community Boards and the North Lanarkshire average.

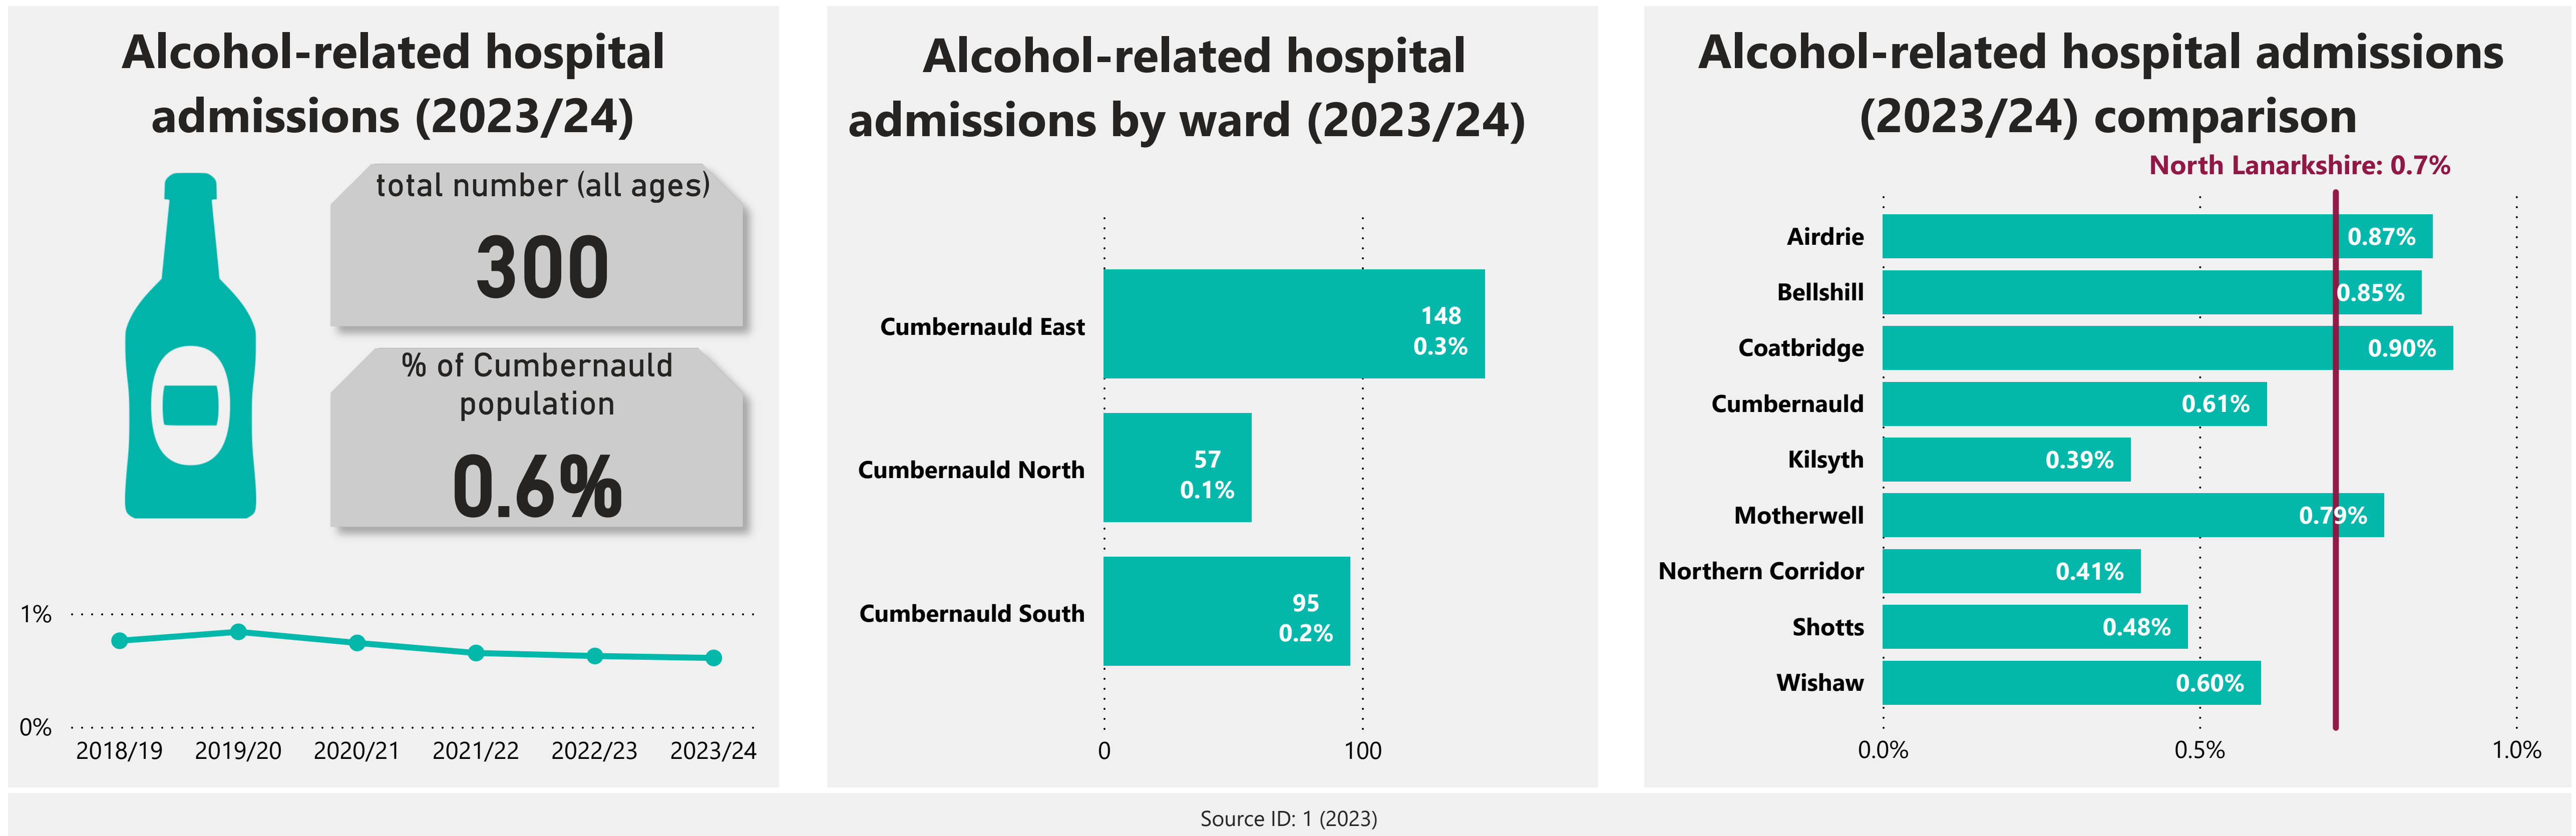

Across North Lanarkshire 12,591 people, 20.8 % of the over 65 year old population, receive Attendance Allowance.

Attendance Allowance is awarded to people aged over 65 years who need help with personal care and day-to-day activities. It is a good measure to gauge the health of the older population.

*The infographics above are produced using DWP data published in February 2025 and the mid-year population estimates from 2021.

Cumbernauld - alcohol-related hospital admissions

The infographics below provide data relating to alcohol-related hospital admissions of people of all ages in Cumbernauld. It highlights the difference across the wards and provides a comparison with other community boards and the North Lanarkshire average.

