## St Stephen's Community Hub – building steady momentum

### Community Hub Update

Construction of the new community hub continues to make strong progress, with the external building envelope nearing its final completion.

Internal fit-out works are advancing well, and several areas are now nearing completion. External hard and soft landscaping activities are also progressing steadily, benefiting from the recent improvement in weather conditions.

We will provide further updates as key milestones are reached.

To view further details about the new development and the overall Town and Community Hub programme please [Click Here](#) or alternatively scan the QR Code below.

### Timescales

Time-scales noted below:

- » **Const Start:** March 2025
- » **Facility Opening:** Q4 2026

### Planned Operations

During the summer holiday period, the initial temporary pedestrian access and egress route from the existing car park will be formed thus minimising impact upon the live school. The main building works will progress including tie-ins to existing boundary conditions & roadways.

### Summer Holiday Period

As we approach the summer holiday period, we would like to wish everyone a safe and enjoyable break. With the school closed and more children likely to be in the local area during the holidays, we would like to take this opportunity to remind everyone that construction sites remain active work environments and can present significant hazards. Thank you for your continued support in helping us maintain a safe environment for everyone.

### Community and Social Benefits

Our Social Value delivery programme continues with NLC, Hub South West Scotland and Morrison Construction continuing to engage within local schools, colleges, and the wider community.