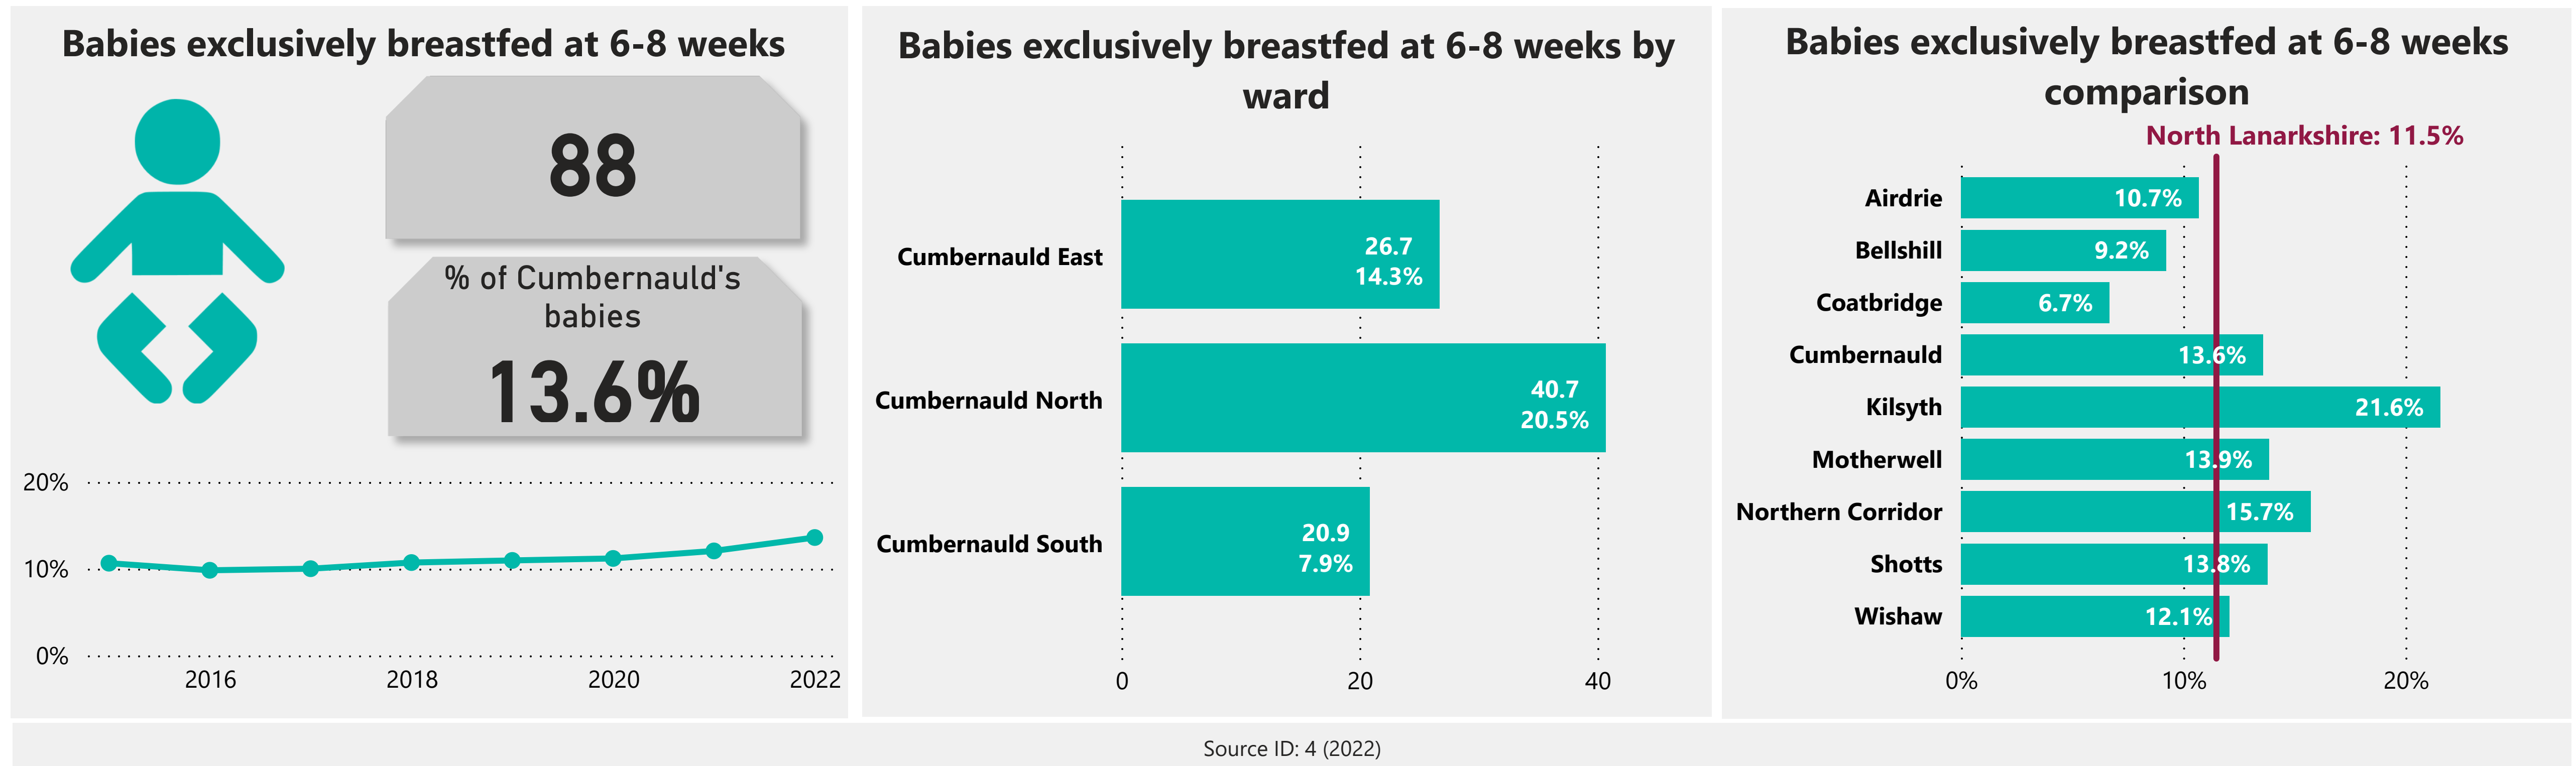

In Cumbernauld, 300 people were admitted to hospital due to alcohol related illness. This equates to 0.6% of the overall population of the area.

Excessive consumption of alcohol can result in a wide range of health problems. Some may occur after drinking over a relatively short period, such as acute intoxication (drunkenness) or poisoning (toxic effect). Others develop more gradually, only becoming evident after long-term heavy drinking, such as damage to the liver and brain. In addition to causing physical problems, excessive alcohol consumption can lead to mental health problems such as alcohol dependency. Alcohol can also play a factor in a range of other conditions such as injuries, epilepsy and cancer.

Cumbernauld - mother and baby - breastfeeding

This dashboard provides an overview of babies who are being exclusively breastfed at 6-8 weeks in Cumbernauld. It highlights the trend over the years, provides a breakdown by ward and shows a comparison with other Community Boards and North Lanarkshire overall.

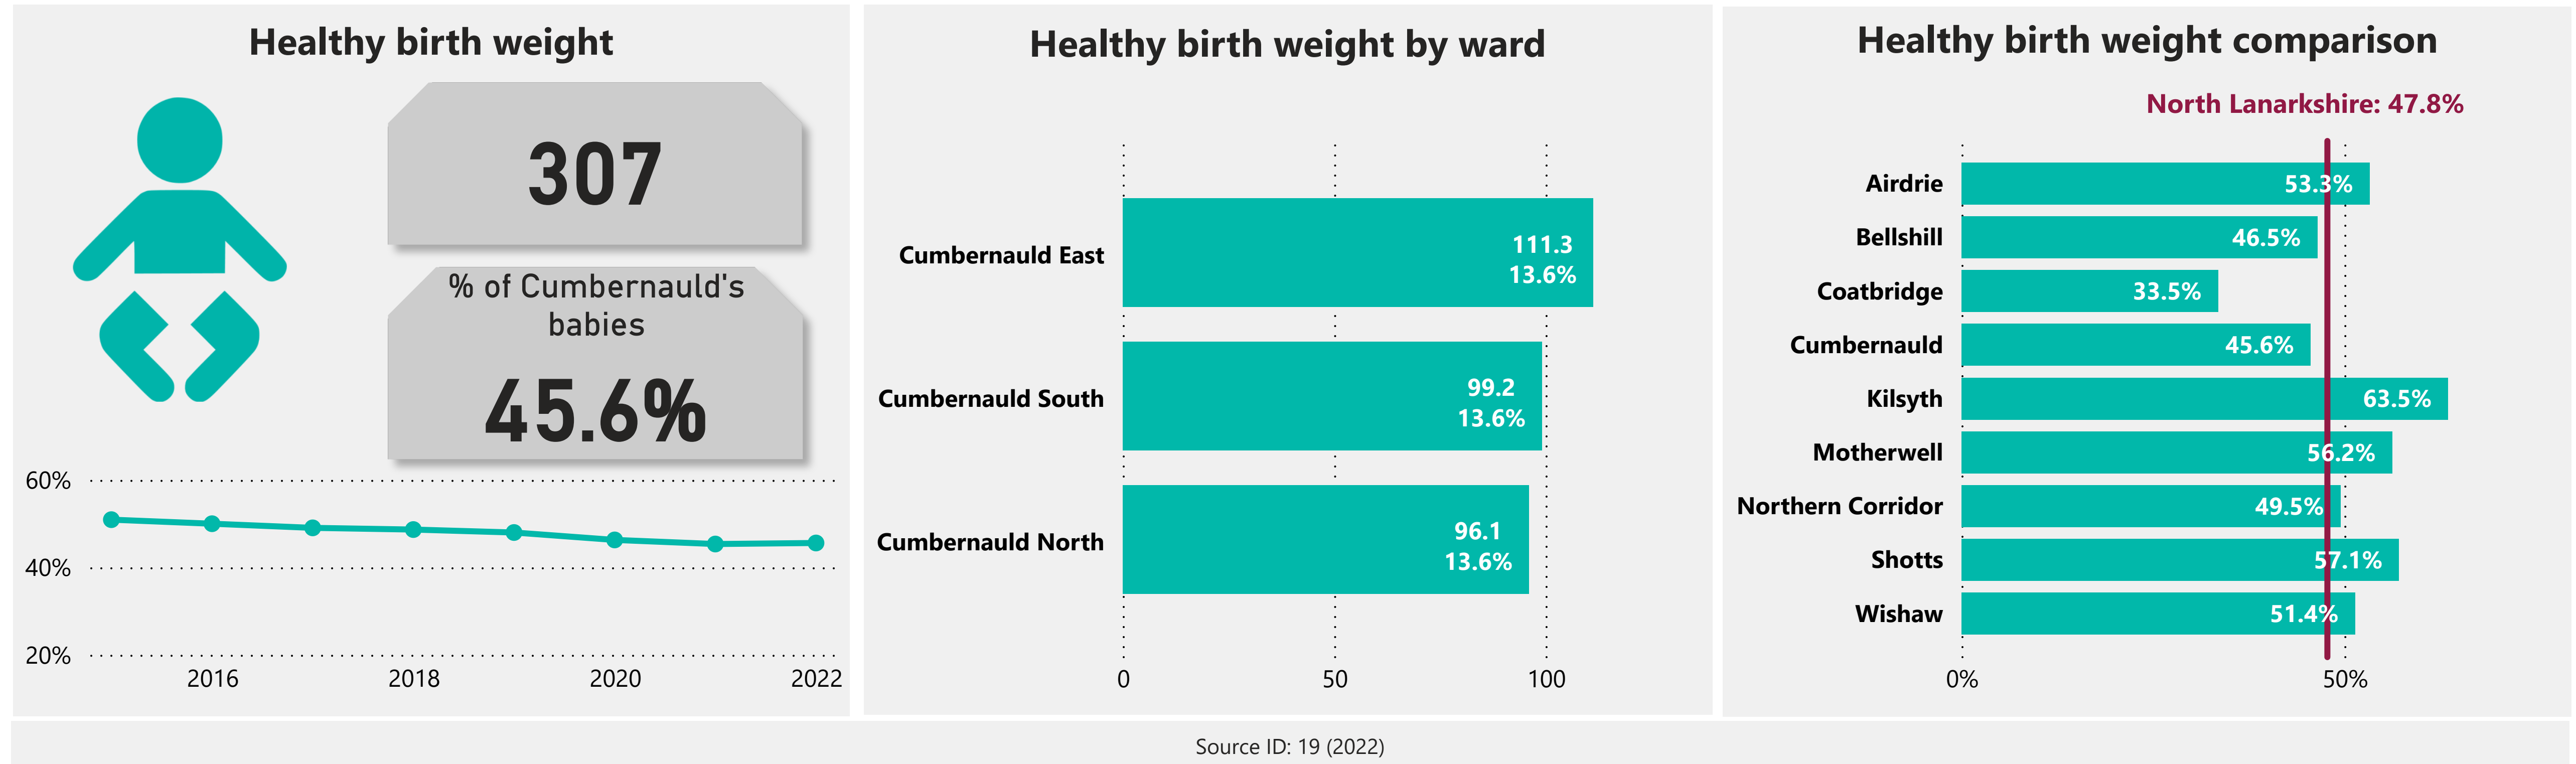

Across North Lanarkshire 520 babies (11.5%) were reported as being exclusively breastfed at their 6-8 week review.

Breastfeeding provides the best nutrition for babies and young children and supports children's health in the short and longer term. Breastfeeding also benefits mothers' health. Improving breastfeeding rates helps to improve the health of babies and mothers and reduce inequalities in health.

*This data is based on the latest 3 year aggregate 2021/22 to 2023/24.

Cumbernauld - mother and baby - healthy birth weight

This dashboard provides an overview of healthy birth weight babies in Cumbernauld. It highlights the trend over the years, provides a breakdown by ward and shows a comparison with other community boards and North Lanarkshire overall.

Across North Lanarkshire 2,283 full term babies (47.8%) were a healthy weight at birth.

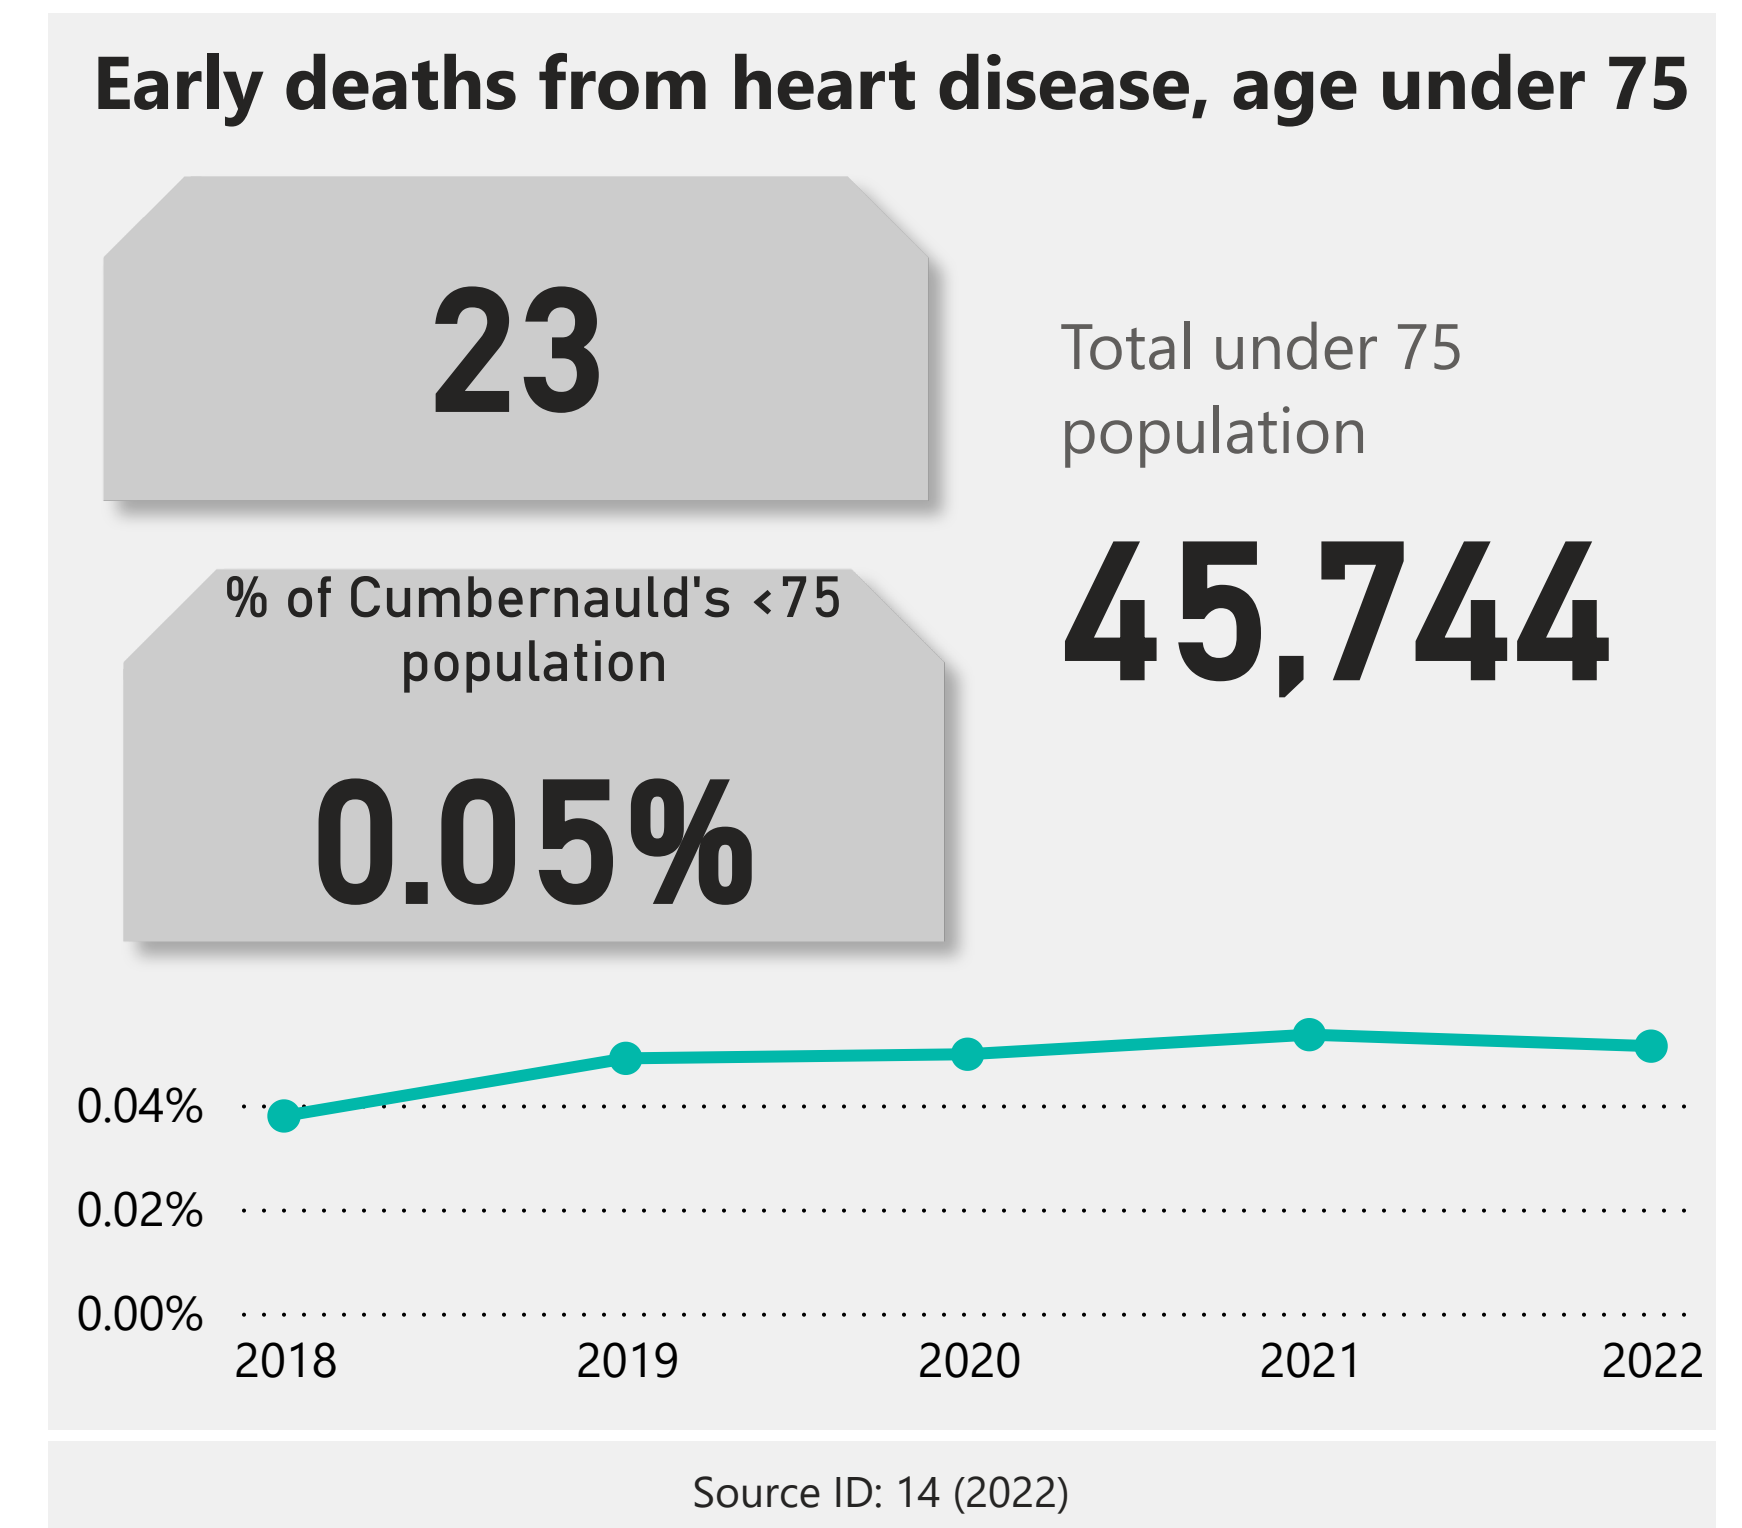

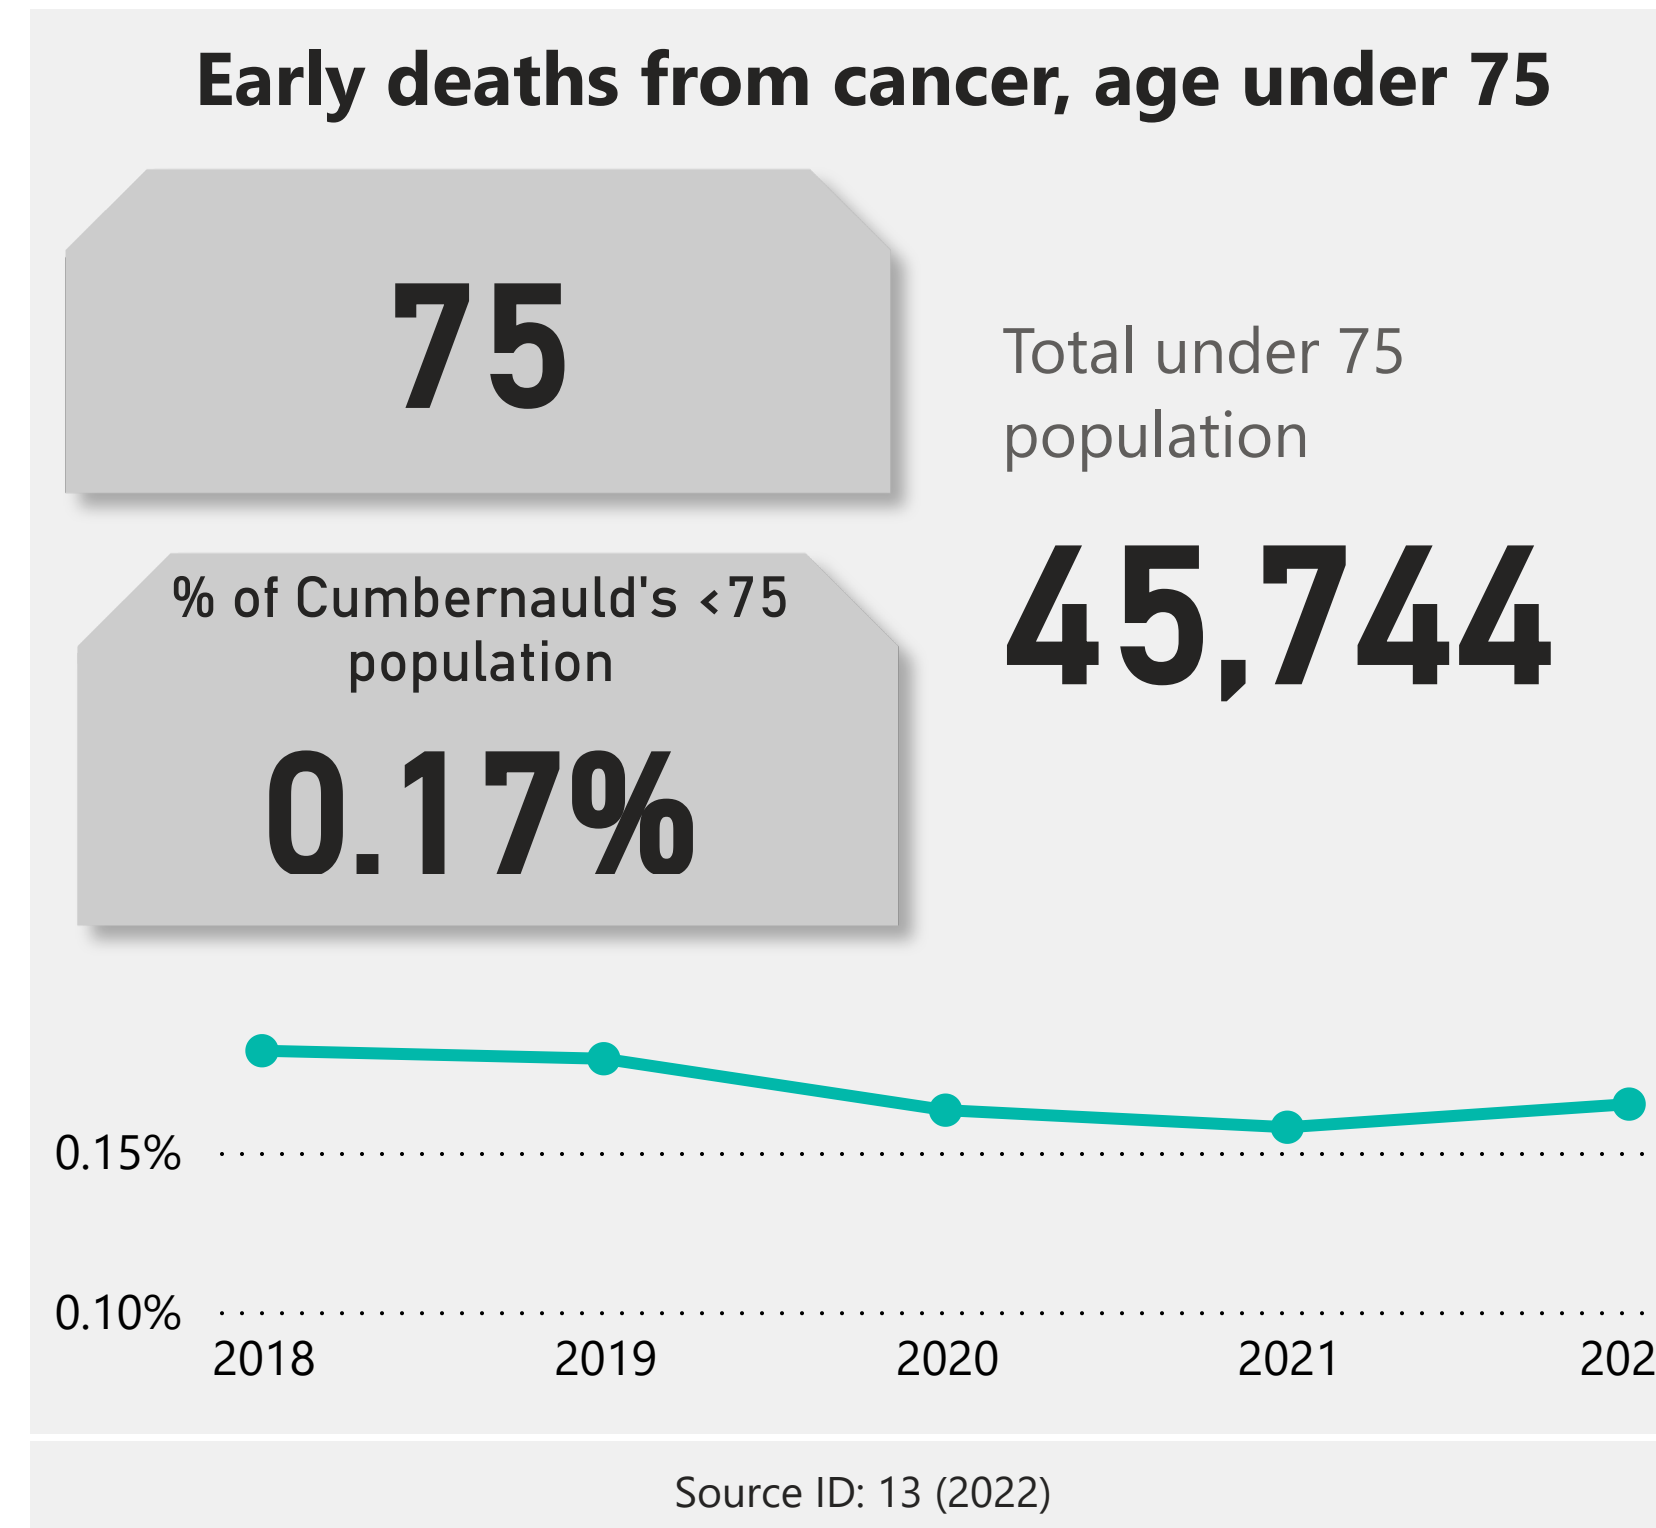

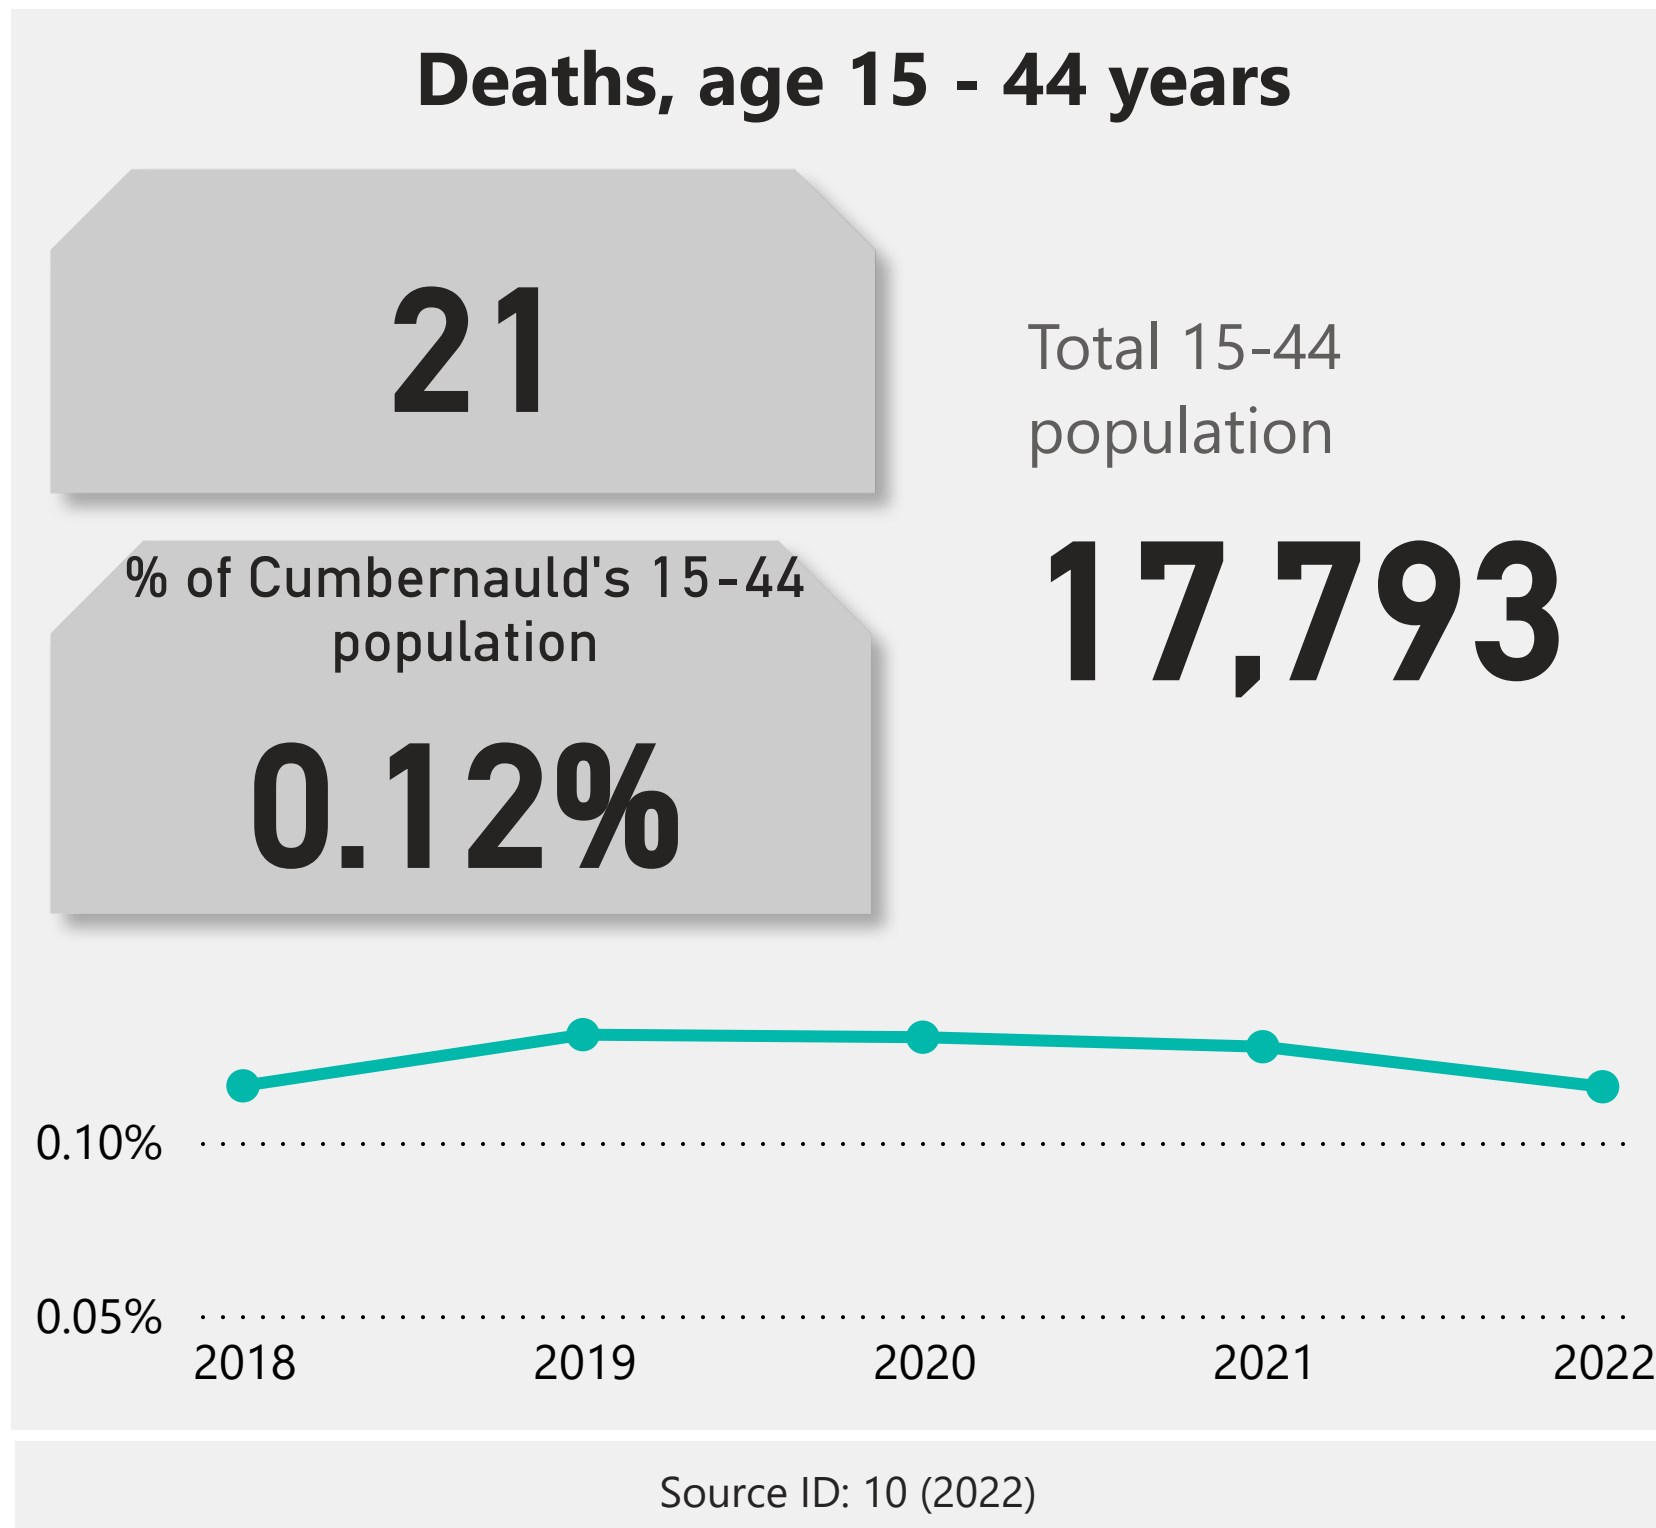

Healthy birth weight is defined as between 2.5kg and 4kg. Birth weight is influenced by deprivation and maternal health - mothers from deprived areas, those who smoke or have poor nutrition, are more likely to have smaller babies, whilst mothers who are obese or have diabetes tend to give birth to larger babies.

This matters because an unhealthy birth weight can lead to issues during labour and infancy, as well as health issues later in life.'

*This data is based on the latest 3 year aggregate 2021/22 to 2023/24.

Cumbernauld - deaths

This dashboard provides an overview of early deaths in Cumbernauld in 2022 and also shows trends over the years. It specifically looks at deaths in those under 75 years of age where cancer or coronary heart disease was the primary cause of death.

To put these figures into context, in 2022 in North Lanarkshire a total of 159 people aged between 15 and 44 died. This equates to 0.13% of the 15 to 44 year old population of the council area. In terms of deaths primarily caused by cancer in under 75 years old, the total deaths in North Lanarkshire was 504, which is 0.16% of the under 75 population. Additionally, in North Lanarkshire there were 210 deaths in those aged under 75 where the primary cause was coronary heart disease. This equates to 0.07% of the under 75 population of the area.

***This data is based on a three year rolling average. Deaths assigned to year based on death registration date.**

Cumbernauld - crime

The infographics below show the crime rate and number and proportion of young people living in the most crime prevalent areas in Cumbernauld.

Source ID: 32 (2020)

In Cumbernauld the crude rate of recorded crime - that is crimes and offences committed and cleared up per 10,000 people, is 406.8 as of 2022. This is an increase of 13.1 compared to 2021 which means the crime rate has not improved.

As of 2023, there are 3,988 0-25 year olds living in areas of Cumbernauld ranked by the Scottish Index of Multiple Deprivation (SIMD) as the most crime deprived (crime is more prevalent in these areas). This is roughly 21.3% of the population of young people in Cumbernauld. This has remained unchanged since 2022.

Cumbernauld - community facilities with public Wi-Fi and public Wi-Fi zones

This dashboard provides an overview of public Wi-Fi availability and community facilities in Cumbernauld, showing how many Wi-Fi zones exist locally compared to North Lanarkshire and the distribution of key facilities such as libraries and community centres.

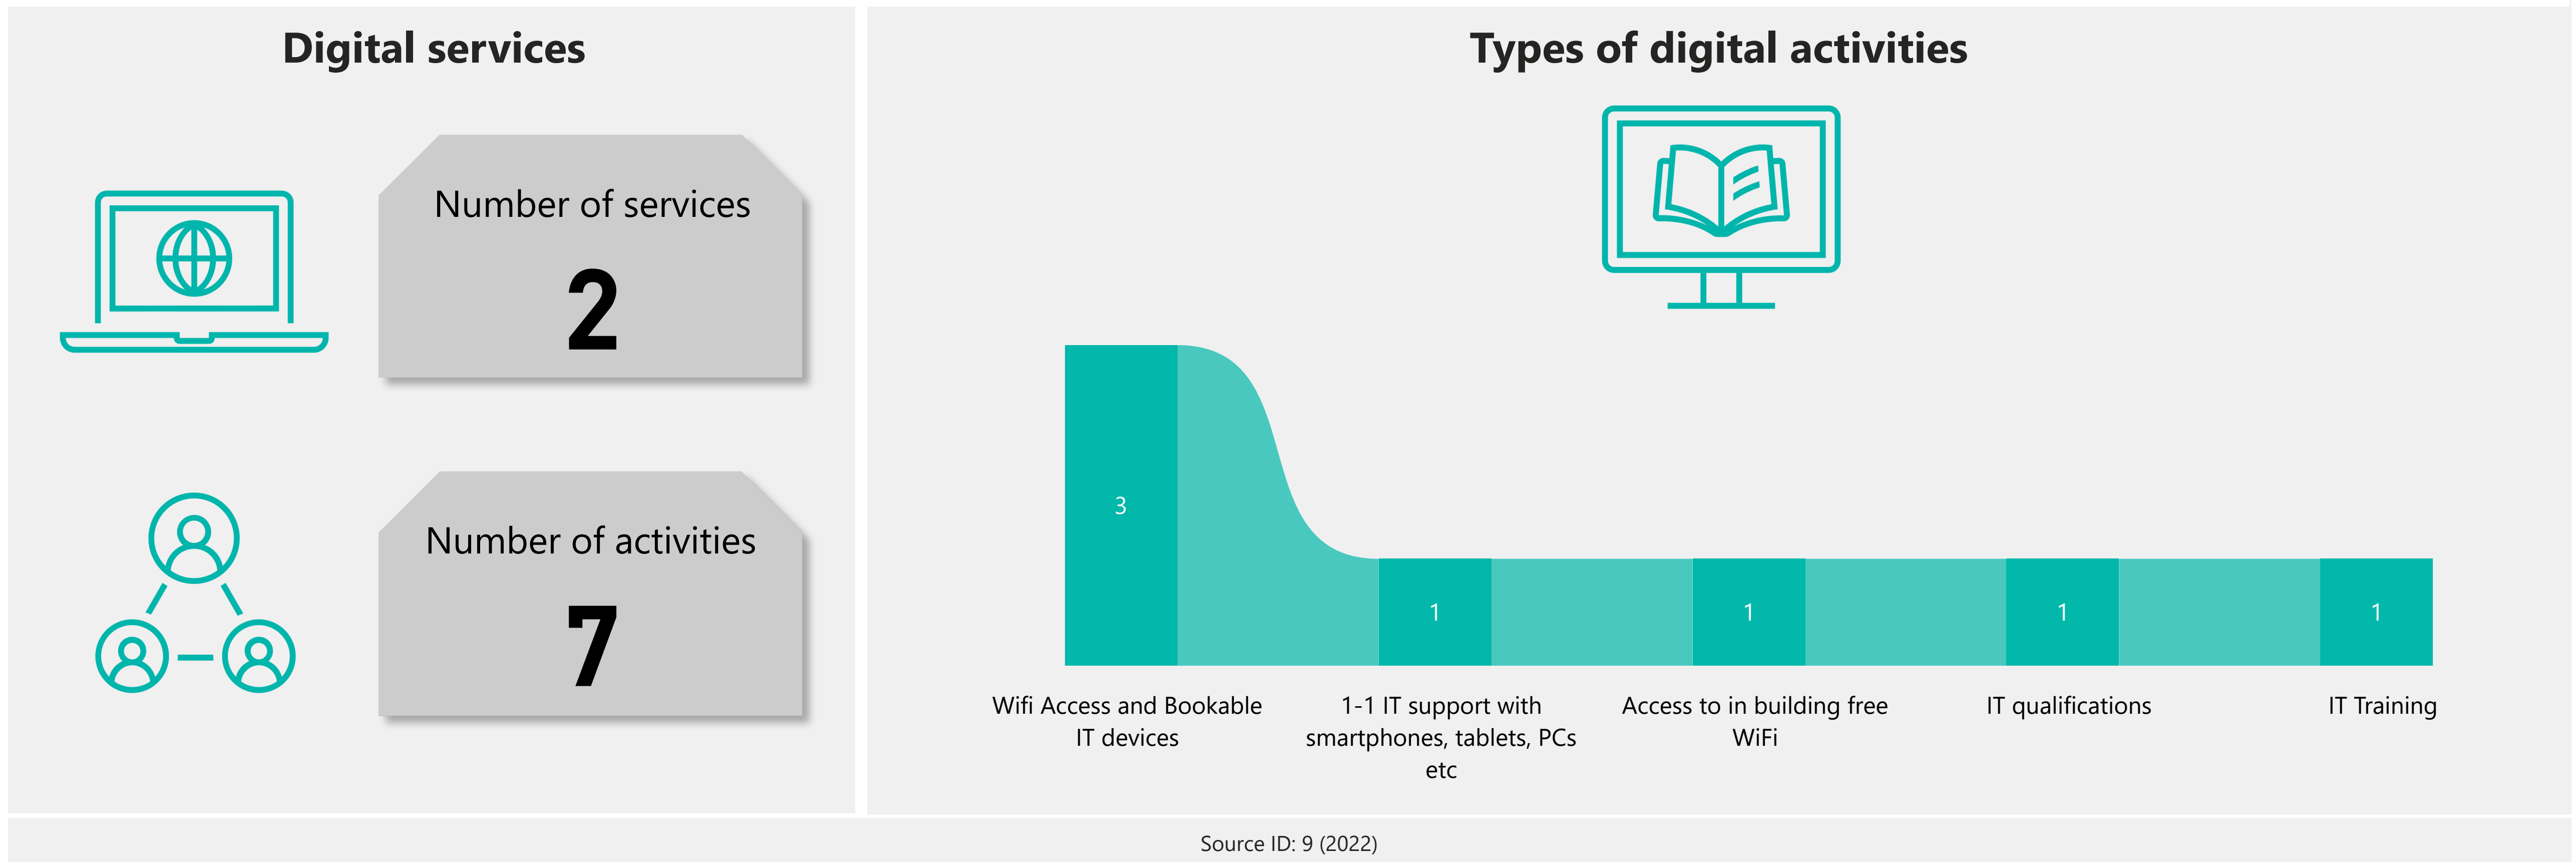

In Cumbernauld, there are currently 24 public Wi-Fi zones available for residents, representing 16.4 % of North Lanarkshire's total of 146 zones.

The types of sites in this area that provide Wi-Fi coverage are: social work locality, secondary school, retirement housing complex, community facility, library, leisure centre and temporary accommodation unit.

Cumbernauld has 3 libraries, 1 community centre and 1 other type of community facility with public Wi-Fi. Across North Lanarkshire, there are 17 libraries, 14 community centres, and 11 other types of community facilities. The total number of community facilities with public Wi-Fi across North Lanarkshire is 42.

Cumbernauld - digital services

This dashboard provides an overview of the digital services and activities available in Cumbernauld, showing how many services are offered and the types of activities that support digital skills and access to technology.

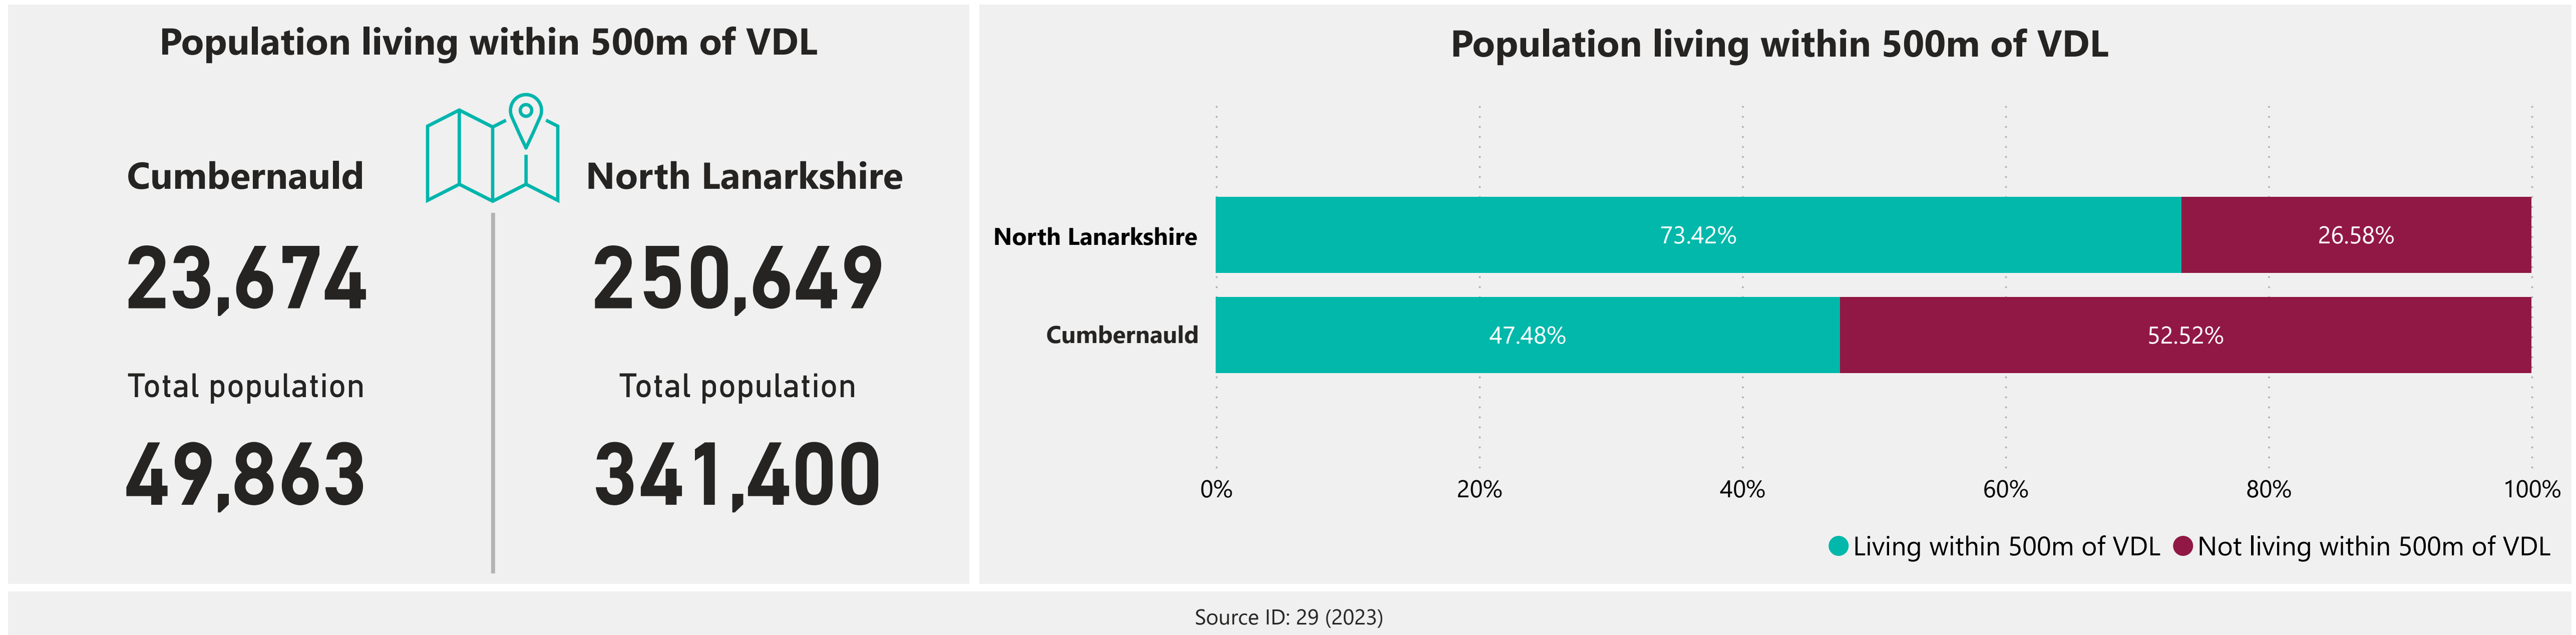

Cumbernauld offers 2 digital services that support the development of digital skills of the community and broaden access to technology resources. Those services include Public access to WiFi and IT and Available support for digital skills and training.

Cumbernauld has 7 digital activities. Those activities include IT Training, IT qualifications, 1-1 IT support with smartphones, tablets, PCs etc, Access to in building free WiFi and Wifi Access and Bookable IT devices.

Cumbernauld - vacant and derelict land

This dashboard provides an overview of the population living within 500 metres of vacant and derelict land (VDL) in Cumbernauld and compares this with North Lanarkshire.

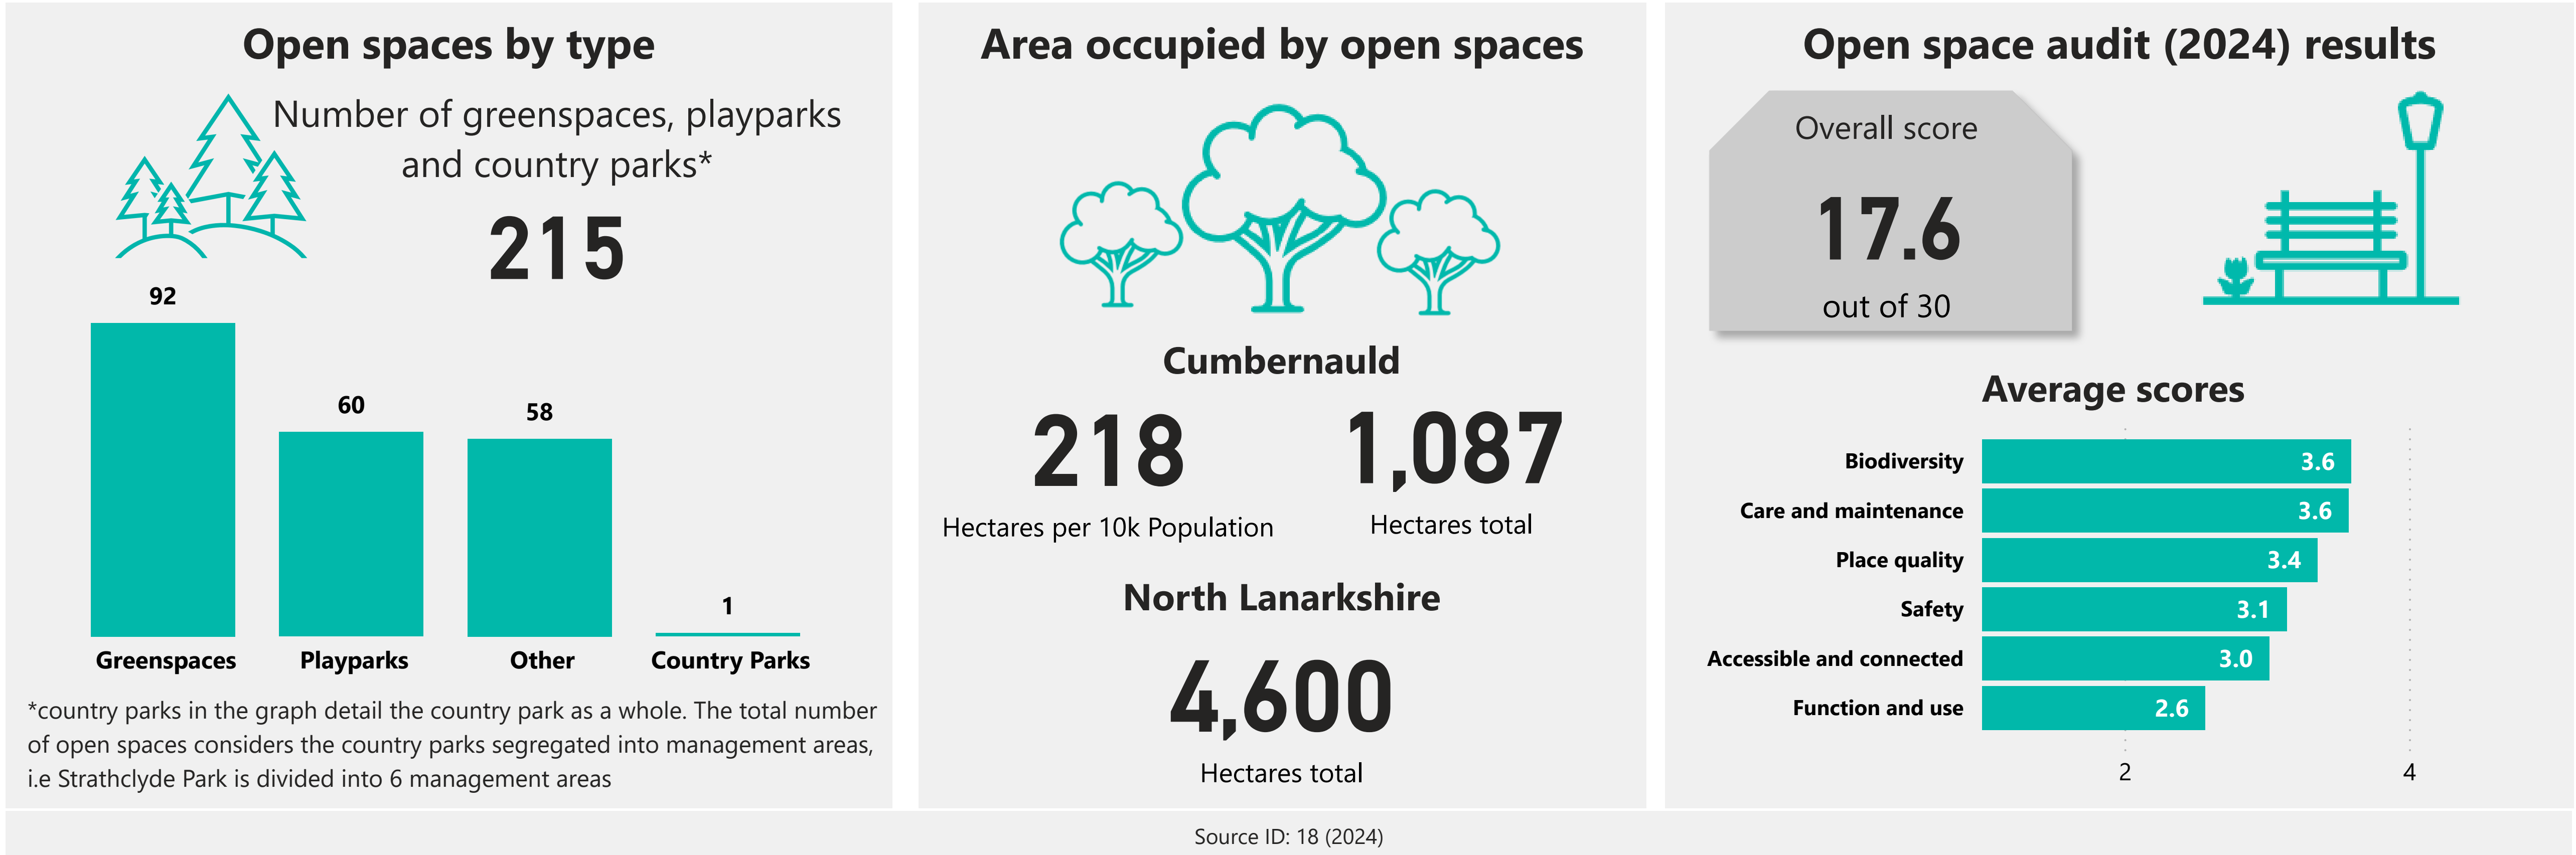

[Vacant and Derelict Land \(VDL\)](#) is land that is unused for its intended purpose or that is too damaged to be used without repair. Living close to vacant and derelict land is known to impact on the physical health of the population, contribute to poorer health outcomes, lower life expectancy and negatively impacting community wellbeing.

The existence of VDL matters. It can cause physical and psychological harm to communities. It is also a missed opportunity to use land productively, for a range of purposes. While there has been positive progress in recent years, VDL remains a significant issue. Half of Scotland's population lives within 1000 metres of vacant land. The figure is much higher in low income areas – in 2021, 49% of Scotland's total vacant and derelict land was located within the 15% most deprived areas of Glasgow.

In Cumbernauld, 23,674 people live within 500 metres of vacant and derelict land out of a total population of 49,863. Across North Lanarkshire, 73.42% of the population live within 500 metres of VDL compared to 47.48% in Cumbernauld. These figures highlight the proportion of residents affected by proximity to VDL.

Cumbernauld - greenspaces, playparks and country parks

This dashboard provides an overview of the number and quality of greenspaces, playparks, and country parks in Cumbernauld, including their distribution and average assessment scores.

In Cumbernauld, there are 92 greenspaces (584 hectares), 60 playparks (86 hectares), 1 country park (276 hectares) and 58 other open space areas (140 hectares). The graph shows the number of each category within the area. North Lanarkshire has a total of 1,296 greenspaces, playparks and country parks, which equate to a total of 4,600 hectares of open space. Cumbernauld has 1,087 hectares of open space.

The average score of open space quality reflect assessments on biodiversity, care and maintenance, place quality, safety, accessibility and function based on a scale from 1 to 5. The overall average total score is 17.6 out of 30.
